

## Visual One® Hosted Seamless PMS for Hotel and Resort Management

Visual One® is enabling properties to increase their revenue by 20% or more.

### Solution Type:

- Property management solution

### Target Market(s):

- For Full-service Resorts; Country Clubs; Luxury Spa Resorts; Boutique Properties; Condominium Hotels; Corporate Hotels; Casino Properties; Chains of 50 to 1500 Guest Rooms

### New Release or Existing Technology:

- Enhancements to existing technology

### Top 3 Innovative Features:

- **Everything in Single System:** Full integration of spa, golf, POS, dining, resort activities, online booking, sales & catering and back office accounting.
- **Predictable Costs** - Know exactly what your costs will be today, and well into the future with hosted deployment. No more unexpected IT spend.
- **Global Readiness** - Simplify communications with multi-currency capability and proper accounting of international taxation.

### Existing Customers for This Technology:

- Horseshoe Bay Resort - Horseshoe Bay, Texas
- Chetola Resort at Blowing Rock - Blowing Rock, North Carolina
- Jackson Rancheria Casino Resort - Jackson, California
- The Mill Casino Hotel & RV Park - North Bend, Oregon
- Odawa Casino Resort - Petoskey, Michigan

Whether you're a full-service resort needing to integrate several applications across multiple outlets, or a small chain that needs to share data among properties, Agilysys Visual One® can revolutionize the way you manage your operations and deliver guest service.

PMS automation and integration are among the most important of current trends. But how do you integrate business systems and automate operations without adding cost? Visual One's modules for accounting, activities, club management, comp accounting, condo accounting, sales and catering, guest marketing, and spa management integrate seamlessly with one another. Its user-friendly screens are laid out in a logical, modern format with quick-feature icons and drag-and-drop capabilities to simplify staff training. With an online shopping cart that prompts guests to book rooms, spa appointments, tee times and all sorts of activities within a single folio, Visual One keeps your staff focused on guest satisfaction rather than administrative activities.

And with hosted deployment, operators have instant access to the most up-to-date functionality and regulatory requirements without the downtime or frustration often associated with on-site upgrades. Visual One® Hosted is compliant with the latest industry and security standards, ensuring a level of confidence and convenience that doesn't come with most on premise PMS offerings.

The savviest hotels are focused on creating frictionless guest experiences to keep guests coming back again and again. But not all property management systems are created equal. Whether you're serving a single guest for a single night, or a large group hosting a large conference, Visual One enables hospitality professionals to increase their revenue by 20% or more while automating guest service. This software suite tracks and manages guest preferences across every touchpoint and provides the tools essential for a seamless guest interaction, in one comprehensive solution, at the fingertips of your staff.
