

DATA MANAGEMENT & STORAGE: PROTECT YOUR MOST CRITICAL ASSET

Optimize Your Environment

Whether you want to cut down on unexpected and expensive downtime, meet data retention compliance regulations or achieve recovery point and time objectives, Agilysys will find a high performance Data Management & Storage solution for you. Agilysys has the experience and knowledge to help you with even the most complicated data management storage challenges: your unique environment can be better utilized, and our experts can show you how.

Data Management & Storage: A Strategic Investment Priority

In today's data-driven business environment, effective management of data management and storage technologies is a significant success factor. Your company's information is its most critical business asset. Agilysys can help you implement and manage the efficient, extensible storage infrastructure you need to protect this investment including customized storage management solutions and strategies including implementation and maintenance support, assessment of your current and future Storage and SAN needs, backup solutions that provide the availability of stored data as well as business continuity, disaster recovery and archiving solutions.

Why Agilysys? Expertise. Solutions. Experience.

In order to provide the most efficient Data Management & Storage solutions, Agilysys partners with technology industry leaders. Then, through an on-site assessment, our data experts work with your staff, implementing customized solutions to meet your current requirements as well as plan for future needs. We'll show you flexible and efficient uses for your hardware and a cost-efficient way to manage storage capacity plans.

With an Agilysys Data Management & Storage solution, you'll get reliable:

- Implementation planning and services
- Subject matter expertise
- Training and knowledge transfer
- Customized reports and features
- Continued professional support

With an Agilysys Data Management & Storage solution, you can:

- *Protect valuable data while automating and optimizing your unique environment.*
- *Meet current compliance regulations.*
- *Avoid unproductive downtime.*
- *Decrease any wasted storage capacity and document storage inventory for better resource management.*
- *Forecast your storage demands: plan more effectively for future performance and capacity requirements.*

Our Expertise and Practices

The Agilysys Data Management & Storage practices are developed to help you manage your data and storage more efficiently while easily adapting to your company's growth. We offer a variety of services that will optimize your implementation.

<p>Storage & SAN Services</p>	<p>Agilysys offers complete SAN assessment and upgrade services:</p> <ul style="list-style-type: none"> • Hardware integration services • Storage software installation and integration • Data migration services • Port utilization reporting • Port and zone naming conventions and security assessment • Core, switch, ISL, port and ASIC performance assessment • Fault resilience and bandwidth evaluation • Upgrade path reports and design • Firmware upgrades • Documentation of entire fabric with detailed diagrams
<p>Business Continuity (BC) & Disaster Recovery (DR)</p>	<p>Part of managing, implementing and maintaining your BC & DR plan is understanding what level of data protection, availability, accessibility and service levels are needed. Our experts understand these service level items, as well as the applicable threats and risks, and will create a plan for you.</p> <ul style="list-style-type: none"> • BC & DR plan designed around your data availability, accessibility and retention needs • Custom integration based on application and technological interdependencies
