

**SAVE PAPER, SAVE TREES, SAVE STORAGE,
SAVE MONEY.**

Simplify document management.

There's nothing else like it on the market.

All businesses, from small-scale office environments to complex corporate operations spanning multiple locations, can benefit from a document management solution. However, not all document management systems are created equal. Some require months to implement and others only complicate existing processes instead of streamlining them.

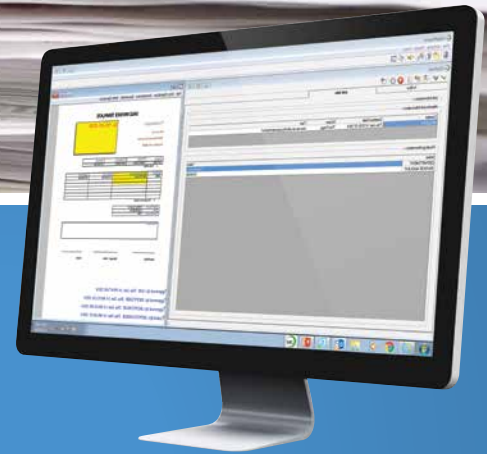

Agilysys DataMagine™ is a cost-effective document management solution that transforms paper records into electronic images that are then archived for on-demand access, allowing you to increase security while realizing organizational process improvements. The software's U.S.-patented imaging module seamlessly integrates with your business applications, usually without writing or changing a single line of code.

Streamline your Front Desk Operations

Current property management systems (PMS) produce volumes of reports and documents, ranging from night audits, guest registration cards, group folios and a variety of others. DataMagine can handle all these processes with specifically designed tools like Report Archive, DataMagine Link, Driver's License and Passport scanning along with Electronic Signature Capture. Archive reports electronically, attach documents to PMS transactions and provide digital ways to present hotel registration cards while capturing guest information about their stay as well as their signatures.

Signature Capture Module Benefits

- Stores transactions with embedded signature as a single electronic document for proper compliance.
- Reduces charge-backs with proper signatures and transaction information by providing instant proof to guests.
- Improves customer service with faster response to phone inquiries, proof of stay or check-in and check-out.
- Eliminates manual filing and instantly locates registration cards with all transactions listed, indexed and archived with multiple index fields.
- Passes data and signature information to third party forms package.
- Provides 24x7 service with web access to all registration cards.

Automate your Accounts Payable Processes

Your accounts payable group is busy putting out fires, answering vendor inquiries/complaints, verifying shipments/payments and more. The DataMagine Imaging module converts externally scanned or imported documents into digitized images that are then indexed and can be linked to virtually any business application running on a Windows® platform. Once an image is stored, it is instantly accessible for viewing, printing or emailing. Notes or annotations may also be easily added.

Increase Productivity

Enable your accounts payable team to retrieve pertinent documents without leaving their desks — no more searching for folders in filing cabinets or trips to storage facilities to retrieve archived stored paper documents. DataMagine software will link electronic document management capabilities with your accounts payable business applications, whether they're third party or in-house created programs.

Customize Your Solution

Whether you require a document management solution for one location or across multiple business units, you now can choose the best features to fit your needs. DataMagine is a completely scalable solution suite comprised of modules that can be implemented at your pace, enabling you to define the system you need for your business without the cost of unnecessary features. Available modules include:

- Attendant Module
- Barcode Module
- CD\DVD Burning Module
- DocFlow Module
- Document Imaging Module
- Index Update Module
- Signature Capture Module
- Report Archive & Retrieval Module
- Web Scan/Index/Search Module
- Driver's License and Passport Scanning
- Export and Purge
- DocFlow Email Approval
- DataMagine Web Services
- DataMagine Import Module

Features & Benefits

Remote On-Demand Data Access	Retrieve electronic documents securely from any location via Internet or Intranet.
Streamlined Document Retrieval	Increase employee productivity by reducing paper flow while improving access to data.
Instant Data Delivery	Improve response time with the ability to deliver digitized records to the appropriate internal, customer or vendor destination in real time.
Electronic Document Routing	Route electronic documents for approvals via desktop or email while maintaining a complete audit trail with reporting.
Scalable	Implement in a single department or enterprise-wide.
Easy Deployment and Integration	Install DataMagine right alongside your current business applications, with little or no coding necessary.
Compliance with Regulatory Requirements like Sarbanes-Oxley	Organize and retrieve indexed records for audits or IRS review.
Individual Permission Levels	Secure sensitive data.
User Friendly, Intuitive	Train staff quickly and easily.
