

A Flexible & Reliable Payments Platform

Technology That Protects Every Transaction & Secures Guests' Trust

Payments shouldn't be a barrier to providing great experiences.

But as hospitality operators adopt new guest engagement tools and diversify their payment environments, maintaining security, compliance, and reliability becomes significantly harder. Agilysys Pay removes that burden by providing a secure, extensible payments platform with PCI-validated point to point encryption (P2PE), tokenization, and EMV support. Integrated seamlessly with Agilysys POS and PMS solutions, Agilysys Pay unifies payment workflows across hotels, resorts, casinos, and restaurants to deliver consistent, secure transactions across the enterprise.

Benefits:

Protect Guest Data

Safeguard every transaction with PCI-validated P2PE, EMV, and tokenization to reduce exposure and keep sensitive cardholder information secure across all payment touchpoints.

Deliver Consistent Payment Experiences

Give guests a seamless, secure payment experience across point-of-sale, property management, mobile, kiosk, and eCommerce channels.

Simplify Compliance

Reduce the cost and complexity of PCI audits by removing POS terminals, devices, and networks from PCI scope with a fully validated and encrypted payment architecture.

Accelerate Innovation

Adopt new payment hardware, add services, or replace components without disrupting operations or increasing data-security risk, thanks to flexible platform extensibility.

Strengthen Payment Reliability

Leverage a resilient, high-availability payment platform that minimizes disruptions and helps ensure stable, consistent processing across your enterprise.

Reduce IT Burden

Streamline operations with a unified payment solution that manages security, hardware, gateway services, and integrations through a single platform designed for hospitality.

Agilysys Pay **Product Features:**

PCI-Validated P2PE

Encrypts data at the point of interaction using fully validated P2PE to protect cardholder information and dramatically reduce PCI compliance scope.

Tokenization & EMV Support

Replaces sensitive card data with secure tokens to simplify refunds and repeat transactions, while EMV support prevents counterfeit fraud and enables modern payment methods.

Hospitality-Ready Payment Hardware

Supports a broad range of payment devices that include EMV, NFC, mobile wallets, and signature capture across countertop, handheld, and table-service scenarios.

Integrated POS & PMS Connectivity

Works seamlessly with Agilysys POS and PMS solutions to provide consistent workflows and centralized payment processing across the enterprise.

Reliable, High-Availability Architecture

Provides a resilient platform designed to minimize downtime and maintain stable payment operations across mission-critical systems.

Extensible APIs & Gateway Integrations

Offers robust APIs and certified gateway connections that simplify adding new payment services or integrating with existing enterprise environments.

The Power of the **Agilysys Ecosystem**

Take Pay further with integrated solutions designed to streamline operations and personalize every guest interaction.

Power faster checkout with connected payments.

Simplify payments across every stay.
