One-of-a-Kind Camelback Resort Delights Guests while Going Green

Sustainable luxury was long considered a contradiction until recent shifts in the hospitality industry took green resorts from niche to necessary. Camelback Resort is one such property, with a year-round ski-in, ski-out hotel offering 453 spacious suites in 24 luxurious styles.

As an effective way to reduce their carbon footprint, digital guest service has become important to resorts like Camelback that prioritize sustainability, alongside exceptional guest service.

"Going green is an important initiative at Camelback Resort and DataMagine helps us to be paperless at our check-in process, waiver process and also during our check-out process with paperless folios," said Rocco Baldassari, Director of Operations at Camelback Resorts. *"Our mission at Camelback Resort is for our guests to leave with great memories and great experiences. Agilysys products help make that happen."*

The beautiful property is dedicated to delivering exceptional guest experiences with a wide variety of outdoor activities such as skiing, snowboarding, zip-lining and the largest snow tubing park in the country. Camelback Resort has been using Agilysys software products since their hotel opened. Selected for its fully-integrated hospitality solutions, Agilysys' technology helps the resort staff operate more productively, with less downtime.

While Camelback has several Agilysys solutions, using DataMagine to digitally manage their guest folios has helped streamline their internal work flows while delighting guests. DataMagine has a broad set of touch-points and integrations with all Agilysys solutions, ensuring a seamless operation while promoting environmental stewardship.

> **" Using the Agilysys suite for the last three years we have found the performance is outstanding. "**

ABOUT AGILYSYS

Agilysys is a leading technology company that provides innovative software and services for point-of-sale (POS), property management (PMS), reservation and table management, inventory and procurement, workforce management, analytics, document management, and mobile and wireless solutions exclusively to the hospitality industry. Our products and services allow operators to streamline operations, improve efficiency and understand customer needs across their properties to deliver a superior overall guest experience. The result is improved guest loyalty, growth in wallet share and increased revenue as they connect and transact with their guests based upon a single integrated view of individual preferences and interactions. We serve four major market sectors: Gaming, both corporate and tribal; Hotels, Resorts and Cruise; Corporate Foodservice Management; and Restaurants, Universities, Stadia and Healthcare.
