

## Terminal Inspection Checklist

- Verify the stylus covers the width of the terminal when it is laid across.

- Verify the stylus is the same width as the outside of the magnetic stripe reader.

- Verify the stylus fits completely into the stylus holder on the left side of the terminal.
- Verify the top edge of the terminal is a flat continuous surface.
- Verify the side edge of the terminal is a flat continuous surface.
- Verify the keypad backlight is visible when shielding the keypad from the room light.

Left: backlight visible when keypad is shielded. Right: no backlight visible
