

Technology to Manage Purchasing With Confidence

Inventory & Procurement Built for
High Volume Hospitality

Hospitality needs efficient inventory and procurement to protect margins and service.

Many operators struggle with manual ordering, disconnected systems, and limited visibility into usage and cost drivers, which creates waste and reduces financial control. Agilysys SWS streamlines the entire inventory and procurement lifecycle by automating replenishment, improving accuracy, and integrating seamlessly with POS and financial systems. The result is a single, enterprise-grade platform that reduces cost leakage and gives teams the insight needed to confidently manage their purchasing.

Benefits:

Reduce Cost Leakage

Improve control over food, beverage, and retail costs by automating replenishment, enforcing purchasing rules, and eliminating manual data entry errors.

Increase Operational Accuracy

Improve inventory consistency across outlets by standardizing receiving, transfers, and physical counts using mobile, barcode enabled workflows.

Improve Financial Visibility

Enhance real-time insight into COGS, price fluctuations, and vendor compliance by integrating purchasing and inventory data with POS and financial systems.

Strengthen Vendor & Contract Compliance

Ensure accurate pricing and controlled purchasing by routing orders through contracted vendors and validating invoices against agreed rates.

Accelerate Procurement Workflows

Shorten purchasing cycles by automatically generating requisitions, bids, and purchase orders based on real-time data.

Support Multi-Location Scalability

Reduce administrative overhead by centralizing purchasing rules, reporting, and item management across multiple properties, brands, or outlets.
