AGILYSYS, INC.

(Exact name of Registrant as specified in its Charter)

Delaware
(State or other jurisdiction of
incorporation or organization)
3655 Brookside Parkway, Suite 300
Alpharetta, Georgia
(Address of principal executive offices)

34-0907152
(I.R.S. Employer
Identification No.)

30022
(Zip Code)

Registrant's telephone number, including area code: (770) 810-7800

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, without par value	AGYS	Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. YES NO

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-Accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
Emerging growth company	<input type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

The aggregate market value of Common Shares held by non-affiliates as of September 30, 2025, was \$2,328,842,858.

The number of shares of Registrant's Common Stock outstanding as of May 8, 2026 was 28,166,629.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive Proxy Statement to be used in connection with its 2026 Annual Meeting of Shareholders will be incorporated by reference into Part III of this Annual Report on Form 10-K. Such Proxy Statement, or an amendment to this Report, will be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year to which this Report relates.

Forward Looking Information

This Annual Report and other publicly available documents, including the documents incorporated herein and therein by reference, contain, and our officers and representatives may from time to time make, “forward-looking statements” within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. These statements include, but are not limited to, statements related to our current expectations, the performance of our business, our financial results, our liquidity and capital resources and other non-historical statements. Forward-looking statements can be identified by words such as: “anticipate,” “intend,” “plan,” “goal,” “seek,” “believe,” “project,” “outlook,” “forecast,” “preliminary,” “estimate,” “expect,” “strategy,” “future,” “likely,” “may,” “would,” “could,” “should,” “will” and similar references to future periods. Forward-looking statements are neither historical facts nor assurances of future performance. Instead, they are based only on our current beliefs, expectations and assumptions regarding the future of our business, future plans and strategies, projections, anticipated events and trends, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict, and in many cases, are outside of our control. Our actual results and financial condition may differ materially from those indicated herein and in other filings and statements. Therefore, you should not rely on any of these forward-looking statements. Important factors that could cause our actual results and financial condition to differ materially from those indicated in the forward-looking statements include, among others, our ability to achieve operational efficiencies and meet customer demand for products and services as well as the other risks identified in the risk factors set forth in Item 1A of this Annual Report. Any forward-looking statement made by us in this Annual Report is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statement made in this Annual Report or any other forward-looking statement that may be made from time to time, whether written or oral, whether as a result of new information, future events, or otherwise.

Part I

Item 1. Business.

Overview

Agilysys has been a leader in hospitality software for more than 45 years, delivering innovative cloud-native SaaS and on-premise solutions for hotels, multi-amenity resorts, cruise lines, casinos, corporate foodservice management, restaurants, universities, stadiums, and healthcare facilities. The Company's software solutions include point-of-sale (POS), property management (PMS), inventory and procurement, payments, and related applications that manage and enhance the entire guest journey. Agilysys is also known for its world-class customer-centric service. Many of the top hospitality companies around the world use Agilysys solutions to improve guest loyalty, drive revenue growth, and increase operational efficiencies. Agilysys operates across the Americas, Europe, the Middle East, Africa, Asia-Pacific, and India with headquarters located in Alpharetta, GA.

The Company has one reportable segment serving the global hospitality industry.

Our principal executive offices are located at 3655 Brookside Parkway, Suite 300, Alpharetta, Georgia, 30022.

Reference herein to any particular year or quarter refers to periods within our fiscal year ended March 31. For example, fiscal 2026 refers to the fiscal year ended March 31, 2026.

History and Significant Events

Organized in 1963 as Pioneer-Standard Electronics, Inc., an Ohio corporation, we began operations as a distributor of electronic components and, later, enterprise computer solutions. Exiting the former business in fiscal 2003 with the sale of our Industrial Electronic Division, we used the proceeds to reduce debt and fund growth of our enterprise solutions business. This included acquiring businesses focused on higher-margin and more specialized solutions for the hospitality and retail industries. At the same time, we changed our name to Agilysys, Inc.

In fiscal 2004, we acquired Inter-American Data, Inc., which allowed us to become the leading developer and provider of technology solutions for hotel property management and inventory management in the casino and resort industries.

In fiscal 2007, we exited the enterprise computer distribution business. We used the proceeds from that sale to return cash to shareholders and fund a number of acquisitions that broadened our solutions and capabilities portfolios. We acquired InfoGenesis, Inc., Visual One Systems Corp. and Eatec Corporation in fiscal 2008, significantly expanding our specialized offerings to the hospitality industry through enterprise-class POS, PMS and inventory and procurement software solutions tailored for a variety of applications in cruise, golf, spa, gaming, lodging, resort and catering. These offerings feature highly intuitive, secure and robust solutions, easily scalable across multiple departments and/or property locations.

In fiscal 2012, we sold our IT solutions business and restructured our business model to focus on higher-margin, profitable growth opportunities in the hospitality and retail sectors. We also reduced our real-estate footprint and lowered overhead costs by relocating corporate services from Solon, Ohio to Alpharetta, Georgia, thus moving our senior management team closer to our remaining operating units.

In fiscal 2014, we sold our retail solutions and services business to Kyros Solutions, Inc. (Kyros), an affiliate of Clearlake Capital Group, L.P. Following completion of the transaction, our business focused exclusively on hospitality solutions and the growth opportunities in the hospitality market.

In fiscal 2018, we opened a software development center in Chennai, India, to supplement our product development efforts.

We converted to a Delaware corporation in February 2022.

Today, we are focused on providing state-of-the-art, end-to-end solutions that enhance guest and staff experiences and assist our customers in promoting their brands. We help our customers win the guest recruitment battle and, in turn, grow revenue, reduce costs and increase efficiency. This is accomplished by developing and deploying innovative solutions that increase data speed and accuracy, integrate with other enterprise systems and create a common infrastructure for managing guest data thereby enabling more effective management, intelligent upselling, reduced shrinkage, improved brand recognition and better control of the guest relationship.

Our strategy is to increase the proportion of revenue we derive from subscription services, cloud applications, ongoing support and maintenance agreements, and professional services.

Products, Support and Professional Services

We are a leading developer and marketer of software-enabled solutions and services to the hospitality industry, including software solutions fully integrated with third party hardware and operating systems; subscription and maintenance; and professional services. Areas of specialization are point of sale, property management, and a broad range of solutions that support the ecosystem of these core solutions.

We present revenue and costs of goods sold in three categories:

- Products
- Subscription and maintenance
- Professional services

Total revenue for these three specific areas is as follows:

(In thousands)	Year Ended March 31,		
	2026	2025	2024
Products	\$ 41,168	\$ 41,324	\$ 49,083
Subscription and maintenance	205,941	170,051	138,069
Professional services	72,203	64,249	50,312
Total	\$ 319,312	\$ 275,624	\$ 237,464

Products: Products revenue is comprised of revenue from the sale of software along with third party hardware and operating systems. Software sales include up front revenue for licensing our solutions on a perpetual basis. Software sales are driven by our solutions’ ability to help customers meet the demands of their guests and improve operating efficiencies. Our software revenue is also driven by the ability of our customers to configure our solutions for their specific needs and the robust catalog of integrations we offer to third party solutions. Our software solutions require varying form factors of third party hardware and operating systems to operate, such as staff facing terminals, kiosk solutions, mobile tablets or servers. Third party hardware and operating system revenue is typically driven by new customer wins and existing customer hardware refresh purchases.

Subscription and Maintenance: Software subscription and maintenance services are a significant portion of our consolidated revenue and typically generate higher profit margins than products revenue. Growth has been driven by a strategic focus on developing and promoting end-to-end solutions while market demand for innovative new products addressing specific hospitality needs continues to reinforce this trend. Our commitment to exceptional service has enabled us to become a trusted partner with customers who wish to optimize the level of service they provide to their guests and maximize commerce opportunities both on premise and in the cloud.

Professional Services: We have industry-leading expertise in designing, implementing, integrating and installing customized solutions into both traditional and newly created platforms. For existing enterprises, we seamlessly integrate new systems and for start-ups and fast-growing customers, we become a partner that can manage large-scale rollouts and tight construction schedules. Our extensive experience ranges from staging equipment to phased rollouts as well as training staff to provide operational expertise to help achieve maximum effectiveness and efficiencies in a manner that saves our customers time and money.

Our portfolio of hospitality software solutions:

The hospitality industry operates as an end-to-end business that spans guest engagement, on-property operations, and back-of-house functions. Historically, however, technology providers have delivered fragmented, product-centric solutions that require operators to manage multiple systems, integrations, and vendors. To better align with how hospitality businesses actually operate, we focus on delivering an integrated, cloud-based technology platform that supports Hospitality & Leisure, Food & Beverage, and Inventory & Procurement functions within a unified environment.

Our software platform brings together core operational systems, including property management (PMS), point of sale (POS), and inventory and procurement, on a shared data foundation. This approach enables hospitality operators to manage the complete guest and employee journey more effectively. The platform is designed to be modular, allowing customers to deploy and expand functionality across areas such as digital access, mobility, self-service, personalized offers, payments, service workflows, and analytics as their business needs evolve, without adding unnecessary complexity.

Increasingly, our platform incorporates advanced data and artificial intelligence capabilities that support more informed decision-making and more personalized hospitality experiences. These capabilities apply analytics, machine learning, and automation across operational and guest data to help customers better understand guest preferences, optimize pricing and inventory decisions, improve labor efficiency, and identify opportunities to increase revenue and profitability while maintaining high service standards.

Through this integrated platform approach, customers seek to maximize revenue per available guest by delivering hospitality interactions that are both personal and profitable. Over time, this supports improved guest satisfaction and loyalty, increased wallet share, stronger employee retention, and improved operating margins across a wide range of hospitality environments.

Food & Beverage (F&B) Ecosystem Solutions:

Agilysys Food & Beverage Ecosystem solutions allow customers to provide their guests with an omni-channel experience within their property. Offering flexibility, guests can choose to create their own experience through mobile or kiosk ordering, or opt for more traditional service by interacting with staff like cashiers, bartenders, and servers. Irrespective of the channel of interaction for the guest, our POS suite provides a single integrated enterprise-grade back-office management system with robust reporting capabilities. This allows our customers to manage menus, price changes, purchasing trends, inventory and sales reporting from a single integrated source providing for increased efficiency as well as providing a richer guest profile.

InfoGenesis

Agilysys InfoGenesis® POS is a core F&B solution. This award-winning point of sale solution offers a fast, intuitive, and highly customizable terminal application, paired with powerful and flexible back-office reporting and configuration. The system is easy to set up, and its scalable architecture enables customers to add workstations without having to build out expensive infrastructure. InfoGenesis supports a wide range of POS devices from traditional POS terminals to iPads, Android tablets and mobile phones, allowing customers to seamlessly deploy a mix of POS experiences based upon guest and server requirements. The system's detailed and high-quality reporting capabilities provide insight into sales data and guest purchasing trends. Engineered for all regions of the world, the InfoGenesis POS solution suite offers a multinational set of features, including language, currency and local fiscal reporting, coupled with a robust enterprise management capability enabling the largest global customers to efficiently run their businesses. With a foundation platform of modern integration APIs, the solution is also capable of integrating with a variety of ancillary applications allowing our customers to seamlessly run their entire suite of technology products. InfoGenesis POS is available as a cloud-based or on-premises solution.

IG Kiosk

Agilysys IG Kiosk™ is an enterprise-class self-service, customer-facing kiosk point of sale F&B solution for the hospitality industry. It is ideal for food & beverage venues such as buffets, grab 'n go, corporate cafeterias and food courts. Its flexibility supports a variety of operational workflows, such as “order and pay”, “order only”, “pay at cashier” and “self-check-out,” and integrates with a variety of property management, casino management and loyalty systems.

Agilysys IG Kiosk's intuitive guest-facing order and pay experiences transfer the control and convenience to the end user. The self-service components reduce on-site labor needed to manage venue operations, while improving guest throughput, check size, order accuracy, guest experience and satisfaction. The platform-driven and cloud-based solution allows for easy deployments and management at scale resulting in a lowered overall cost of ownership.

IG KDS

Agilysys IG KDS™ is a digital kitchen management solution that integrates with the entire point of sale ecosystem of solutions to deliver staff and customer-originated orders to the kitchen for preparation. Custom attributes such as guest phone number, name, guest location or packaging instructions can be provided on each incoming order so the order can be fulfilled promptly to guests. Guests can optionally be notified of order completion via an order status monitor (OSM) or via text message.

IG OnDemand

Agilysys IG OnDemand™ provides a visual, interactive food and beverage ordering experience to any mobile device – phone, tablet, or laptop – with a browser-based self-service experience. Using a simple, intuitive interface, guests can easily order and reorder from anywhere across the property, driving order velocity and volume. It also can meet the need for a tableside order and pay experience. It supports ordering for multiple guests at a table over the course of a meal using their own devices making the ordering process contactless while freeing up staff to spend more time with guests.

Agilysys IG OnDemand allows our customers to immediately offer an online ordering platform that is natively integrated with their physical location operations. Menus and price updates can be done in one place and automatically updated across all channels – online web store, digital menus and app ordering as well as POS terminals. Orders placed online are routed automatically to the appropriate kitchen for preparation. Orders placed from all channels are automatically available on the POS terminal at the physical location.

IG Fly

Agilysys IG Fly™ is a mobile handheld all-in-one POS solution™ that empowers staff to do it all on one device: table-side, pool-side, popup-side, wherever-side, keeping guests happy and servers hustling. It allows properties to boost guest spending with sleek handheld devices that facilitate order placement and payment acceptance without servers ever leaving guests. Servers are readily available to satisfy each guest's immediate requests while providing faster service.

IG Quick Pay

Agilysys IG Quick Pay™ allows guests to use their own mobile device, scan a QR code on the InfoGenesis check, review a digital copy of the check, add a tip & initiate payment, maintaining a fully contactless guest payment experience. The product can be sold as a standalone payment solution or can be bundled with IG OnDemand for a complete order and pay experience.

IG Smart Menu

Agilysys IG Smart Menu™ provides a contactless menu display on a guest's own mobile device - phone, tablet, or laptop. Simply scan a QR code to access a venue menu that is linked directly to the actual items available in the IG OnDemand system, not a pdf or a website link. The product can be sold as a standalone menu solution or can be bundled with IG OnDemand for a complete menu, order and pay experience.

IG Digital Menu Board

Agilysys IG Digital Menu Board™ provides large screen menu and image display on commercial television monitors. It will display a venue menu that is linked directly to the actual items available in the IG OnDemand system, not a pdf or a website link, so it can easily reflect the latest items and pricing.

IG PanOptic Kiosk

Agilysys IG PanOptic™ kiosk revolutionizes the guest experience. When a guest places multiple food and beverage items on a tray, advanced computer vision and proprietary machine learning instantly recognize the entire selection, populating the digital cart in a single, seamless moment.

Pay

Agilysys Pay™ payment processing solution is our innovative payment gateway. Agilysys Pay protects guests' financial data and reduces risk by leveraging point-to-point encryption (P2PE) and tokenization with every credit card transaction. Agilysys Pay Complete is one of the first payment gateways in the world to receive official PCI-P2PE validation, allowing us to offer Payment Card Industry cost and scope reduction that other providers cannot. These security benefits are built on top of a full-featured, enterprise-grade gateway that offers broad support for U.S., Canadian, European and certain Asian countries' credit card processors and a wide variety of payment device options for every use-case, including countertop, pay-at-table, EMV, mobile tablet, and signature capture scenarios.

Agilysys Pay offers contactless payment options in all markets as well as supporting various wallet payment options like Apple Pay®, Google Pay®, AliPay®, and WeChat®.

eCash

Agilysys eCash™ delivers the convenience of a seamless cashless experience for guests while streamlining internal operations. The solution allows operators to establish custom charge accounts for members, employees, students, complimentary programs, or any user-defined category. Backed by a centralized database for efficient, real-time transaction processing, eCash offers robust configuration options and flexible account parameters to ensure effortless management across the entire enterprise.

Gift Card

Agilysys Gift Card™ is a flexible, user-friendly solution that makes managing gift cards effortless. The platform handles everything from adding and checking balances to enabling cross-outlet redemption, giving guests a seamless purchasing experience throughout the entire property.

Analyze

Agilysys Analyze™ is a cloud-based data analytic platform focused on the needs of the hospitality industry. It is a full business intelligence solution that collects data from Agilysys point of sale and property management solutions and helps food & beverage and property operators gain critical insight into business operations and performance. Out-of-the-box analysis helps hospitality operators manage costs, minimize loss due to fraud, boost item sales, increase server productivity, occupancy, room revenue, and other profit enhancing capabilities.

Hospitality & Leisure (H&L) Ecosystem Solutions:

Agilysys offers the most comprehensive suite of hospitality & leisure applications to serve the needs of our integrated resort and hospitality customers. Our solutions enable our customers to provide a seamless experience to their guests while driving operational efficiencies throughout the value chain. Our H&L suite of applications consists of the core property management system (PMS), and experience enhancers including a commission-free booking engine, self-service check in and check out solutions, spa, golf, retail, sales & catering, service request optimization and residence management applications.

LMS

Agilysys LMS® is a core H&L solution. An on-premise or hosted, web and mobile-enabled, PMS solution targeting the operator with large, complex operations. It runs 24/7 to automate every aspect of hotel operations in properties from 100 to

over 7,000 rooms, and has interfaces to a wide array of industry applications including but not limited to all core casino management systems and leading global distribution systems. Its foundation expands to incorporate modules for activities scheduling, attraction ticketing and more.

Versa

Agilysys Versa® PMS is a core H&L solution. It is installed in hotels and multi-amenity resorts ranging from 50-1,500 rooms. It is a complete hospitality solution expanding beyond traditional PMS solutions, enabling the resort to run its end-to-end operations, including front desk, housekeeping, maintenance, accounting, and condo owner management, with tight integration to Agilysys Sales & Catering, Spa, Golf, and Reserve. Versa provides an integrated solution with interfaces to leading global distribution systems, casino management systems, hospitality automation and our other products.

Stay

Agilysys Stay™ PMS is a core H&L solution. It is our cloud-native SaaS property management system that optimizes operational efficiency, increases revenue and enhances guest service. Agilysys Stay is currently generally available for all hotels and chains, as well as for select service casino hotels. Agilysys Stay offers powerful capabilities for multi-property operations, allowing managers to view guest profiles, history and reservations, as well as room availability and operational reports, seamlessly across multiple properties.

Focused on improving revenue and streamlining operations, Agilysys Stay is designed to enable hotels to gather and analyze guest information across properties that can be used to create loyalty-generating offers to guests and increase our customer wallet share. In addition, running natively in a browser on both desktop and tablet devices, it delivers real-time operating metrics so that hotels can more accurately forecast demand and scale guest services accordingly.

Book

Agilysys Book™ is a commission-free, easy-to-use reservation system that's designed to move guests effortlessly through the booking process of hotel rooms, spa appointments and golf tee times for a single guest itinerary. The solution allows booking of one or more rooms and is seamlessly connected with our core PMS solutions to provide a flawless experience for guests and hotel operators. Agilysys Book is the only booking engine in the market that seamlessly integrates with the core primary gaming system and allows for casino operators to enable their patrons to self-book their entitlements resulting in increased guest satisfaction and reduced operational expenses. The solution also allows operators to capture increased revenue through add-ons and upsells of premium rooms.

Express Kiosk

Agilysys Express Kiosk™ streamlines hotel check-in and check-out, improving both staff efficiency and the guest experience. By offering a user-friendly self-service option in the lobby, guests can bypass the front desk, leading to faster service and enhanced convenience without requiring additional front-line staff. The kiosk also includes ID verification to help hotels efficiently maintain security standards.

Express Mobile

Agilysys Express Mobile™ simplifies check-in and check-out even further and at the same time allows operators to offer mobile keys, concurrent dining reservations or room upsells, all on a personal mobile device such as a smart phone or tablet. Properties are turning to mobility at an ever-increasing pace to improve efficiency. With Agilysys Express Mobile, it's easy to reduce wait times and empower guests by putting the power of choice in the palm of their hand. Agilysys Express Mobile allows for digital ID verification before securely delivering the digital room key to the guest phone, allowing operators to maintain security standards while allowing the guest to bypass the front desk.

Book4Time

Agilysys Book4Time™ is a cloud-based spa and wellness management platform that unifies scheduling, payments, memberships, inventory, and analytics in a single, easy-to-use system. It streamlines operations and eliminates manual processes so staff can focus on delivering personalized, seamless guest experiences. With built-in mobile booking, revenue optimization tools, and enterprise scalability, Book4Time helps brands increase per-guest spend, improve profitability, and deliver consistent wellness experiences across properties.

Spa

Agilysys Spa™ covers all aspects of running a spa, from scheduling guests for services to managing staff schedules. With this guest-centric technology, spas have more time to focus on creating personalized experiences in places of quiet tranquility. Agilysys Spa is a single solution that connects effortlessly to our other software solutions. The solution includes real-time integration, simplifies the appointment booking process, enhances the guest experience, and maximizes the value of the spa as a revenue center.

Integrated with our booking engine, Agilysys Book, customers can book both their hotel room and their spa appointments from a single place, giving operators additional opportunities to upsell and cross sell various amenities that they offer.

Golf

Agilysys Golf™ is guest centric golf management software that offers golf property managers complete pro shop management with tee time scheduling, member profile/billing, tournament management and Web and e-mail access bundled into one solution. Customers are given the option of using our robust built in retail POS module or they may choose to leverage the power of InfoGenesis. Staff can easily schedule and personalize reservations for guests, which then appear on itineraries, confirmations, and folios. Resort operations with multiple amenities can integrate with Agilysys Book and allow patrons to book both their resort reservation and their golf tee time simultaneously.

Sales & Catering

Agilysys Sales & Catering™ provides a cloud-native comprehensive sales & event management system that provides powerful tools for hotels, conference centers and resorts of all sizes. With a complete view of every group and event, as well as individual guests throughout their entire stay, the system analyzes the value of each guest and group across meeting and shoulder dates. The result is improved event revenue opportunities and streamlined management, enabling event planners and sales teams to more efficiently sell, manage and service their clients.

Service

Agilysys Service™ is our integrated service optimization platform that allows our customers to provide an integrated hospitality experience for their guests while driving greater operational efficiency by connecting departments across the hotel, including the front desk, house-keeping, concierge, maintenance, bell desk, food runners, wait staff, etc. The Agilysys Service platform provides a unified communication and messaging service for guest and staff interaction as well as internal staff interaction. Apart from providing the functionality for managing back of house operations like house-keeping, engineering and maintenance, the Agilysys service platform proactively tracks events and exceptions that take place in the hotel or resort and drive targeted action to ensure a high level of guest satisfaction at all times.

Authorize

Agilysys Authorize™ provides support for fully-automated and secure online payments for room deposits, 3rd party guarantees and folio charges while eliminating the need for manual credit card authorization forms. Payment is seamlessly authorized and posted appropriately in real-time.

DataMagine

Agilysys DataMagine® document management solution is a U.S.-patented imaging module and archiving solution that allows users to securely capture and retrieve documents and system-generated information. DataMagine integrates with other Agilysys products, adding functionality and providing seamless workflows to cross functional areas. DataMagine helps

drive the Go Green initiative at a number of our customer sites by enabling a completely paperless experience through all facets of the customer's operations, from signature capture at the front desk to automated routing of POs and requisition orders for approvals. DataMagine provides robust indexing and archiving features to allow easy contextual based document retrieval.

Reserve

Agilysys Reserve™ solution is a guest-centric reservation and wait list management solution that helps operators book various venues and experiences. The solution allows operators to manage restaurant, cabana and auditorium reservations. With an innovative doll house view approach, patrons have the ability to select and book a specific seat in a restaurant or auditorium or a specific cabana on a pool deck online. With built-in price yielding capabilities, Agilysys Reserve allows operators to maximize revenue opportunities for various locations. Using the built-in guest management system, operators can build guest profiles and provide a superior experience while driving repeat guests.

Digital Marketing

Agilysys Digital Marketing™ provides a flexible hospitality marketing automation solution supporting guest email and SMS marketing communications through event and campaign-based rules. Marketers can segment guests by type or other criteria and send context-related communications at time of reservation, check-in, check-out or by marketing campaign types. Digital email campaigns allow users an inexpensive way to stay connected to their guest throughout the guest journey. The result is increased return visits and improved revenue from targeted offers based upon guest segment and journey stage.

Retail

Agilysys Retail™ is our basic POS solution to support retail item sales in spas, gift shops or pro-shops that don't need a full enterprise POS system. The system allows you to easily setup and track inventory, sell items in conjunction with other services, and consolidate all charges on the guest folio.

Central Reservations

Agilysys Central Reservations™ provides a single sign-on across multiple customer properties that allows staff to view guest profiles, trips, room availability across properties, make/modify/transfer reservations, scan property offers and rates, and more. The result is improved central reservations efficiency, increased revenue from cross-property sales and upsells, and superior guest service.

Loyalty & Promotions

Agilysys Loyalty & Promotions™ provides a comprehensive loyalty and promotions management solution to help operators track guest preferences and craft a wide variety of programs and targeted offers. This solution supports point earning and redemption at every guest interaction and provides a guest portal for self-service account management. This solution helps our customers understand and leverage guest preferences for tailored promotions and offers, which drive repeat visits and a larger share of their wallet.

Membership

Agilysys Membership™ helps customers control membership programs by defining membership types, facilitating online registration, and managing membership balances, among other things. Whether customers manage memberships for individuals, families, groups, corporate accounts or all of these, they define the parameters for each category. The membership portal allows easy online registrations for new guests and gives guests the ability to check their balances and redeem points via gift cards, eCash, loyalty, and more.

Residence Management

Agilysys Residence Management™ delivers a comprehensive approach to managing residences. Key features include detailed reports for analyzing profitability and unit-specific expenses, as well as robust tools for managing revenue allocations and splitting expenses across owners, the association, and the property.

Guest App

Agilysys Guest App™ is a downloadable customer-branded mobile guest engagement app that provides a frictionless guest experience from booking to check-out. It combines a selection of Agilysys mobile applications in a single convenient app, including Agilysys Book for room, golf and spa reservations; Agilysys Express Mobile for mobile check in/out and digital room keys; and an administrative portal that provides a full content management system for complete control of branding, options, property images and more. It is available for iOS and Android mobile devices.

Inventory & Procurement Ecosystem Solutions:

Eatec

Agilysys' Eatec® solution provides core purchasing, inventory, recipe, forecasting, production and sales analysis functions and is unique in offering catering, restaurant, buffet management and nutrition modules in a single web-enabled solution. Agilysys' Eatec Mobile is an optional app that can be downloaded from Google Play and Apple app stores and provides users with access to Eatec application from any Android® and iOS® device. Users can provide inventory receiving and transfer operations seamlessly from any mobile device even when they are offline using Eatec's innovative store and forward capabilities.

SWS

Agilysys Stratton Warren System™ (SWS) integrates with all leading financial and POS software products. The software manages the entire procurement process via e-commerce, from business development to the management of enterprise-wide backend systems and daily operations. Agilysys SWS Direct is an add-on module for SWS that provides a convenient, efficient and intuitive shopping cart experience to SWS users. SWS Direct streamlines operations, provides enhanced bidding and request for pricing services, and offers supplier registration tools and self-service maintenance capabilities.

Representative Agilysys clients include:

7 Cedars Casino	Golden Nugget Lake Charles	Resorts World Bimini
AVI Foodsystems, Inc.	Grand Sierra Resort and Casino	Rosen Hotels & Resorts
Boyd Gaming Corporation	Hialeah Park	Rosewood Castiglion Del Bosco
Caesars Entertainment	Hilton Worldwide	Royal Caribbean Group
Carnival UK	Inspire Resort Korea	Spooky Nook Sports
Cartoon Network Hotel	Intercontinental Hotel Group	Station Casinos
Casino del Sol Resort	Kimpton Hotels	The Kessler Collection
Catholic Charities	Marina Bay Sands Singapore	The Sea Pines Resort
Chukchansi Gold Resort & Casino	Marriott International	The Venetian Resort Hotel Casino

The Cosmopolitan of Las Vegas	Oxford Casino	Vail Resorts
Dickies Arena	Pinehurst Resort	Valley View Casino & Hotel
Drury Hotels	Prairie Band Casino & Resort	Wendover Resorts
Ellis Island Hotel, Casino and Brewery		

Industry and Markets

We are a technology software solutions company exclusively focused on the hospitality industry. Our products have been enabling mission-critical core hospitality operations for more than four decades. Our software solutions are essential for running the operations of the hospitality business and are designed to drive substantial customer benefits through increased revenue, improved operational efficiency, enhanced guest experience and improved employee morale. In addition, many of our solutions offer mobility options, providing customers operational flexibility. Our innovative software solutions described above have been purpose-built to serve the unique needs of the following hospitality verticals: casinos,

hotels, multi-amenity resorts, cruise ships, managed foodservice providers, sports and entertainment, and healthcare. We operate across the Americas, Europe, the Middle East, Africa, Asia-Pacific, and India with headquarters located in Alpharetta, GA.

We estimate our total addressable market is approximately \$16 billion in annual recurring revenue. While the size of the opportunity might face pressure in an economic downturn, we believe it remains in the billions of dollars while our business represents only a fraction of that size. We believe we are well positioned to win market share given our relative competitive strength in the industry.

Customers

Our customer base is highly fragmented and includes large, medium-sized and boutique hospitality providers, both owned and franchised, as well as divisions or departments of large corporations in the hospitality industry. We concentrate on serving the needs of customers in a range of settings where brand differentiation is important, and competition for guest recruitment is intense.

Products and Services Backlog

Backlog includes orders confirmed for products scheduled to be shipped, as well as certain professional and software subscription and maintenance services to be provided. Although we believe that the orders included in the backlog are firm commitments, we may allow some orders to be canceled by the customer without penalty. Even when penalties for cancellation are provided for in a customer contract, we may elect to permit cancellation of orders without penalty where we believe it is in our best interest to do so. Therefore, we do not believe that our backlog, as of any particular date, is necessarily indicative of revenue for any future period. However, backlog is included as a component of our remaining performance obligation to the extent we determine that the orders are non-cancelable. Refer to Note 3, *Revenue Recognition*, to our consolidated financial statements included under Part II, Item 8 of this annual report for additional information on remaining performance obligations.

Human Capital

As of March 31, 2026, we employed approximately 2,413 employees, with approximately 70%, 26%, 3%, and 1% of our employees located in India, North America, Asia-Pacific, and EMEA, respectively. We recognize our employees as our greatest asset, and their well-being and growth are critical investments in our continued success.

Our senior management team is responsible for developing and executing our human capital strategy. Agilysys' key human capital management objectives are to attract, retain and develop talent to deliver on our business strategy. Accordingly, we seek employees who share a passion for technology and its ability to improve our customers' hospitality businesses in accordance with our mission statement: helping our customers improve employee and guest experiences, with dedication to past, present and future customer investments in our products and services.

We believe that our culture is essential to maintaining high quality services and solutions. Our culture impacts the quality of the employees we hire, the way we develop and maintain solutions, and the way we communicate and interact with our customers and each other. Our culture is the cornerstone representing our values, our behaviors, our way of working and how we approach our business. To reinforce our culture, we operate according to the Agilysys Code of Business Conduct, available on our website <http://www.agilysys.com>, which mandates full compliance with applicable laws and regulations and helps to preserve the integrity of our Company.

We believe we offer fair, competitive compensation and benefits that support our employees' overall well-being and foster their growth and development. We offer our employees pay and benefits packages that we believe are competitive with others throughout our industry, as well as within the local markets in which we operate, and align individual performance with our success.

Our employee town hall meetings, conducted several times annually, play a vital role in fostering transparency, engagement, alignment, and a sense of community. These town halls provide a platform to recognize and celebrate employee achievements, milestones, and contributions, and provide an opportunity for employees to ask questions of leadership.

We are committed to providing our employees with an environment free of discrimination, harassment and workplace violence. We make all benefit and employment-related decisions in compliance with equal employment opportunity

statutes and without regard to religion, national origin, age, gender, race, color, ancestry, sexual orientation, disability, marital status, citizenship, pregnancy, medical condition or any other protected class status, as defined by local, state or federal laws. All employees, directors, independent contractors, and other parties who work with Agilysys are expected to create a working environment where everyone is respected, regardless of individual differences. We believe that each of our employees' individual experiences, character, and virtues enhance our culture and will increase our ability to attract and retain quality employees, customers, and suppliers.

Seasonality

Occasionally, the timing of large one-time orders, such as those associated with significant remarketed product sales around large customer refresh cycles or significant volume rollouts, creates variability in our quarterly results.

Intellectual Property

We rely on a combination of patent, trade secret, copyright, and trademark laws, a variety of contractual arrangements, such as license agreements, assignment agreements, confidentiality and non-disclosure agreements, and confidentiality procedures and technical measures to gain rights to and protect the intellectual property used in our business.

We do not believe that our business is dependent on any single item of intellectual property, or that any single item of intellectual property is material to the operation of our business. However, since we consider trademarks to be a valuable asset of our business, we have an ongoing trademark and service mark registration program pursuant to which we register our brand names and product names, taglines, and logos in the United States and other countries to the extent we determine registration to be appropriate and cost effective.

We intend to pursue additional intellectual property protection to the extent we believe it would be beneficial and cost effective. Despite our efforts to protect our intellectual property rights, they may not be respected in the future or may be invalidated, circumvented, or challenged. See the sections titled "Risk Factors," including the section titled "Risk Factors — We may not be able to enforce or protect our intellectual property rights" for a description of the risks related to our intellectual property.

Competition

Our solutions face a highly competitive market. Competition exists with respect to developing and maintaining relationships with customers, pricing for products and solutions, and customer support and service.

We compete with other full-service providers who sell and deliver bundled POS and PMS solutions comprised of software, hardware, subscription, maintenance, and professional services. These companies, some of which are much larger than we are, include Oracle Corp., Shiji and Infor. We also compete with smaller software companies which provide either POS or PMS solutions like Maestro. In addition, we compete with PMS systems that are designed and maintained in-house by large hotel chains.

Environmental Matters

We believe we are compliant in all material respects with all applicable environmental laws. We do not anticipate that such compliance will have a material effect on capital expenditures, earnings or competitive position with respect to any of our operations. For information about environmental regulations applicable to our business, refer to Item 1A Risk Factors.

Access to Information

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports are available free of charge through our corporate website, <http://www.agilysys.com>, as soon as reasonably practicable after such material is electronically filed with, or furnished to, the Securities and Exchange Commission (SEC). Copies are also available without charge by a written request to Agilysys, Inc., Attention: Investor Relations, 3655 Brookside Parkway, Suite 300, Alpharetta, Georgia 30022 or by requesting copies through our website, under "Investor Relations." The information posted on our website is not incorporated into this Annual Report. Reports, proxy and information statements, and other information regarding issuers that file electronically, are maintained on the SEC website, <http://www.sec.gov>.

Item 1A. Risk Factors.

Risks Relating to Our Business Markets, Competition, and Operations

Our business is impacted by changes in macroeconomic and global conditions.

Because we conduct our business internationally, changes in global, national, or regional economies, governmental policies (including in areas such as tariffs, trade relations, travel, immigration, healthcare, and related issues), political unrest, armed conflicts, natural disasters, or disease outbreaks may impact our business. Any general weakening of, and related declining corporate confidence in, the global economy or the curtailment in corporate spending could cause current or potential customers to reduce or eliminate their information technology budgets and spending, which could cause customers to delay, decrease or cancel purchases of our products and services; cause customers not to pay us; or to delay payment for previously purchased products and services.

Our business, markets, growth prospects and business model may be impacted or altered by decreases in travel and leisure activities resulting from weak economic conditions, increases in energy prices and changes in tariffs and currency values, political instability, heightened travel security measures, travel advisories, disruptions in air travel, and concerns over disease and/or pandemics, violence, war, terrorism, and/or other wide-ranging and sustained events.

Our future success will depend on our ability to develop new solutions, product upgrades and services that achieve market acceptance.

Our business is characterized by rapid and continual changes in technology and evolving industry standards. We believe that in order to remain competitive in the future we need to continue to develop new products, product upgrades and services, requiring the investment of significant financial resources. If we fail to accurately anticipate our customers' needs and technological trends, or are otherwise unable to complete the development of a product or product upgrade on a timely basis, we will be unable to introduce new products or product upgrades into the market that are demanded by our customers and prospective customers, and our business and operating results would be materially and adversely affected.

The development process for most new products and product upgrades is complicated, involves a significant commitment of time and resources and is subject to a number of risks and challenges including:

- Managing the length of the development cycle for new products and product enhancements;
- Adapting to emerging and evolving industry standards and to technological developments by our competitors and customers; and
- Extending the operation of our products and services to new and evolving platforms, operating systems and hardware products, such as mobile devices.

Our product development activities are costly, and recovering our investment in product development may take a significant amount of time, if it occurs at all. We anticipate continuing to make significant investments in software research and development and related product opportunities because we believe it is necessary to compete successfully.

Our product development activities also could be impacted by competition from products with new features or new technologies, such as artificial intelligence (AI) and/or machine learning, that might render our existing products less competitive or obsolete. We may not respond effectively to the technological requirements of the changing market.

If we are not successful in managing these risks and challenges, or if our new products, product upgrades, and services are not technologically competitive or do not achieve market acceptance, our business and operating results could be adversely affected.

We use AI in our platform and product offerings, and our success is dependent upon our ability to leverage data, develop competitive products, and manage related risks.

We utilize AI solutions both for internal productivity purposes and in products and services available to our customers. We also work with partners who have incorporated or may incorporate AI solutions in their products and services. While AI and machine learning present opportunities for enhanced productivity, AI also introduces cybersecurity, data privacy, IT, intellectual property, regulatory, legal, operational, competitive, reputational and other risks that could adversely impact our business. For example, if the content, recommendations or analyses that AI applications assist in producing are or are alleged to be deficient or inaccurate, or if the data used to train these applications are or are alleged to be deficient or

inaccurate or legally impermissible to train on, we could be subject to competitive risks, potential legal liability, and reputational harm. Furthermore, the integration of third-party AI models, including Large Language Models, within our products and services may rely, in part, on certain safeguards implemented by the third-party developers of the underlying AI models, including those related to the accuracy, bias, and other variables of the data, and these safeguards may be insufficient. In addition, AI may present evolving ethical issues. If our use of AI becomes controversial, we may experience reputational harm or legal liability.

Further, given the early stage of generative AI, the evolving regulatory landscape surrounding AI also poses a risk, as new laws and regulations could impose additional compliance burdens, resulting in increased operational costs to comply with U.S. and non-US laws concerning the use of AI. For example, the EU's Artificial Intelligence Act, or AI Act, originally entered into force on August 1, 2024, and is expected to undergo amendments as introduced in the EU's November 2025 Digital Omnibus. As enacted, the AI Act imposes significant obligations on providers and deployers of high-risk AI systems and encourages providers and deployers of AI systems to account for EU ethical principles in their development and use of these systems.

Likewise, within the United States, the regulatory landscape is rapidly evolving as evidenced by several U.S. states introducing or enacting legislation that is designed to govern the development or use of AI. Our ability to use and offer AI and machine learning solutions may be constrained by current or future laws, regulatory, or self-regulatory requirements. At the federal level, the Trump Administration has endorsed a federal moratorium on the enforcement of state AI laws, including through a December 11, 2025 executive order on "Ensuring a National Policy Framework for Artificial Intelligence." Federal efforts have thus far have not been successful in curtailing state action on AI regulation, which has contributed to an increasingly complicated regulatory landscape. The rapid evolution of AI, including potential additional government regulation of AI and its various uses, may require significant resources for us to implement compliant and ethical AI practices. We may also be subject to significant enforcement actions or litigation in the event of any perceived or actual non-compliance.

The rapid adoption of AI technologies may create an "arms race" dynamic in our industry, in which competitors leverage AI to develop more efficient, automated, or lower-cost alternatives to our offerings or to disrupt traditional subscription-based software models. In addition, AI-enabled tools may bypass or reduce reliance on traditional application-layer workflows, which could diminish the value of our platform and adversely affect demand for our solutions.

We face extensive competition in the markets in which we operate, and our failure to compete effectively could result in price reductions and/or decreased demand for our products and services.

Several companies offer products and services similar to ours. The rapid rate of technological change in the hospitality market makes it likely we will face competition from new products designed by companies not currently competing with us. We believe our competitive ability depends on our product offerings, our experience in the hospitality industry, our product development and systems integration capability, and our customer service organization. There is no assurance, however, that we will be able to compete effectively in the hospitality technology market in the future.

We compete for customers based on several factors, including price. The competitive markets in which we operate may require us to reduce our prices in order to contend with the pricing models of our competitors. If our competitors discount certain products or services, we may have to lower prices on certain products or services in order to attract or retain customers. Any such price modifications would likely reduce margins and could have adverse effects on our profitability. In addition, if we fail to reduce our prices in order to contend with the pricing models of our competitors, we may not be able to retain customers or grow our business, which could adversely affect our revenues and liquidity. Additionally, as we incorporate AI into our products, we must appropriately adjust our pricing to accommodate the rapidly rising cost of AI. If we do not increase our product price successfully, we may not be able to recover our costs, which could adversely affect our revenues and profitability.

Our future success depends on our ability to execute on strategic initiatives, to properly manage investments in our business, and to enhance our existing operations and infrastructure.

Our long-term strategy is focused on continually investing in and growing our business and operations, both organically and through acquisitions.

Investments in new markets, solutions, and technologies, research and development, infrastructure and systems, geographic expansion, and talent are critical components for executing our strategy. In particular, we believe we must continue to dedicate a significant amount of resources to our research and development efforts to maintain our competitive

position. Our investments in research and development may result in products or services that generate less revenue than we anticipate.

Such investments present challenges and risks and may not be successful financially or otherwise, especially in new areas in which we have little or no experience, and even if successful, may negatively impact our short-term profitability. To succeed in such efforts, we must be able to properly deploy financial and other resources, prioritize among opportunities, balance the extent and timing of investments with the associated impact on profitability, balance our focus between new development areas and the servicing of our existing customers, capture efficiencies and economies of scale, and compete in the new areas, or with the new solutions, in which we have invested.

Our success also depends on our ability to effectively and efficiently enhance our existing operations. Our existing infrastructure, systems, security, processes, and personnel may not be adequate for our current or future needs. System upgrades or new implementations can be complex, time-consuming, and expensive and we are not certain that we will not experience problems during or following such implementations, including among others, potential disruptions in our operations or financial reporting.

If we are unable to properly execute on growth initiatives, manage our investments, and enhance our existing operations and infrastructure, our results of operations and market share may be materially adversely affected.

Our dependence on certain suppliers makes us vulnerable to the extent we rely on them.

We rely on a concentrated number of suppliers for the majority of our hardware and for certain software and related service needs. We do not have long term agreements with many of these suppliers. If we can no longer obtain these hardware, software or services from our major suppliers due to mergers, acquisitions or consolidation within the marketplace, material changes in their partner programs, their refusal to continue to supply to us on reasonable terms or at all, and we cannot find suitable replacement suppliers, it may have a material adverse impact on our future operating results and gross margins. Additionally, as we increase our reliance on AI to run our business, we could be vulnerable to price increases from AI providers. If we cannot pass those costs on to our customers, we could face pressure on our gross margins.

If we cannot retain and recruit qualified personnel due to rising labor costs, changes to immigration laws, or other reasons, our ability to operate and grow our business may be impaired and our financial performance may suffer.

We depend on our employees to effectively run and grow our business. To grow successfully, we must retain existing employees and attract new qualified employees, particularly in growth areas we have identified. Employee retention is an industry challenge, especially given the competitive labor market for software developers. As we grow, we must enhance and expand our workforce to execute on new and complex opportunities. The market for qualified personnel is competitive in the geographies in which we operate and may be limited in the software development disciplines we seek to expand. We may be at a disadvantage to larger companies with greater brand recognition or financial resources or to start-ups or other emerging companies in trending market sectors. If we are unable to attract and retain qualified personnel when and where they are needed, our ability to effectively operate and grow our business could be impaired. Moreover, if we are not able to properly balance our investments in personnel with revenue growth, our profitability may be adversely affected. Further, because we rely on a global talent pool and frequently sponsor employees for U.S. work visas and permanent residency (green cards), changes in U.S. immigration policies may lead to increased uncertainty, processing delays, and higher rates of denial for visa and green card applications. Such delays and uncertainties could disrupt the employment of key personnel, increase our operational costs, and make it more difficult to retain certain employees, potentially harming our business and employee morale.

Our international operations have many associated risks.

We continue to strategically manage our presence in international markets, and these efforts require significant management attention and financial resources. We may not be able to successfully penetrate international markets, or, if we do, there can be no assurance that we will grow our business in these markets at the same rate as in North America. Because of inherent complexities and challenges in some international markets, lack of success in such markets could adversely affect our business, results of operations, cash flow, and financial condition.

We have international offices in Canada, the United Kingdom, Dubai, Australia, China, Hong Kong, Malaysia, the Philippines, Singapore, and India. We have committed resources to maintaining and further expanding, where appropriate, our sales offices and sales and support channels in key international markets. However, our efforts may not be successful. International sales are subject to many risks and difficulties, including but not limited to those arising from the following: building and maintaining a competitive presence in new markets; staffing and managing foreign operations; complying with a variety of foreign laws, rules and regulations; producing localized versions of our products; developing integrations between our products and other locally-used products; import and export restrictions and tariffs; enforcing contracts and collecting accounts receivable; unexpected changes in regulatory requirements; reduced protection for intellectual property rights in some countries; potential adverse tax treatment; language and cultural barriers; foreign currency fluctuations; inflation and any regulatory actions to counter inflation; and political and economic instability abroad.

Natural disasters or other catastrophic events affecting our principal facilities could cripple our business.

Natural disasters or other catastrophic events, particularly those affecting employees in our Alpharetta headquarters or India research and development center, may cause damage or disruption to our operations, and thus could have a negative effect on us. Most of our administrative functions are concentrated in our Alpharetta headquarters and most of our software development activity is concentrated in our India research and development center. While we maintain crisis management and disaster response plans, a natural disaster, fire, power shortage, pandemic, act of terrorism or other catastrophic event occurring in either geographic location that prevents or substantially impairs our employees' ability to work, either in the office or from home, could make it difficult or impossible for us to deliver our products and services to customers.

Regulatory Matters, Information Security, Data Privacy, and Product Stability

Our products and services may not function properly if we experience significant coding or configuration errors.

Despite testing prior to the release and throughout the lifecycle of a product or service, our on-premise and cloud-based solutions sometimes contain coding or configuration errors that can impact their function, performance and security, and result in other negative consequences. The detection and correction of any errors in released on-premise or cloud-based solutions can be time consuming and costly. Errors in our on-premise and cloud-based solutions could affect their ability to properly function, integrate or operate with other software or hardware offerings, could result in service interruptions, delays or outages, could create security vulnerabilities in our products or services, could delay the development or release of new products or services or new versions of products or services, and could adversely affect market acceptance of our products or services. Due to the centralized nature of SaaS delivery models, any service interruption or outage may have an immediate and widespread impact across multiple customers simultaneously, which could result in customer dissatisfaction, financial obligations under service level agreements, and reputational harm.

This includes third-party software products or services incorporated into our own. If we experience any of these errors, or if there are delays in releasing our on-premise or cloud-based solutions or new versions of these offerings, our sales could be affected and revenues could decline. Customers rely on our on-premise and cloud-based solutions and related services to run their businesses, and errors in our solutions and related services could expose us to product liability, performance and warranty claims as well as significant harm to our brand and reputation, which could impact our future sales.

We have integrated AI and machine learning features into our technology stack to improve guest analytics, demand forecasting, and automated workflows, among other things. These models are complex and their efficacy depends on the quality of the data used for training. If the underlying data is flawed, or if the AI models experience "hallucinations" or logical failures, our platforms may produce inaccurate, biased, or unreliable outputs. In a hospitality context, such errors—ranging from incorrect pricing recommendations to failures in guest service automation—could result in operational disruptions for our customers, contractual disputes, and harm to our brand reputation. The "black box" nature of certain AI models may also make it difficult for us to troubleshoot these errors or provide transparent explanations to our users and regulators.

Implementation of software solutions often involves a significant commitment of resources, and any failure to deliver as promised on a significant implementation could adversely affect our business.

The implementation of software solutions often involves a significant commitment of resources and is subject to a number of significant risks over which we may or may not have control. These risks include:

- the features of the implemented software may not meet the expectations or fit the business model of the customer;
- our pool of implementation personnel cannot quickly and easily be augmented for complex implementation projects, such that resources issues, if not planned and managed effectively, could lead to costly project delays;

- customer-specific factors, such as the stability, functionality, interconnection and scalability of the customer's pre-existing information technology infrastructure, as well as financial or other circumstances could destabilize, delay or prevent the completion of the implementation process; and
- customers and their partners may not fully or timely perform the actions required to be performed by them to ensure successful implementation, including measures we recommend to safeguard against technical and business risks.

As a result of these and other risks, some of our customers may incur large, unplanned costs in connection with the purchase and installation of our solutions. Also, implementation projects could take longer than planned or fail. We may not be able to reduce or eliminate protracted installation or significant additional costs. Significant delays or unsuccessful customer implementation projects could result in cancellation or renegotiation of existing agreements, claims from customers, harm to our reputation and negatively impact our operating results.

We use open-source software in our solutions that may subject our solutions to general release or require us to re-engineer our solutions.

We use open-source software in our solutions and may use more open-source software in the future. From time to time, there have been accusations by companies claiming ownership of software that was previously thought to be open-source and that was incorporated by other companies into their products. As a result, we could be subject to legal claims by parties claiming ownership of what we believe to be open-source software.

Some open-source licenses contain requirements that we make available source code for modifications or derivative works we create based upon the open-source software and that we license these modifications or derivative works under the terms of a particular open-source license or other license granting third parties certain rights of further use. If we combine or, in some cases, link our proprietary software solutions with or to open-source software in a certain manner, we could, under certain open-source licenses, be required to release the source code of our proprietary software solutions or license such proprietary solutions under the terms of a particular open-source license or other license granting third parties certain rights of further use.

In addition to risks related to license requirements, usage of open-source software can lead to greater risks than use of third-party commercial software, as open-source licensors generally do not provide warranties or controls on the origin of the software. In addition, open-source license terms may be ambiguous and many of the risks associated with usage of open-source cannot be eliminated, and could, if not properly addressed, negatively affect our business. If we were found to have inappropriately used open-source software, we may be required to seek licenses from third parties in order to continue offering our software, to re-engineer our solutions, to discontinue the sale of our solutions in the event re-engineering cannot be accomplished on a timely basis or take other remedial action that may divert resources away from our development efforts, any of which could adversely affect our business, operating results and financial condition.

We are subject to complex, evolving regulatory requirements that may be difficult and expensive to comply with and that could negatively impact our business.

Our business and operations are subject to a variety of regulatory requirements in the countries in which we operate or in which we offer our solutions, including, among other things, with respect to data privacy, AI, information security, trade compliance, tax, and labor matters.

In addition, as we are increasingly building and licensing from third party providers new and evolving technologies, such as AI, machine learning, analytics, and biometrics, as part of our offerings, our business and operations may become subject to additional complex and evolving regulatory requirements pertaining to the sale or use of these technologies. The evolving regulatory environment surrounding these new technologies may also increase our research and development costs, compliance costs, and confidentiality and security risks, and result in inconsistencies in evolving legal frameworks across jurisdictions. The sale of these technologies, or their use by us or by our customers or partners, may also subject us to additional risks, including reputational harm, competitive harm or legal liabilities, due to their perceived or actual impact on human rights, privacy, employment, or in other social or discriminatory contexts. Third-parties may criticize us or seek to hold us responsible not only for our own activities in this regard but also for the activities of our customers or partners.

We may become subject to regulation and disclosure requirements related to environmental, social and governance (ESG) matters. In addition, stakeholders, including investors, customers, suppliers and employees, may pressure us to make commitments on these matters that may be difficult to manage or achieve. If we fail to make or meet such commitments, we may be subject to criticism, reputational harm or legal liability.

The application of various laws and regulations to our business is often unclear and may at times conflict. Compliance with applicable regulatory requirements may be onerous, time-consuming, and expensive, especially where these requirements are inconsistent from jurisdiction to jurisdiction or where the jurisdictional reach of certain requirements is not clearly defined or seeks to reach across national borders. Regulatory requirements in one jurisdiction may make it difficult or impossible to do business in or comply with the rules of another jurisdiction.

While we endeavor to implement policies, procedures, and systems designed to achieve compliance with these regulatory requirements, we cannot assure you that these policies, procedures, or systems will be adequate or that we or our personnel will not violate these policies and procedures or applicable laws and regulations. Violations of these laws or regulations may harm our reputation and deter government agencies and other existing or potential customers or partners from purchasing our solutions. Furthermore, non-compliance with applicable laws or regulations could result in fines, damages, criminal sanctions against us, our officers or our employees, restrictions on the conduct of our business, and damage to our reputation.

Cyber-attacks involving our systems and data could expose us to liability or harm our reputation and have a material adverse effect on our business.

We rely on information technology networks and systems, some of which are owned and operated by third parties, to collect, process, transmit, and store electronic information on behalf of our customers. We also depend on our information technology infrastructure for a variety of functions, including worldwide financial reporting, procurement, invoicing, and email communications. These systems are susceptible to outages due to fire, floods, power loss, telecommunications failures, hacking, terrorist attacks, and similar events.

Our solutions are primarily delivered through multi-tenant cloud architectures in which multiple customers are served through shared environments. Although we employ controls designed to logically segregate customer data, any failure, vulnerability, or misconfiguration could result in unauthorized access to or exposure of one customer's data to another, which could lead to legal liability, regulatory scrutiny, and reputational harm.

We also rely on identity and access management controls to govern user access across our systems. Risks associated with overprivileged accounts or accounts not centrally managed through our single sign-on systems could create vulnerabilities. Any failure to promptly revoke or appropriately manage access credentials, including those of former personnel or compromised accounts, may result in unauthorized access or data exfiltration.

In addition, our services depend on integrations with third-party applications through APIs, OAuth tokens, and similar authentication mechanisms. Mismanagement, compromise, or misuse of such credentials could enable unauthorized access and allow threat actors to move laterally across interconnected systems, increasing the scope and impact of a cybersecurity incident.

We have implemented security measures and controls intended to protect our IT infrastructure, data centers and other systems and data against cyber-attacks. Despite our implementation of security measures and controls, our systems and those of third parties upon whom we rely are vulnerable to attack from numerous threat actors, including sophisticated nation-state and nation-state-supported actors. Threat actors have and may in the future be able to compromise our security measures or otherwise exploit vulnerabilities in our systems, including vulnerabilities that may have been introduced through the actions of our employees or contractors or defects in the design or manufacture of our products and systems or the products and systems that we procure from third parties. Our systems, and those of our third-party providers, have and could in the future become subject to cyber-attacks, including using computer viruses, credential harvesting, dedicated denial of services attacks, malware, social engineering, and other means for obtaining unauthorized access to, or disrupting the operation of, our systems and those of our third-party providers.

In addition, threat actors are also increasingly using tools and techniques that circumvent controls, evade detection, and remove forensic evidence, which means that we and others may be unable to anticipate, detect, deflect, contain or recover from cyberattacks in a timely or effective manner. As AI capabilities improve and are increasingly adopted, we may see cyberattacks created through AI. These attacks could be crafted with an AI tool to directly attack IT systems with increased speed and/or efficiency than a human threat actor or create more effective phishing emails. Our network and storage applications, as well as those of our customers, business partners, and third-party providers, may be subject to unauthorized access by hackers or breached due to operator error, malfeasance or other system disruptions.

The number and scale of cyberattacks have continued to increase and the methods and techniques used by threat actors, including sophisticated "supply-chain" attacks, continue to evolve at a rapid pace. As a result, we may be unable to identify

current attacks, anticipate future attacks or implement adequate security measures. We have experienced attacks in the past, which did not have any material adverse effects on our business, financial condition or results of operations. However, we may experience security breaches that could remain undetected for an extended period and, therefore, have a greater impact on our systems, our products, the proprietary data contained therein, our customers, and ultimately, our business.

Cyberattacks on our systems and “supply-chain” attacks on systems of third parties upon whom we rely, and any related operational disruptions, unauthorized access, or misappropriation of information (including personally identifiable information or personal data), could create costly litigation, significant financial liability, and a loss of confidence in our ability to serve customers and cause current or potential customers to choose another provider, all of which could have a material adverse effect on our business, financial condition, reputation, and results of operations.

Privacy, information security, and data protection laws, rules, and regulations could affect or limit how we collect and use personal information, increase our costs, and adversely affect our business opportunities. A failure to comply with applicable privacy or data protection laws could cause litigation, harm our reputation and have a material adverse effect on our business.

We collect, process, transmit, and/or store (on our systems and those of third-party providers) customer transactional data, as well as their guests’ and our customers’ and employees’ personally identifiable information and/or other data and information. Personally identifiable information is increasingly subject to legislation and regulations in numerous jurisdictions with regard to privacy and data security such as the California Consumer Privacy Act and the European Union’s General Data Protection Regulation. Moreover, what constitutes personally identifiable information and what other data and/or information is subject to privacy laws varies by jurisdiction and continues to evolve. Our failure and/or the failure of our customers, vendors, and service providers to comply with applicable privacy and data protection laws and regulations could damage our reputation, discourage current and/or potential customers from using our products and services, and result in fines, governmental investigations and/or enforcement actions, complaints by private individuals, and/or the payment of penalties to consumers.

The global regulatory landscape surrounding AI is rapidly evolving and remains highly uncertain. We are subject to emerging privacy and data protection mandates, which may impose stringent requirements on how we develop and deploy AI models. Compliance with these regulations requires substantial financial resources and management attention. Additionally, there is significant legal uncertainty regarding the use of proprietary or third-party data for AI training and the ownership of AI-generated content. We may face claims of intellectual property infringement or find that we are unable to protect our own AI-driven innovations. Furthermore, if our AI processes inadvertently process sensitive guest or employee data in a manner that violates privacy standards (such as GDPR or CCPA), we could be subject to fines, litigation, and regulatory enforcement actions.

In addition, many U.S. and foreign laws and regulations, including those promulgated by the SEC, require companies to provide notice of cybersecurity incidents involving certain types of personal data or unauthorized access to, or interference with, our information systems to the public, certain individuals, the media, government authorities, or other third parties. Certain of these laws and regulations include notice or disclosure obligations contingent upon the result of complex analyses, including in some cases a determination of materiality. The nature of cybersecurity incidents can make it difficult to quickly and comprehensively assess an incident’s overall impact to our business, and we may make errors in our assessments. If we are unable to appropriately assess a cybersecurity incident in the context of required analyses then we could face compliance issues under these laws and regulations, and we could be subject to lawsuits, regulatory fines or investigations, or other liabilities, any or all of which could adversely affect our business and operating results. Furthermore, cybersecurity incidents experienced by us, or by our customers or vendors, that lead to public disclosures may also lead to widespread negative publicity and increased government or regulatory scrutiny. Any security compromise in our industry, whether actual or perceived, could harm our reputation; erode customer confidence in our security measures; negatively affect our ability to attract new customers; or subject us to third-party lawsuits, regulatory fines or investigations, or other liability, any or all of which could adversely affect our business and operating results. Even the perception of inadequate security may damage our reputation and negatively impact our ability to win new customers and retain existing customers.

Additionally, we could be required to expend significant capital and other resources to investigate and address any actual or suspected cybersecurity incident or to prevent further or additional incidents. To maintain business relationships, we may find it necessary or desirable to incur costs to provide remediation and incentives to customers or other business partners following an actual or suspected security incident. We also cannot be sure that our existing cybersecurity insurance will continue to be available on acceptable terms, in sufficient amounts to cover any claims we submit, or at all. Further, we cannot be sure that insurers will not deny coverage as to any claim, and some security incidents may be outside the scope of our coverage, including in instances where they are considered force majeure events. Security incidents may result in

increased costs for cybersecurity insurance. One or more large, successful claims against us in excess of our available insurance coverage, or changes in our insurance policies, including premium increases or large deductible or co-insurance requirements, could have an adverse effect on our business, operating results, and financial condition.

Actual or perceived security vulnerabilities in our software solutions may result in reduced sales or liabilities.

We have implemented policies and procedures, and use information technology systems, to help ensure the proper handling of our customers' and their customers' data from both a data privacy and an information security perspective. We also evaluate the information security of potential partners and vendors as part of our selection process and attempt to negotiate adequate protections from such third parties when we enter into contracts with them. Our customer contracts also obligate our customers to undertake steps necessary for satisfying individual rights under laws and regulations. While these policies, procedures, systems, contractual provisions, and measures are designed to mitigate the risks associated with handling or processing personal data, including categories of personal data which may be classed as sensitive data, they cannot always safeguard against all risks, nor can we control the actions of third parties, including vendors, customers, employees and partners. In addition, it may be possible for customer and guest data to be compromised from a customers' information technology system if our customer does not maintain appropriate data privacy and information security procedures.

AI introduces new and sophisticated cybersecurity vulnerabilities. Malicious actors are increasingly using AI to automate the discovery of software vulnerabilities and to launch highly targeted social engineering or "deepfake" attacks against our employees and customers. Additionally, the AI models we use may be subject to novel attack vectors, such as "prompt injection" or "data poisoning," where attackers attempt to manipulate the model's logic or access underlying training data. Any breach that compromises our AI infrastructure or the sensitive data utilized therein could result in the loss of intellectual property, material financial costs for remediation, and loss of customer trust in the security of our products.

The improper handling of personal data including sensitive data, or even the perception of such mishandling (whether or not valid), or other security lapses or breaches affecting us, our partners, our customers, or our products or services, could reduce demand for our products or services or otherwise expose us to financial or reputational harm or legal liability.

For certain products and services, including our cloud hosting operations, we rely on third-party providers, which may create significant risk exposure for us.

We maintain relationships with third parties to provide certain services to us or to our customers, including cloud hosting and other cloud-based services. We have contractual obligations to customers based on these relationships and, in some cases, also entrust these providers with both our own sensitive data as well as the sensitive data of our customers (that may include sensitive guest data). If these third-party providers do not perform as expected or encounter service disruptions, cyber-attacks, data breaches, or other difficulties, we or our customers may be materially and adversely affected, including, among other things, by facing increased costs, potential liability to customers, guests, or other third parties, regulatory issues, and reputational harm. If it is necessary to migrate these services to other providers because of poor performance, security considerations, or other financial or operational factors, it could result in service disruptions to our customers and significant time, expense, or exposure to us, any of which could materially adversely impact our business.

Because our cloud-based offerings depend on third-party hosting providers, we are also exposed to risks relating to service availability and performance. We may have contractual service level agreements ("SLAs") requiring specified uptime and performance standards, and any failure to meet these standards, whether attributable to us or our third-party providers, could result in service credits, financial penalties, customer claims, or contract terminations.

We also purchase hardware and technology, in some cases, from companies that may compete with us or work with our competitors. While we endeavor to use larger, more established providers wherever possible, in some cases, the providers may be smaller, less established companies, particularly in the case of new or unique technologies that we have not developed internally.

If any of these providers experience financial, operational, or quality assurance difficulties, or if any cease production, or there is any other disruption in the services we or our customers receive, including as a result of the acquisition of a supplier or partner by a competitor, cyber security issues, macroeconomic issues, or otherwise, we will be required to locate and migrate to alternative sources or providers, to internally develop the applicable technologies, to redesign our products, or to remove certain features from our products or to reduce our service levels, any of which would likely increase our expenses, create delays, or negatively impact our revenues. Although we strive to establish contractual protections with key providers, such as source code escrows, warranties, and indemnities, we may not be successful in obtaining adequate

protections, these agreements may be short-term in duration, and the counterparties may be unwilling or unable to stand behind such protections. Moreover, these types of contractual protections offer limited practical benefits to us in the event our relationship with a key provider is interrupted.

We may not be able to enforce or protect our intellectual property rights.

We rely on a combination of copyright, patent, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. We cannot be certain that the steps we have taken will prevent unauthorized use of our technology. Any failure to protect our intellectual property rights would diminish or eliminate the competitive advantages that we derive from our proprietary technology.

We may be subject to claims of infringement of third-party intellectual property rights.

Third parties may assert claims that our software or technology infringe, misappropriate, or otherwise violate their intellectual property or other proprietary rights. Such claims may be made by our competitors seeking to obtain a competitive advantage or by other parties. The risk of claims may increase as the number of software products that we offer and competitors in our market increase and overlaps occur. Any such claims, regardless of merit, that result in litigation could result in substantial expenses, cause reputational harm, divert the attention of management, cause significant delays in introducing new or enhanced services or technology, materially disrupt the conduct of our business, and have a material adverse effect on our business, financial condition, and results of operations.

While we do not believe that our products and services infringe any patents or other intellectual property rights, from time to time, we receive claims that we have infringed the intellectual property rights of others.

If we fail to meet our customers' performance expectations, our reputation may be harmed, and we may be exposed to legal liability.

Our ability to attract and retain customers depends to a large extent on our relationships with our customers and our reputation for high quality services and solutions. As a result, if a customer is not satisfied with our products and services, our reputation may be damaged. Moreover, if we fail to meet our customers' performance expectations or if customers experience service disruptions, breaches or other quality issues, we may lose customers and be subject to legal liability, particularly if such failure, service disruptions or breaches adversely impact our customers' businesses.

In addition, many of our projects are critical to the operations of our customers' businesses. While our contracts typically include provisions designed to limit our exposure to legal claims relating to our products and services, these provisions may not adequately protect us or may not be enforceable in all cases. The general liability insurance coverage that we maintain, including coverage for errors and omissions, is subject to important exclusions and limitations. We cannot be certain that this coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not deny coverage as to any future claim. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could adversely affect our profitability.

Risks Relating to the Industries We Serve

Our business depends to a significant degree on the hospitality industry, and instability and downturns in the hospitality industry could adversely affect our business and results of operations.

Because our customer base is concentrated in the hospitality industry, our business and sales are largely dependent on the health of that industry, which in turn is dependent on the domestic and international economy. Instabilities or downturns in the hospitality industry, such as those resulting from the impacts of pandemics, geopolitical unrest, economic uncertainty, among other things, could disproportionately impact our revenue, as customers may exit the industry or delay, cancel or reduce planned expenditures for our products.

Consolidation in the gaming and other hospitality industries could adversely affect our business.

Customers that we serve may seek to achieve economies of scale and other synergies by combining with or acquiring other companies. The hospitality industry has experienced recent consolidations, including the hotel and gaming sectors of the industry. Although recent consolidations in the hospitality industry have not materially adversely affected our business,

there is no assurance that future consolidations will not have an impact. For example, if one of our current customers merges or consolidates with a company that relies on another provider's products or services, it could decide to reduce or cease its purchases of products or services from us, which could have an adverse effect on our business.

Insolvencies in the hospitality industry could adversely affect our business.

Customers that we serve may be or become insolvent. Loss of revenue and other operating challenges may cause some of our customers to declare bankruptcy or cause their lenders to declare a default, accelerate the related debt, or foreclose on their property. Customers in bankruptcy may not have sufficient assets to pay us unpaid fees or reimbursements we are owed under their agreements with us. If a significant number of customers file for bankruptcy or otherwise fail to pay amounts owed to us, our revenues and liquidity could be adversely affected.

Risks Relating to Our Finances and Capital Structure

Our stock has been volatile, and we expect that it will continue to be volatile.

During the year ended March 31, 2026, the trading price of our common stock ranged from a low close of \$65.76 to a high close of \$141.12. The market price for our common stock has experienced and may continue to be subject to wide fluctuations in response to many risk factors listed in this section, and others beyond our control. Factors that have affected and may continue to affect the trading price of our common stock may include, but are not limited to:

- uncertainties in the global economy;
- economic news or other events generally causing volatility in the trading markets;
- our operating results failing to meet the expectations of securities analysts or investors in a particular period or failure of securities analysts to publish reports about us or our business;
- announcements by us or our competitors of acquisitions, new offerings or improvements, significant contracts, commercial relationships or capital commitments;
- our ability to market new and enhanced solutions on a timely basis;
- any major change in our board or management; and
- general economic and political conditions such as recessions, interest rates, tariffs, fuel prices, international currency fluctuations, supply chain interruptions, global or regional pandemics, and acts of war or terrorism.

Additionally, our ownership base has been and may continue to be concentrated in a few shareholders, which could increase the volatility of our common share price over time.

If we acquire new businesses, we may not be able to successfully integrate them or attain the anticipated benefits.

As part of our operating history and growth strategy, we have acquired other businesses. In the future, we may continue to seek acquisitions. We can provide no assurance that we will be able to identify and acquire targeted businesses or obtain financing for such acquisitions on satisfactory terms. The process of integrating acquired businesses into our operations may result in unforeseen difficulties and may require a disproportionate amount of resources and management attention. If integration of our acquired businesses is not successful, we may not realize the potential benefits of an acquisition or suffer other adverse effects.

Our financial results may be significantly impacted by changes in our tax position.

We are subject to taxes in the United States and numerous foreign jurisdictions. Our future effective tax rates could be impacted by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation allowance on deferred tax assets (including our net operating loss carryforwards), changes in unrecognized tax benefits, or changes in tax laws or their interpretation. Any of these changes could have a material adverse effect on our profitability. In addition, the tax authorities in the jurisdictions in which we operate, including the United States, may from time to time review the pricing arrangements between us and our foreign subsidiaries or among our foreign subsidiaries. An adverse determination by one or more tax authorities in this regard may have a material adverse effect on our financial results.

We have significant deferred tax assets which can provide us with significant future cash tax savings if we are able to use them, including significant net operating losses. However, the extent to which we will be able to use these net operating losses may be impacted, restricted, or eliminated by a number of factors, including changes in tax rates, laws or regulations, and whether we generate sufficient future taxable income. To the extent that we are unable to utilize our net operating losses or other losses, our results of operations, liquidity, and financial condition could be materially adversely impacted.

When we cease to have net operating losses available to us in a particular tax jurisdiction, either through their expiration, disallowance, or utilization, our cash tax liability will increase in that jurisdiction.

We are exposed to foreign currency exchange rate fluctuations that could negatively impact our financial results.

We earn revenue, pay expenses, own assets, and incur liabilities in countries using currencies other than the U.S. dollar, including the British pound sterling, euro, Indian rupee, Australian dollar, Singapore dollar, and Canadian dollar, among others. Because our consolidated financial statements are presented in U.S. dollars, we must translate revenue, expenses, assets, and liabilities of entities using non-U.S. dollar functional currencies into U.S. dollars using currency exchange rates in effect during or at the end of each reporting period, meaning that we are exposed to the impact of changes in currency exchange rates. In addition, the revaluation and settlement of monetary assets and liabilities denominated in currencies other than the U.S. dollar impact our net income with associated gains or losses recorded within other income (expense), net.

We are exposed to tariff policy changes that could negatively impact our financial results.

The current global trade environment is characterized by uncertainty and evolving tariff policies. Further imposition of increased tariffs, trade restrictions, or trade disputes between major economies could lead to broader economic instability, decreased global customer demand, and increased volatility in currency exchange rates. Higher prices for goods due to tariffs may reduce consumer spending, which could lead to decreased demand for our customers' products, which may ultimately affect our revenue and profitability. These factors could negatively impact our business, financial condition, and results of operations.

We may have exposure to greater than anticipated tax liabilities.

Some of our products and services may be subject to sales taxes in jurisdictions where we have not collected and remitted such taxes from our customers. We believe we have appropriately accrued for these contingencies. In the event actual results differ, we may need to make adjustments, which could materially impact our financial condition and results of operations.

We may incur goodwill and intangible asset impairment charges that adversely affect our operating results.

As of March 31, 2026, we had \$133.9 million of goodwill and \$66.4 million of intangible assets, net, on our Consolidated Balance Sheet. We review our indefinite-lived intangible assets including goodwill for impairment on at least an annual basis or more frequently if an event or events indicate the potential for impairment. We assess as needed whether there have been impairments in our other intangible assets. We make assumptions and estimates in our assessments that can be complex and subjective. In our assumptions and estimates we consider whether negative factors exist such as deteriorating economic conditions, disruptions to our business, inability to effectively integrate acquired businesses, intensified competition, market capitalization declines, or significant changes in use of the intangible assets. To the extent that such factors or other negative factors emerge, we may record non-cash impairment charges in the future that could negatively impact our financial condition and results of operations.

We may encounter risks associated with maintaining large cash balances.

While we have attempted to invest our cash balances in investments we consider to be relatively safe, we nevertheless confront credit and liquidity risks. Bank failures could result in reduced liquidity or the actual loss of money held in deposit accounts in excess of federally insured amounts, if any.

Other Risk Factors

Provisions of our corporate governance documents and Delaware Law could make an acquisition of the company more difficult and may prevent attempts by our stockholders to replace or remove our current management, even if beneficial to our stockholders.

Our certificate of incorporation and bylaws and the Delaware General Corporation Law (the DGCL), contain provisions that could make it more difficult for a third party to acquire us, even if doing so might be beneficial to our stockholders. These provisions include:

- advance notice requirements for stockholder proposals and director nominations;
- the ability of our board of directors to fill a vacancy created by the expansion of our board of directors;

- the ability of our board of directors to issue up to 5,000,000 shares of preferred stock, in one or more series, without stockholder approval and with such designations, powers, preferences and rights, and the qualifications, limitations or restrictions as our board of directors may deem appropriate;
- prohibition on the ability of stockholders to call special meetings; and
- the required approval of holders of at least two-thirds of the voting power of our issued and outstanding capital stock entitled to vote in the election of directors to adopt, amend or repeal certain provisions of our certificate of incorporation and bylaws, though our bylaws can also be amended by vote of our board of directors.

In addition, Section 203 of the DGCL may affect the ability of an “interested stockholder” to engage in certain business combinations, for a period of three years following the time that the stockholder becomes an “interested stockholder.”

Because our board of directors is responsible for appointing the members of our management team, these provisions could in turn affect any attempt to replace current members of our management team. As a result, you may lose your ability to sell your stock for a price in excess of the prevailing market price due to these protective measures, and efforts by stockholders to change the direction or management of the company may be unsuccessful.

Accounting principle updates could have a negative impact on our financial condition or operating results.

We prepare our Consolidated Financial Statements in conformity with U.S. Generally Accepted Accounting Principles (GAAP). Our application of new accounting principles can have a significant impact on our operating results including previously reported results subject to any retroactive treatment. In addition, new accounting principles may require significant changes to certain aspects of our business including how we operate and contract with our customers and suppliers. In order to manage such changes, we may incur significant costs to implement and maintain potentially extensive updates to our accounting systems and internal control over financial reporting that could negatively impact our financial condition and the results of our operations. Furthermore, difficulties or delays in applying new accounting principles could result in a failure to meet our financial reporting obligations.

If we fail to maintain an effective system of internal controls, we may be unable to prevent or detect fraud or internal control deficiencies including material weaknesses, which could have a material adverse impact on our business.

We design and operate our internal control over financial reporting to provide reasonable assurance about the reliability of financial reporting including the preparation of our Consolidated Financial Statements in accordance with GAAP. Because of its inherent limitations, our system of internal control over financial reporting may not prevent or detect every misstatement. Accordingly, although the Company’s management has concluded that our internal controls are effective as of March 31, 2026, we cannot provide absolute assurance that the objectives of our controls system are met. No evaluation of internal controls can provide absolute assurance that control matters and instances of fraud, if any, within our Company have been detected.

Item 1B. Unresolved Staff Comments.

None.

Item 1C. Cybersecurity.

We have an enterprise-wide information security program designed to identify, protect, detect, respond to and manage reasonably foreseeable cybersecurity risks and threats. To protect our information systems from cybersecurity threats, we use various security tools and third-party managed security services that help prevent, identify, escalate, investigate, resolve and recover from identified vulnerabilities and security incidents in a timely manner. These include, but are not limited to, internal reporting, monitoring and detection tools. Security awareness training is also a key component of our information security program and involves required training for our employees several times per year.

We also evaluate the information security of potential partners and vendors as part of our vendor selection process and attempt to negotiate adequate protections from such third parties when we enter into contracts with them. Although our security program is designed to identify, prioritize, assess, mitigate and remediate third party risks, we rely on our partners and vendors to implement security programs commensurate with their risk, and we cannot ensure in all circumstances that their efforts will be successful.

We regularly assess risks from cybersecurity and technology threats and monitor our information systems for potential vulnerabilities. We use a widely-adopted risk quantification model to identify, measure and prioritize cybersecurity and

technology risks and develop related security controls and safeguards to mitigate such risks. We conduct regular reviews and tests of our information security program and also leverage tabletop exercises, penetration and vulnerability testing, and third-party red team exercises to evaluate the effectiveness of our information security program and improve our security measures.

We also engage an external auditor to conduct an annual Security and Organizational Controls 2 (SOC 2) examination of the security controls for systems storing customer data. The external auditor additionally conducts an annual payment card industry (PCI) data security standard review of our security controls that protect payment information.

Our systems periodically experience attacks intended to lead to interruptions and delays in our services and operations as well as loss, misuse or theft of personal information (of third parties, employees, and our customers) and other data, confidential information or intellectual property. However, no cybersecurity incidents have had a material impact on our business, financial condition or results of operations, and we are not presently aware of any cybersecurity threats that are reasonably likely to materially affect us. Any significant disruption to our service or access to our systems could result in a loss of customer data and adversely affect our business and results of operation. Further, a penetration of our systems or a third-party's systems or other misappropriation or misuse of personal information could subject us to business, regulatory, litigation and reputation risk, which could have a material adverse effect on our business, financial condition and results of operations. See "Risk Factors — Cyber-attacks involving our systems and data could expose us to liability or harm our reputation and have a material adverse effect on our business."

The Vice President and Chief Information Security Officer (CISO) leads the global information security organization responsible for overseeing our information security program. Our CISO has over 25 years of industry experience, including serving in similar roles leading and overseeing cybersecurity programs at other public companies, and is a Certified Information Security Professional and Information Systems Security Architecture Professional. Team members who support our information security program have relevant educational and industry experience, including having held similar positions at large technology companies. Given the nature of our business, management is highly focused on identifying and managing cybersecurity risks, and our CISO and information security teams provide regular reports to senior management and other relevant teams on various cybersecurity threats, assessments and findings.

The Board has primary responsibility for oversight of the Company's cybersecurity risks. The Audit Committee is also responsible for reviewing the Company's cybersecurity risks and the steps that management has taken to protect against threats to the Company's information systems and security. The Audit Committee has formed a Cybersecurity Risk Subcommittee consisting of two independent directors to assist the Audit Committee in its oversight of cybersecurity risks. By its charter, all members of the Cybersecurity Risk Subcommittee must have a background or experience in information technology or cybersecurity and an understanding of cyber threats, risk mitigation and policy.

The results of our SOC 2 and PCI assessments are annually reported to the Cybersecurity Risk Subcommittee. Both the Subcommittee and the Board receive regular reports from our CISO on various cybersecurity matters, including risk assessments, mitigation strategies, areas of emerging risks, incidents and industry trends, and other areas of importance. The Board also oversees our annual enterprise risk assessment, where we assess key risks within the company, including cyber security and technology risks.

Item 2. Properties.

Our corporate headquarters is located in Alpharetta, Georgia where we lease approximately 28,000 square feet of office space. In addition, we lease approximately 36,000 square feet of office space in Las Vegas, Nevada, 3,000 square feet of office space in Santa Barbara, California, and 6,000 square feet of warehouse space in Roswell, Georgia. Internationally, we lease approximately 210,000 square feet of office space in Chennai, India, 14,000 square feet in Markham, Canada, 2,000 square feet in Toronto, Canada, and lease several other smaller office locations throughout Europe and Asia. Our major leases contain renewal options for periods of up to 5 years. We believe our office space facilities are sufficient to meet our current needs and do not anticipate any difficulty securing additional space as needed.

Item 3. Legal Proceedings.

We are involved in legal actions that arise in the ordinary course of business. It is the opinion of management that the resolution of any current pending litigation will not have a material adverse effect on our financial position or results of operations.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 4A. Information About Our Executive Officers.

The following table provides information with respect to all persons serving as executive officers as of May 21, 2026, including business experience for the last five years.

Name	Position	Age	Executive Officer Since
Ramesh Srinivasan	President and Chief Executive Officer since January 2017.	66	2017
Kyle Badger	Senior Vice President, General Counsel and Secretary since October 2011.	57	2011
Joe Youssef	Chief Commercial Officer & Senior Vice President of Sales - Americas & EMEA since August 2024, when he joined Agilysys. Previously, he was Executive Vice President – Commercial from 2023-2024, Executive Vice President – Business Intelligence and Data solutions from 2020-2023, and Executive Vice President - Hospitality from 2014-2020 at Amadeus.	52	2025
Chris Robertson	Vice President, Corporate Controller and Treasurer, since June 2019. Previously he served as Corporate Controller and Treasurer from June 2017 to June 2019.	55	2017
Sethuram Shivashankar	Senior Vice President, Chief Technology Officer and Chief Information Officer, since July 2023. Previously he served as Senior Vice President, Chief Information Officer from March 2022 to July 2023, and Vice President, Special Projects, from January 2022 to March 2022. Prior to Agilysys, he served as Senior Vice President, Gaming Systems at Scientific Games from October 2018 to April 2021.	56	2022
William David (Dave) Wood III	Senior Vice President and Chief Financial Officer since June 2020. Previously he served as Vice President – Corporate Strategy & Investor Relations from June 2019 to May 2020, and Vice President – Finance from June 2017 to June 2019.	48	2020

There are no family relationships among the executive officers or directors of the Company.

Part II

Item 5. Market for Registrant’s Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities.

Market Information

Our common shares, without par value, are traded on the NASDAQ Global Select Market under the symbol “AGYS”. As of May 8, 2026, there were 896 registered holders of our common shares.

Dividends

We did not pay dividends in fiscal 2026 or 2025 on our common stock and are unlikely to do so in the foreseeable future. The current practice of the Board of Directors is to retain any available earnings for use in the operations and growth of our business, both organically and through acquisitions.

Shareholder Return Performance Presentation

The following chart compares the value of \$100 invested in our common shares, including reinvestment of dividends, with a similar investment in the Russell 2000 Index (the Russell 2000) and with the companies listed in the SIC Code 7373- Computer Integrated Systems Design for the period March 31, 2021 through March 31, 2026. The stock price performance in this graph is not necessarily indicative of the future performance of our common shares.

Indexed Returns

Company Name / Index	Base Period 2021	Fiscal Years Ended March 31,				
		2022	2023	2024	2025	2026
Agilysys, Inc.	\$ 100.00	\$ 83.15	\$ 172.02	\$ 175.64	\$ 151.19	\$ 148.26
Russell 2000	\$ 100.00	\$ 94.21	\$ 83.28	\$ 99.69	\$ 95.70	\$ 120.32
Peer Group	\$ 100.00	\$ 99.08	\$ 85.82	\$ 116.70	\$ 125.68	\$ 104.92

This performance graph shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended or incorporated by reference into any of our filings under the Securities Act of 1933, as amended, of the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

Item 6. [Reserved]

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

In “Management’s Discussion and Analysis of Financial Condition and Results of Operations” (MD&A), management explains the general financial condition and results of operations for Agilysys and subsidiaries including:

- what factors affect our business;
- what our earnings and costs were;
- why those earnings and costs were different from the year before;
- where the earnings came from;
- how our financial condition was affected; and
- where the cash will come from to fund future operations.

The MD&A analyzes changes in specific line items in the Consolidated Statements of Operations and Consolidated Statements of Cash Flows and provides information that management believes is important to assessing and understanding our consolidated financial condition and results of operations. This discussion should be read in conjunction with the Consolidated Financial Statements and related Notes that appear in Item 8 of this Annual Report titled, “Financial Statements and Supplementary Data.” Information provided in the MD&A may include forward-looking statements that involve risks and uncertainties. Many factors could cause actual results to be materially different from those contained in the forward-looking statements. See “Forward-Looking Information” on page 3 of this Annual Report and Item 1A “Risk Factors” in Part I of this Annual Report for additional information concerning these items. Management believes that this information, discussion, and disclosure is important in making decisions about investing in Agilysys.

Overview

Recent Developments

Macroeconomic Conditions

During the year ended March 31, 2026, global macroeconomic conditions were, and continue to be, influenced by a number of factors, including, but not limited to, political unrest, armed conflicts, changes to tariffs and trade policies, labor shortages and natural disasters. We believe such conditions are impacting customer spending and provider pricing decisions resulting in decreased demand, increased costs, and reduced margins particularly in areas outside of the United States.

Book4Time

On August 20, 2024, we acquired Book4Time Parent, Inc. (Book4Time), a global leader in spa management SaaS software, as further described in Note 16, *Business Combination*, to our consolidated financial statements included under Part II, Item 8 of this annual report. The cash consideration for the acquisition totaled \$145.8 million of net cash, partially funded by a credit agreement (the Credit Agreement) we entered into on August 16, 2024 (the Credit Agreement Closing Date), with the lenders party thereto and Bank of America, N.A., as lender and administrative agent, as further described in Note 15, *Debt*, to our consolidated financial statements included under Part II, Item 8 of this annual report.

Our Business

Agilysys has been a leader in hospitality software for more than 45 years, delivering innovative cloud-native SaaS and on-premise solutions for hotels, multi-amenity resorts, cruise lines, casinos, corporate foodservice management, restaurants, universities, stadiums, and healthcare facilities. The Company’s software solutions include point-of-sale (POS), property management (PMS), inventory and procurement, payments, and related applications that manage and enhance the entire guest journey. Agilysys is also known for its world-class customer-centric service. Many of the top hospitality companies around the world use Agilysys solutions to improve guest loyalty, drive revenue growth, and increase operational efficiencies. The Company has one reportable segment serving the global hospitality industry. Agilysys operates across the Americas, Europe, the Middle East, Africa, Asia-Pacific, and India with headquarters located in Alpharetta, GA.

Our top priority is increasing shareholder value by improving operating and financial performance and profitably growing the business through superior products and services. To that end, we expect to invest a certain portion of our cash on hand to fund enhancements to existing software products, to develop and market new software products, and to expand our customer breadth, both vertically and geographically.

Our strategic plan specifically focuses on:

- Putting the customer first
- Product innovation and development
- Improving our liquidity
- Increasing organizational efficiency and teamwork
- Developing our employees and leaders
- Growing revenue by improving the breadth and depth of our product set across both point-of-sale and property management applications
- Growing revenue through international expansion

The primary objective of our ongoing strategic planning process is to create shareholder value by capitalizing on growth opportunities, increasing profitability and strengthening our competitive position within the specific technology solutions and end markets we serve. Profitability and industry-leading growth will be achieved through tighter management of operating expenses and sharpening the focus of our investments to concentrate on growth opportunities that offer the highest returns.

Revenue – Defined

As required by the SEC, we separately present revenue earned as products revenue, subscription and maintenance revenue or professional services revenue in our Consolidated Statements of Operations. In addition to the SEC requirements, we may, at times, also refer to revenue as defined below. The terminology, definitions, and applications of terms we use to describe our revenue may be different from those used by other companies and caution should be used when comparing these financial measures to those of other companies. We use the following terms to describe revenue:

- Revenue – We present revenue net of sales returns and allowances.
- Products revenue – Revenue earned from the sales of software licenses, third party hardware and operating systems.
- Subscription and maintenance revenue – Revenue earned from the ongoing delivery of software updates, upgrades, bug fixes, technical support, and transaction-based fees over the period covered by subscription or maintenance agreements with our customers for both proprietary and remarketed solutions.
- Professional services revenue – Revenue earned from the delivery of implementation, integration, development and installation services for proprietary and remarketed products.

Results of Operations

Fiscal 2026 Compared to Fiscal 2025

Net Revenue and Operating Income

The following table presents our consolidated revenue and operating results for the fiscal years ended March 31, 2026 and 2025:

(In thousands)	Year Ended March 31,		Increase (decrease)	
	2026	2025	\$	%
Net revenue:				
Products	\$ 41,168	\$ 41,324	\$ (156)	(0.4)%
Subscription and maintenance	205,941	170,051	35,890	21.1%
Professional services	72,203	64,249	7,954	12.4%
Total net revenue	319,312	275,624	43,688	15.9%
Cost of goods sold:				
Products	24,349	22,055	2,294	10.4%
Subscription and maintenance	42,521	37,464	5,057	13.5%

Other (gains) charges, net	(7,683)	4,628	(12,311)	nm
Legal settlements, net	267	844	(577)	(68.4)%
Operating income	\$ 43,015	\$ 22,591	\$ 20,424	90.4%
<i>Operating income percentage</i>	13.5%	8.2%		

nm - not meaningful

The following table presents the percentage relationship of our Consolidated Statements of Operations line items to our consolidated net revenues for the periods presented:

	Year Ended March 31,	
	2026	2025
Net revenue:		
Products	12.9%	15.0%
Subscription and maintenance	64.5	61.7
Professional services	22.6	23.3
Total net revenue	100.0%	100.0%
Cost of goods sold:		
Products	7.6%	8.0%
Subscription and maintenance	13.3	13.6
Professional services	16.5	16.0
Total cost of goods sold	37.4%	37.6%
Gross profit	62.6%	62.4%
Operating expenses:		
Product development	22.8%	22.6%
Sales and marketing	12.5	12.0
General and administrative	13.2	14.8
Depreciation of fixed assets	1.2	1.3
Amortization of internal-use software and intangibles	1.8	1.4
Other (gains) charges, net	(2.5)	1.7
Legal settlements, net	0.1	0.4
Operating income	13.5%	8.2%

Net revenue. Total net revenue increased \$43.7 million, or 15.9%, in fiscal 2026 compared to fiscal 2025. Products revenue decreased \$0.2 million, or 0.4%, due to increasing customer preference for subscription-based software licenses instead of perpetual software licenses. Subscription and maintenance revenue increased \$35.9 million, or 21.1%, driven by continued growth in subscription-based revenue including \$21.3 million and \$11.2 million of Book4Time subscription-based revenue during the years ended March 31, 2026 and 2025, respectively. Total subscription revenue, including Book4Time subscription revenue, increased 30.2% in fiscal 2026 compared to fiscal 2025. Professional services revenue increased \$8.0 million, or 12.4%, due to higher sales and service activity as our new and existing customers continue implementing technology to improve their operations.

Gross profit and gross profit margin. Our total gross profit increased \$27.9 million, or 16.2%, in fiscal 2026 and total gross profit margin increased from 62.4% to 62.6% compared to fiscal 2025 driven by changes in the composition of revenue by category. Products gross profit decreased \$2.5 million, or 12.7%, and gross profit margin decreased from 46.6% to 40.9% due to the composition of hardware and proprietary software products delivered. Subscription and maintenance gross profit increased \$30.8 million, or 23.3%, and gross profit margin increased from 78.0% to 79.4% as revenue increases outpaced variable costs as a result of cost optimization discipline. Professional services gross profit decreased \$0.4 million, or 2.2%, and gross profit margin decreased from 31.3% to 27.3% reflecting lower utilization rates due to continued hiring and training of new staff and timing of certain large projects.

Operating expenses

Operating expenses, excluding the charges for legal settlements and other (gains) charges, net increased \$20.4 million, or 14.2%, in fiscal 2026 compared with fiscal 2025. As a percent of total revenue, operating expenses have decreased 0.8% in fiscal 2026 compared with fiscal 2025.

Product development. Product development includes all expenses associated with research and development. Product development increased \$10.3 million, or 16.6%, during fiscal 2026 as compared with fiscal 2025 due to hiring and increased compensation rates across our development teams and increased travel.

Sales and marketing. Sales and marketing increased \$6.6 million, or 20.0%, in fiscal 2026 compared with fiscal 2025 due to hiring and increased compensation rates across our sales teams, sales team additions from the Book4Time acquisition, continued expansion of marketing event and trade show activity, and increased bad debt expense.

General and administrative. General and administrative increased \$1.4 million, or 3.4%, in fiscal 2026 compared to fiscal 2025 due to increased compensation rates across our administrative teams.

Depreciation of fixed assets. Depreciation of fixed assets increased \$0.2 million or 4.4% in fiscal 2026 as compared to fiscal 2025 due to the timing of asset additions and assets reaching their useful life.

Amortization of internal-use software and intangibles. Amortization of internal-use software and intangibles increased \$1.9 million or 48.9% in fiscal 2026 as compared to fiscal 2025 due to the addition of certain intangible assets resulting from the Book4Time acquisition.

Other (gains) charges, net. Other (gains) charges, net changed \$12.3 million due primarily to significant gains from employee retention credits during fiscal 2026 compared to significant acquisition costs related to business combinations during fiscal 2025.

Legal settlements. Legal settlements decreased \$0.6 million during fiscal 2026 compared to fiscal 2025 due to a decrease in certain customer settlements.

Other Income (Expense)

(In thousands)	Year Ended March 31,		Favorable (unfavorable)	
	2026	2025	\$	%
Other income (expense):				
Interest income	\$ 1,992	\$ 3,782	\$ (1,790)	(47.3)%
Interest expense	(493)	(1,529)	1,036	(67.8)%
Other income, net	3,894	791	3,103	392.3%
Total other income, net	\$ 5,393	\$ 3,044	\$ 2,349	77.2%

Interest income. Interest income consists of interest earned on cash equivalents including short-term investments in commercial paper, treasury bills and money market funds.

Interest expense. Interest expense consists of interest charges and unutilized commitment fees under our Credit Agreement and amortization of related debt issuance costs.

Other income, net. Other income, net mainly consists of movement of foreign currencies against the U.S. dollar.

Income Taxes

(In thousands)	Year Ended March 31,		Favorable	
	2026	2025	\$	%
Income tax provision	\$ 9,617	\$ 2,410	\$ 7,207	299.0%
Effective tax rate	19.9%	9.4%		

For fiscal 2026, the effective tax rate was different than the statutory rate due primarily to excess tax benefits associated with share-based compensation, Net Controlled Foreign Corporation Tested Income (NCTI), previously global intangible low-taxed income (GILTI), and U.S. R&D credits.

For fiscal 2025, the effective tax rate was different than the statutory rate due primarily to the benefit of U.S. R&D credits and the release of valuation allowances recorded against foreign deferred tax assets, consisting primarily of Net Operating Losses.

We are consistently subject to tax audits. Due to the nature of examinations in multiple jurisdictions, changes could occur in the amount of gross unrecognized tax benefits during the next 12 months that we cannot anticipate.

The ultimate realization of deferred tax assets depends on various factors including the generation of taxable income during the future periods in which the underlying temporary differences are deductible. As of March 31, 2026, we had \$10.5 million of federal net operating loss carryforwards that expire, if unused, in fiscal year 2039, and \$42.5 million of federal net operating loss carryforwards that can be carried forward indefinitely. We also had \$112.2 million of state net operating loss carryforwards that expire, if unused, in fiscal years 2027 through 2046. We maintain valuation allowances for deferred tax assets until we have sufficient evidence to support the reversal of all or some portion of the allowances. Based on recent earnings and anticipated future earnings, we released valuation allowances previously maintained against our businesses in Singapore and Hong Kong.

Fiscal 2025 Compared to Fiscal 2024

Net Revenue and Operating Income

The following table presents our consolidated revenue and operating results for the fiscal years ended March 31, 2025 and 2024:

(In thousands)	Year Ended March 31,		Increase (decrease)	
	2025	2024	\$	%
Net revenue:				
Products	\$ 41,324	\$ 49,083	\$ (7,759)	(15.8)%
Subscription and maintenance	170,051	138,069	31,982	23.2%
Professional services	64,249	50,312	13,937	27.7%
Total net revenue	275,624	237,464	38,160	16.1%
Cost of goods sold:

Subscription and maintenance	37,464	30,870	6,594	21.4%
Professional services	44,117	36,020	8,097	22.5%
Total cost of goods sold	103,636	93,208	10,428	11.2%
Gross profit	\$ 171,988	\$ 144,256	\$ 27,732	19.2%
Gross profit margin	62.4%	60.7%		
Operating expenses:				
Product development	\$ 62,411	\$ 56,739	\$ 5,672	10.0%
Sales and marketing	33,144	28,439	4,705	16.5%
General and administrative	40,832	36,279	4,553	12.5%
Depreciation of fixed assets	3,679	3,896	(217)	(5.6)%
Amortization of internal-use software and intangibles	3,859	1,366	2,493	182.5%
Other charges, net	4,628	1,756	2,872	163.6%
Legal settlements, net	844	28	816	nm
Operating income	\$ 22,591	\$ 15,753	\$ 6,838	nm
<i>Operating income percentage</i>	8.2%	6.6%		

The following table presents the percentage relationship of our Consolidated Statements of Operations line items to our consolidated net revenues for the periods presented:

	Year Ended March 31,	
	2025	2024
Net revenue:		
Products	15.0%	20.7%
Subscription and maintenance	61.7	58.1
Professional services	23.3	21.2
Total net revenue	100.0%	100.0%
Cost of goods sold:		
Products	8.0%	11.1%
Subscription and maintenance	13.6	13.0
Professional services	16.0	15.2
Total cost of goods sold	37.6%	39.3%
Gross profit	62.4%	60.7%
Operating expenses:		
Product development	22.6%	23.9%
Sales and marketing	12.0	12.0
General and administrative	14.8	15.3
Depreciation of fixed assets	1.3	1.6
Amortization of internal-use software and intangibles	1.4	0.6
Other charges, net	1.7	0.7
Legal settlements, net	0.4	0.0
Operating income	8.2%	6.6%

Net revenue. Total net revenue increased \$38.2 million, or 16.1%, in fiscal 2025 compared to fiscal 2024. Products revenue decreased \$7.8 million, or 15.8%, due to increasing customer preference for subscription-based software licenses instead of perpetual software licenses and to their decreasing need for hardware due to improvements we have made to our technology enabling more support for consumer grade devices our customers can source elsewhere. Subscription and maintenance revenue increased \$32.0 million, or 23.2%, driven by continued growth in subscription-based revenue including service to Book4Time customers. Total subscription revenue increased 39.5% in fiscal 2025 compared to fiscal 2024. Professional services revenue increased \$13.9 million, or 27.7%, due to higher sales and service activity as our new and existing customers continue implementing technology to improve their operations.

Gross profit and gross profit margin. Our total gross profit increased \$27.7 million, or 19.2%, in fiscal 2025 and total gross profit margin increased from 60.7% to 62.4% compared to fiscal 2024 driven by changes in the composition of revenue by category. Products gross profit decreased \$3.5 million, or 15.4%, and gross profit margin increased from 46.4% to 46.6% due to the composition of hardware and proprietary software products delivered. Subscription and maintenance gross profit increased \$25.4 million, or 23.7%, and gross profit margin increased from 77.6% to 78.0% as revenue increases outpaced variable costs due to certain cost control measures. Professional services gross profit increased \$5.8 million, or 40.9%, and gross profit margin increased from 28.4% to 31.3% reflecting improved utilization rates from efficiency gains on multi-solution implementations and revenue associated with a large development service contract.

Operating expenses

Operating expenses, excluding the charges for legal settlements and other charges, increased \$17.2 million, or 13.6%, in fiscal 2025 compared with fiscal 2024. As a percent of total revenue, operating expenses have decreased 1.1% in fiscal 2025 compared with fiscal 2024.

Product development. Product development includes all expenses associated with research and development. Product development increased \$5.7 million, or 10.0%, during fiscal 2025 as compared to fiscal 2024 due to hiring and increased compensation rates across our development teams and increased travel.

Sales and marketing. Sales and marketing increased \$4.7 million, or 16.5%, in fiscal 2025 compared with fiscal 2024 due to hiring and increased compensation rates across our sales and marketing teams, and continued expansion of marketing event and trade show activity.

General and administrative. General and administrative increased \$4.6 million, or 12.5%, in fiscal 2025 compared to fiscal 2024 due to investments in our information security and information technology infrastructure, increased compensation rates across our administrative teams and, during the quarter ended June 30, 2024, payroll taxes associated with certain exercises of stock-settled appreciation rights.

Depreciation of fixed assets. Depreciation of fixed assets decreased \$0.2 million or 5.6% in fiscal 2025 as compared to fiscal 2024 due to the timing of assets reaching their useful life.

Amortization of internal-use software and intangibles. Amortization of internal-use software and intangibles increased \$2.5 million or 182.5% in fiscal 2025 as compared to fiscal 2024 due to the addition of certain intangible assets resulting from the Book4Time acquisition.

Other charges, net. Other charges, net increased \$2.9 million due to a significant increase in acquisition costs related to business combinations and a reduction of gains on asset disposals during fiscal 2025 compared to fiscal 2024.

Legal settlements, net. Legal settlements, net increased \$0.8 million during fiscal 2025 compared to fiscal 2024 due to an increase in certain customer settlements.

Other Income (Expense)

(In thousands)	Year Ended March 31,		Favorable (unfavorable)	
	2025	2024	\$	%

	2025	2024	\$	%
Income tax provision	\$ 2,410	\$ (65,511)	\$ 67,921	nm
Effective tax rate	9.4%	nm		

nm – not meaningful

For fiscal 2025, the effective tax rate was different than the statutory rate due primarily to the benefit of U.S. R&D credits and the release of valuation allowances recorded against foreign deferred tax assets, consisting primarily of Net Operating Losses.

We are consistently subject to tax audits. Due to the nature of examinations in multiple jurisdictions, changes could occur in the amount of gross unrecognized tax benefits during the next 12 months that we cannot anticipate.

The ultimate realization of deferred tax assets depends on various factors including the generation of taxable income during the future periods in which the underlying temporary differences are deductible. As of March 31, 2025, we had \$29.7 million of federal net operating loss carryforwards that expire, if unused, in fiscal years 2036 to 2039, and \$42.5 million of federal net operating loss carryforwards that can be carried forward indefinitely. We also had \$111.5 million of state net operating loss carryforwards that expire, if unused, in fiscal years 2026 through 2043. We maintain valuation allowances for deferred tax assets until we have sufficient evidence to support the reversal of all or some portion of the allowances. Based on recent earnings and anticipated future earnings, we released valuation allowances previously maintained against our businesses in Singapore and Hong Kong.

Liquidity and Capital Resources

Overview

Our primary recurring source of cash is the collection of proceeds from the sale of products and services to our customers, including cash periodically collected in advance of delivery or performance.

Our cash requirements consist primarily of working capital needs, capital expenditures, and payments of contractual obligations. Our contractual obligations consist primarily of operating leases for office space and our Credit Agreement. We disclose our lease obligations in Note 6, *Leases*, to our Consolidated Financial Statements included under Item 8 of this Annual Report.

The Credit Agreement provides for a revolving credit facility in the initial maximum aggregate principal amount of \$75.0 million (the Revolving Facility). The Revolving Facility includes the ability for the Company to request an increase in the commitments under the Revolving Facility by an additional aggregate principal amount of up to \$25.0 million. On the Credit Agreement Closing Date, we drew \$50.0 million on the Revolving Facility, the proceeds of which we used to fund the Business Combination described below. We disclose our Revolving Facility in Note 15, *Debt*, to our Consolidated Financial Statements included under Item 8 of this Annual Report.

We have expanded our business in part by investing in strategic growth through business acquisitions. We have used cash as consideration in our business acquisitions, including \$145.8 million of net cash, partially funded by our Revolving Facility, during the year ended March 31, 2025, to complete the acquisition of Book4Time. We completed no business combinations during the years ended March 31, 2026 and 2024.

At March 31, 2026, 100% of our cash and cash equivalents, of which 94% were held in the United States, were deposited in bank accounts or invested in highly liquid investments including treasury bills with original maturity from the date of acquisition of three months or less and money market funds. We also invest in commercial paper. We determine the fair value of commercial paper using significant other observable inputs based on pricing from independent sources that use quoted prices in active markets for identical assets or other observable inputs including benchmark yields and interest rates. We believe credit risk is limited with respect to our cash and cash equivalents.

We believe that cash flow from operating activities, cash on hand of \$116.9 million as of March 31, 2026, and access to our Revolving Facility and the broader capital markets will provide adequate funds to meet our short- and long-term liquidity requirements.

Cash Flows

(In thousands)	Year Ended March 31,		
	2026	2025	2024
Net cash provided by (used in):			
Operating activities	\$ 69,997	\$ 55,128	\$ 48,186
Investing activities	(1,848)	(148,566)	(7,602)
Financing activities	(24,467)	21,928	(8,558)
Effect of exchange rate changes on cash	171	(340)	23
Increase (decrease) in cash	\$ 43,853	\$ (71,850)	\$ 32,049

Cash flows provided by operating activities. Cash flows provided by operating activities were \$70.0 million in fiscal 2026 due to cash-based earnings of \$77.8 million and a decrease of \$7.8 million from the changes in operating assets and liabilities during fiscal 2026. Cash-based earnings is net income of \$38.8 million and \$39.0 million in non-cash adjustments including depreciation, amortization, share-based compensation, and deferred income taxes.

Cash flows provided by operating activities were \$55.1 million in fiscal 2025. The provision of cash was due to cash-based earnings of \$49.4 million and an increase of \$5.7 million from the changes in operating assets and liabilities. Cash-based earnings is net income of \$23.2 million and \$26.2 million in non-cash adjustments including depreciation, amortization, share-based compensation, and deferred income taxes.

Cash flows provided by operating activities were \$48.2 million in fiscal 2024. The provision of cash was due to cash-based earnings of \$38.2 million and an increase of \$10.0 million from the changes in operating assets and liabilities. Cash-based earnings is net income of \$86.2 million and \$48.0 million in non-cash adjustments including depreciation, amortization, share-based compensation, and deferred income taxes.

Cash flows used in investing activities. Cash flows used in investing activities in fiscal 2026 were \$1.8 million consisting of property and equipment purchases.

Cash flows used in investing activities in fiscal 2025 were \$148.6 million consisting primarily of \$145.8 million in cash paid for business combinations, net of cash acquired, and property and equipment purchases, which decreased during the year ended March 31, 2025 compared to the year ended March 31, 2024 due primarily to leasehold improvements and equipment purchases for our new office lease in Chennai, India during fiscal 2024.

Cash flows used in investing activities in fiscal 2024 were \$7.6 million due to \$8.1 million in purchases of property and equipment, including internal use software and \$0.5 million in cash received from the sale of fixed assets located at our India research and development center.

Cash flows provided by (used in) financing activities. Cash flows used in financing activities in fiscal 2026 were \$24.5 million due to debt repayments of \$24.0 million, proceeds from Employee Stock Purchase Plan purchases of \$1.5 million, and share repurchases of \$2.0 million to satisfy employee tax withholding on share-based compensation.

Cash flows provided by financing activities in fiscal 2025 were \$21.9 million due to \$49.6 million in debt proceeds, net of issuance costs, debt repayments of \$26.0 million, proceeds from Employee Stock Purchase Plan purchases of \$1.0 million, and share repurchases of \$2.7 million to satisfy employee tax withholding on share-based compensation.

Cash flows used in financing activities in fiscal 2024 were \$8.6 million due to share repurchases of \$6.9 million to satisfy employee tax withholding on share-based compensation, and \$1.7 million in preferred stock dividends.

Investments

Investments in Corporate-Owned Life Insurance Policies

Agilysys invests in corporate-owned life insurance policies for certain former executives, for which some are endorsement split-dollar life insurance arrangements. We entered into agreements with each of the former executives, whereby we must maintain the life insurance policy for a specified amount and split a portion of the policy benefits with their designated beneficiary. Our investment in these corporate-owned life insurance policies were recorded at their cash surrender value, which approximates fair value at the balance sheet date. On the Consolidated Balance Sheets at the balance sheet date, the cash surrender value of \$1.1 million for the remaining policies were held in "Other non-current assets," and the present value of future proceeds owed to those executives' designated beneficiary of \$0.1 million, which approximates fair value, were recorded within "Other non-current liabilities" in the Consolidated Balance Sheets at the balance sheet date.

Off-Balance Sheet Arrangements

We have not entered into any off-balance sheet arrangements that have had or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

Critical Accounting Policies

Managements' Discussion and Analysis is based upon our Consolidated Financial Statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make significant estimates and judgments that affect the reported amounts of assets, liabilities, revenue, and expenses and related disclosure of contingent assets and liabilities. We regularly evaluate our estimates, including those related to bad debts, inventories, investments, intangible assets, income taxes, restructuring, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Our most significant accounting policies relate to the sale, purchase, and promotion of our products and services. The policies discussed below are considered by management to be critical to an understanding of our Consolidated Financial Statements because their application places the most significant demands on management's judgment, with financial reporting results relying on estimation about the effect of matters that are inherently uncertain. Specific risks for these critical accounting policies are described in the following paragraphs.

For all these policies, management cautions that future events rarely develop exactly as forecasted, and the best estimates routinely require adjustment.

Revenue recognition. We derive revenue from the sale of products (proprietary software licenses, third party hardware and operating systems), subscription and maintenance, and professional services.

Our customary business practice is to enter into legally enforceable written contracts with our customers. The majority of our contracts are governed by a master service or universal agreement between us and the customer, which sets forth the general terms and conditions of any individual contract between the parties, which is then supplemented by a customer order to specify the different goods and services, the associated prices, and any additional terms for an individual contract. Performance obligations specific to each individual contract are defined within the terms of each order. Each performance obligation is identified based on the goods and services that will be transferred to our customer that are both capable of being distinct and are distinct within the context of the contract. The transaction price is determined based on the consideration to which we will be entitled and expect to receive in exchange for transferring goods or services to the customer. Typically, our contracts do not provide our customer with any right of return or refund; we do not constrain the contract price as it is probable that there will not be a significant revenue reversal due to a return or refund.

Typically, our customer contracts contain one or more of the following goods or services which constitute performance obligations.

Our proprietary software licenses typically provide for a perpetual right to use our software. Generally, our contracts do not provide significant services of integration and customization, and installation services are not required to be purchased directly from us. The software is delivered before related services are provided and is functional without professional services, updates and technical support. We have concluded that the software license is distinct as the customer can benefit from the software on its own. Software revenue is typically recognized when the software is delivered or made available for download to the customer.

We recognize revenue for hardware sales when the product is shipped to the customer and when obligations that affect the customer's final acceptance of the arrangement have been fulfilled. Hardware is purchased from suppliers and provided to the end-user customers via drop-ship or from inventory. We are responsible for negotiating price both with the supplier and the customer, payment to the supplier, establishing payment terms and product returns with the customer, and we bear the credit risk if the customer does not pay for the goods. As the principal contact with the customer, we recognize revenue and cost of goods sold when we ship or are notified by the supplier that the product has been shipped. In certain limited instances, as shipping terms dictate, revenue is recognized upon receipt at the point of destination or upon installation at the customer site.

Our subscription service revenue is comprised of fees for contracts that provide customers a right to access our software for a subscribed period. We do not provide the customer the contractual right to license the software at any time outside of the subscription period under these contracts. Our subscription service revenue is primarily based on rates per location, including rates per points of sale and per room. We recognize certain subscription service revenue on a per-transaction basis. The customer can only benefit from the software and software maintenance when provided the right to access the software. Accordingly, each of the rights to access the software, the maintenance services, any hosting services, and any transaction-based services are not considered a distinct performance obligation in the context of the contract and should be combined into a single performance obligation to be recognized over the contract period. The Company recognizes subscription revenue over monthly periods based on the typical service, invoicing and renewal cycle in accordance with our customer agreement terms.

We derive maintenance service revenue from providing unspecified updates, upgrades, bug fixes, and technical support services for our proprietary software. These services represent a stand-ready obligation that is concurrently delivered and has the same pattern of transfer to the customer; we account for these maintenance services as a single performance obligation. Maintenance revenue includes the same services provided by third-parties for remarketed software. We recognize substantially all maintenance revenue over the contract period of the maintenance agreement. We also recognize certain maintenance service revenue based on the volume of payment transactions processed by third parties through access to our software.

Professional services revenue primarily consists of fees for consulting, implementation, installation, integration and training and are generally recognized over time as the customer simultaneously receives and consumes the benefits of the professional services as the services are being performed. Certain professional development services are recognized upon delivery of the developed solutions to the customer. At the end of each reporting period, we recognize the most likely amount of variable consideration on any contract holdbacks we expect to bill for development services delivered. Professional services can be provided by internal or external providers, do not significantly affect the customer's ability to access or use other provided goods or services, and provide a measure of benefit beyond that of other promised goods or services in the contract. As a result, professional services are considered distinct in the context of the contract and represent a separate performance obligation. Professional services that are billed on a time and materials basis are recognized over time as the services are performed. For contracts billed on a fixed price basis, revenue is recognized over time using an input method based on labor hours expended to date relative to the total labor hours expected to be required to satisfy the related performance obligation.

We use the market approach to derive standalone selling price (SSP) by maximizing observable data points (in the form of recently executed customer contracts) to determine the price customers are willing to pay for the goods and services transferred. Shipping and handling fees billed to customers are recognized as revenue and the related costs are recognized in cost of goods sold. Revenue is recorded net of any applicable taxes collected and remitted to governmental agencies.

Share-based compensation. We have an equity incentive plan under which we may grant non-qualified stock options, incentive stock options, stock-settled stock appreciation rights, restricted shares, restricted stock units and performance shares. Shares issued pursuant to awards under this plan may be made out of treasury or authorized but unissued shares.

We record compensation expense related to stock-settled stock appreciation rights, restricted shares, restricted stock units, performance shares, and employee stock purchase plan shares granted to certain employees and non-employee directors based on the fair value of the awards on the grant date. The fair value of restricted share and restricted stock unit grants subject only to a service condition is based on the closing price of our common shares on the grant date. For stock option and stock-settled appreciation right grants subject only to a service condition, we estimate the fair value on the grant date using the Black-Scholes-Merton option pricing model with inputs including the closing market price at grant date, exercise price and assumptions regarding the risk-free interest rate, expected volatility of our common shares based on historical volatility, and expected term as estimated using the simplified method. For employee stock purchase plan grants, we estimate the fair value on the grant date using the Black-Scholes-Merton option pricing model with inputs including the closing market price at grant date and assumptions regarding the risk-free interest rate, expected term, and expected volatility of our common shares over the offering period based on historical volatility. For restricted share, restricted stock unit and SSAR grants subject to a market condition, we estimate the fair value on the grant date through a lattice option pricing model that utilizes a Monte Carlo analysis with inputs including the closing market price at grant date, share price threshold, performance period term and assumptions regarding the risk-free interest rate and expected volatility of our common shares based on historical volatility. Inputs for SSAR grants subject to a market condition also include exercise price, remaining contractual term, and suboptimal exercise factor. Forfeitures of awards are recognized as they occur. Additional information regarding the assumptions used to value share-based compensation awards is provided in Note 13, *Share-Based Compensation*, to our Consolidated Financial Statements included under Item 8 of this Annual Report.

Accounting Pronouncements

See Note 2, *Summary of Significant Accounting Policies*, to our Consolidated Financial Statements included under Item 8 of this Annual Report for additional information about accounting pronouncements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

We have assets, liabilities, and cash flows in foreign currencies creating foreign exchange risk. We sell products and services internationally and enter into transactions denominated in foreign currencies. As a result, we are subject to the variability that arises from exchange rate movements. For the fiscal years 2026, 2025 and 2024, revenue from international operations was 7%, 10% and 6%, respectively, of total revenue. The effects of foreign currency on operating results did not have a material impact on our results of operations for the 2026, 2025 and 2024 fiscal years. Fluctuations in the value of other currencies could materially impact our revenue, expenses, operating profit and net income.

Item 8. Financial Statements and Supplementary Data.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
Agilysys, Inc.

Opinion on the financial statements

We have audited the accompanying consolidated balance sheets of Agilysys, Inc. (a Delaware corporation) and subsidiaries (the “Company”) as of March 31, 2026 and 2025, the related consolidated statements of operations, comprehensive income, cash flows, and shareholders’ equity for each of the three years in the period ended March 31, 2026, and the related notes and financial statement schedule included under Item 15(a) (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2026 and 2025, and the results of its operations and its cash flows for each of the three years in the period ended March 31, 2026, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of March 31, 2026, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”), and our report dated May 21, 2026 expressed an unqualified opinion.

Basis for opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical audit matters

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there are no critical audit matters.

/s/ GRANT THORNTON LLP

We have served as the Company’s auditor since 2015.

Atlanta, Georgia
May 21, 2026

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
Agilysys, Inc.

Opinion on internal control over financial reporting

We have audited the internal control over financial reporting of Agilysys, Inc. (a Delaware corporation) and subsidiaries (the “Company”) as of March 31, 2026, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2026, based on criteria established in the 2013 *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the consolidated financial statements of the Company as of and for the year ended March 31, 2026, and our report dated May 21, 2026 expressed an unqualified opinion on those financial statements.

Basis for opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and limitations of internal control over financial reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

See accompanying notes to consolidated financial statements.

Notes to Consolidated Financial Statements

(Table amounts in thousands, except per share data)

1. Nature of Operations

Agilysys has been a leader in hospitality software for more than 45 years, delivering innovative cloud-native SaaS and on-premise solutions for hotels, multi-amenity resorts, cruise lines, casinos, corporate foodservice management, restaurants, universities, stadiums, and healthcare facilities. The Company's software solutions include point-of-sale (POS), property management (PMS), inventory and procurement, payments, and related applications that manage and enhance the entire guest journey. Agilysys is also known for its world-class customer-centric service. Many of the top hospitality companies around the world use Agilysys solutions to improve guest loyalty, drive revenue growth, and increase operational efficiencies. Agilysys operates across the Americas, Europe, the Middle East, Africa, Asia-Pacific, and India with headquarters located in Alpharetta, GA.

The Company has one reportable segment serving the global hospitality industry.

Reference herein to any particular year or quarter refers to periods within the fiscal year ended March 31. For example, fiscal 2026 refers to the fiscal year ended March 31, 2026.

2. Summary of Significant Accounting Policies

Principles of consolidation. The consolidated financial statements include the accounts of Agilysys, Inc. and subsidiaries. Investments in affiliated companies are accounted for by the equity or cost method, as appropriate. All inter-company accounts have been eliminated.

Use of estimates. Preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods. Actual results could differ from those estimates.

Cash and cash equivalents. 100% of our cash and cash equivalents, of which 94% were held in the United States, were deposited in bank accounts or invested in highly liquid investments. Certain bank account balances may exceed federally insured limits. We consider all highly liquid investments purchased with an original maturity from date of acquisition of three months or less to be cash equivalents. Other highly liquid investments considered cash equivalents with no established maturity date are fully redeemable on demand (without penalty) with settlement of principal and accrued interest on the same or following business day after instruction to redeem. Cash equivalent investments are readily convertible to cash with no penalty and can include certificates of deposit, commercial paper, treasury bills, money market funds and other investments. We determine the fair value of certificates of deposit, treasury bills and money market funds using quoted market prices in active markets for identical assets (level 1 inputs). We determine the fair value of commercial paper using significant other observable inputs (level 2) based on pricing from independent sources that use quoted prices in active markets for identical assets or other observable inputs including benchmark yields and interest rates.

Allowance for expected credit losses. We maintain allowances for expected credit losses for estimated losses resulting from the inability or unwillingness of our customers to make required payments. We base our expected credit loss model on historical experience, adjusted for current conditions and reasonable and supportable forecasts. To help mitigate the associated credit risk, we perform periodic credit evaluations of our customers.

Customer credit allowance. We maintain allowances for estimated customer credits. Credits are typically due to the timing or amount of customer invoices processed for specific services, including professional and subscription, and maintenance coverage. In certain cases, there has not been clear or timely communication of the need to adjust coverage or service at a location in advance of when we invoice for the associated coverage or service. We will issue a credit after agreeing to the service or coverage adjustment as requested by the customer within the terms of our contract.

Inventories. Our inventories are comprised of finished goods. Inventories are stated at the lower of cost or net realizable value, net of related reserves. The cost of inventory is computed using a weighted-average method. Our inventory is monitored to ensure appropriate valuation. Adjustments of inventories to the lower of cost or net realizable value, if necessary, are based upon contractual provisions such as turnover and assumptions about future demand and market

conditions. If assumptions about future demand change and/or actual market conditions are less favorable than those projected by management, additional adjustments to inventory valuations may be required. We provide a reserve for obsolescence, which is calculated based on several factors, including an analysis of historical sales of products and the age of the inventory. Actual amounts could be different from those estimated.

Leases. We determine if an arrangement is or contains a lease at inception. Operating leases are presented as Right-of-Use (ROU) assets and the corresponding lease liabilities are included in operating lease liabilities – current and operating lease liabilities – non-current on our Consolidated Balance Sheet. ROU assets represent our right to use the underlying asset, and lease liabilities represent our obligation for lease payments in exchange for the ability to use the asset for the duration of the lease term.

ROU assets and lease liabilities are recognized at commencement date and determined using the present value of the remaining lease payments over the lease term. We use an incremental borrowing rate based on estimated rate of interest for collateralized borrowing since our leases do not include an implicit interest rate. The estimated incremental borrowing rate considers market data, actual lease economic environment, and actual lease term at commencement date. The lease term may include options to extend when it is reasonably certain that we will exercise that option. ROU assets include lease payments made in advance, and exclude any incentives received or initial direct costs incurred. We recognize lease expense on a straight-line basis over the lease term.

We have lease agreements with lease and non-lease components which we account for as a single lease component. We also have leases which include variable lease payments, which are expensed as incurred. Our variable lease payments are not based on an index or rate and therefore are excluded from the calculation of lease liabilities. We have elected to not recognize short term leases that have a term of twelve months or less as ROU assets or lease liabilities. Our short-term leases are not material and do not have a material impact on our ROU assets or lease liabilities. Additionally, we do not have any covenants, residual value guarantees, or related party transactions associated with our lease agreements.

Goodwill and other indefinite-lived intangible assets. Goodwill represents the excess purchase price paid over the fair value of the net assets of acquired companies. As of March 31, 2026 and 2025, the carrying amount of goodwill was \$133.9 million and \$130.6 million, respectively. Goodwill is tested for impairment on an annual basis, or in interim periods if indicators of potential impairment exist, based on our one reporting unit. The Company evaluates whether goodwill is impaired by comparing its market capitalization based on its closing stock price (Level 1 input) to the book value of its equity on the annual evaluation date. The Company is also required to compare the fair values of other indefinite-lived intangible assets to their carrying amounts at least annually, or when current events and circumstances require an interim assessment. The Company concluded that no impairment of its goodwill and other indefinite-lived assets has occurred for the years ended March 31, 2026, 2025 and 2024.

Acquired intangible assets. Acquired intangible assets include identifiable customer relationships, non-competition agreements, developed technology, and trade names. We amortize the cost of finite-lived identifiable intangible assets over their estimated useful lives, which are periods of 20 years or less, primarily on a straight-line basis, which we believe approximates the pattern in which the assets are utilized. The fair values assigned to identifiable intangible assets acquired in business combinations are determined primarily by using the income approach, which discounts expected future cash flows attributable to these assets to present value using estimates and assumptions determined by management.

Long-lived assets. Property and equipment are recorded at cost. Major renewals and improvements are capitalized. Minor replacements, maintenance, repairs, and reengineering costs are expensed as incurred. When assets are sold or otherwise disposed of, the cost and related accumulated depreciation are eliminated from the accounts and any resulting gain or loss is recognized.

Depreciation and amortization are provided in amounts sufficient to amortize the cost of the assets over their estimated useful lives using the straight-line method. The estimated useful lives for depreciation and amortization are as follows: buildings and building improvements – 7 to 30 years; furniture – 7 to 10 years; equipment – 3 to 10 years; software – 3 to 10 years; and leasehold improvements over the shorter of the economic life or the lease term. Internal use software costs are expensed or capitalized depending on the project stage. Amounts capitalized are amortized over the estimated useful lives of the software, ranging from 3 to 10 years, beginning with the project's completion. Depreciation for capitalized project expenditures does not begin until the underlying project is completed.

We evaluate the recoverability of our long-lived assets whenever changes in circumstances or events may indicate that the carrying amounts may not be recoverable. An impairment loss is recognized in the event the carrying value of the assets

exceeds the future undiscounted cash flows attributable to such assets. Our long-lived assets and impairments considerations are discussed further in Note 4, *Property and Equipment, Net*.

Foreign currency translation. The financial statements of our foreign operations are translated into U.S. dollars for financial reporting purposes. The assets and liabilities of foreign operations whose functional currencies are not in U.S. dollars are translated at the period-end exchange rates, while revenue and expenses are translated at weighted-average exchange rates during the fiscal year. The cumulative translation effects are reflected as a component of “Accumulated other comprehensive income (loss)” within shareholders’ equity on the Consolidated Balance Sheets. Gains and losses on monetary transactions denominated in other than the functional currency of an operation are reflected within “Other income (expense), net” in the Consolidated Statements of Operations. Foreign currency gains and losses from changes in exchange rates have not been material to our consolidated operating results.

Revenue recognition. We derive revenue from the sale of products (proprietary software licenses, third party hardware and operating systems), subscription and maintenance, and professional services.

Our customary business practice is to enter into legally enforceable written contracts with our customers. The majority of our contracts are governed by a master service or universal agreement between us and the customer, which sets forth the general terms and conditions of any individual contract between the parties, which is then supplemented by a customer order to specify the different goods and services, the associated prices, and any additional terms for an individual contract. Performance obligations specific to each individual contract are defined within the terms of each order. Each performance obligation is identified based on the goods and services that will be transferred to our customer that are both capable of being distinct and are distinct within the context of the contract. The transaction price is determined based on the consideration to which we will be entitled and expect to receive in exchange for transferring goods or services to the customer. Typically, our contracts do not provide our customer with any right of return or refund; we do not constrain the contract price as it is probable that there will not be a significant revenue reversal due to a return or refund.

Typically, our customer contracts contain one or more of the following goods or services which constitute performance obligations.

Our proprietary software licenses typically provide for a perpetual right to use our software. Generally, our contracts do not provide significant services of integration and customization, and installation services are not required to be purchased directly from us. The software is delivered before related services are provided and is functional without professional services, updates and technical support. We have concluded that the software license is distinct as the customer can benefit from the software on its own. Software revenue is typically recognized when the software is delivered or made available for download to the customer.

We recognize revenue for hardware sales when the product is shipped to the customer and when obligations that affect the customer’s final acceptance of the arrangement have been fulfilled. Hardware is purchased from suppliers and provided to the end-user customers via drop-ship or from inventory. We are responsible for negotiating price both with the supplier and the customer, payment to the supplier, establishing payment terms and product returns with the customer, and we bear the credit risk if the customer does not pay for the goods. As the principal contact with the customer, we recognize revenue and cost of goods sold when we ship or are notified by the supplier that the product has been shipped. In certain limited instances, as shipping terms dictate, revenue is recognized upon receipt at the point of destination or upon installation at the customer site.

Our subscription service revenue is comprised of fees for contracts that provide customers a right to access our software for a subscribed period. We do not provide the customer the contractual right to license the software at any time outside of the subscription period under these contracts. Our subscription service revenue is primarily based on rates per location, including rates per points of sale and per room. We recognize certain subscription service revenue on a per-transaction basis. The customer can only benefit from the software and software maintenance when provided the right to access the software. Accordingly, each of the rights to access the software, the maintenance services, any hosting services, and any transaction-based services are not considered a distinct performance obligation in the context of the contract and should be combined into a single performance obligation to be recognized over the contract period. The Company recognizes subscription revenue over monthly periods based on the typical service, invoicing and renewal cycle in accordance with our customer agreement terms.

We derive maintenance service revenue from providing unspecified updates, upgrades, bug fixes, and technical support services for our proprietary software. These services represent a stand-ready obligation that is concurrently delivered and has the same pattern of transfer to the customer; we account for these maintenance services as a single performance obligation. Maintenance revenue includes the same services provided by third-parties for remarketed software. We recognize substantially all maintenance revenue over the contract period of the maintenance agreement. We also recognize certain maintenance service revenue based on the volume of payment transactions processed by third parties through access to our software.

Professional services revenue primarily consists of fees for consulting, implementation, installation, integration and training and are generally recognized over time as the customer simultaneously receives and consumes the benefits of the professional services as the services are being performed. Certain professional development services are recognized upon delivery of the developed solutions to the customer. At the end of each reporting period, we recognize the most likely amount of variable consideration on any contract holdbacks we expect to bill for development services delivered. Professional services can be provided by internal or external providers, do not significantly affect the customer's ability to access or use other provided goods or services, and provide a measure of benefit beyond that of other promised goods or services in the contract. As a result, professional services are considered distinct in the context of the contract and represent a separate performance obligation. Professional services that are billed on a time and materials basis are recognized over time as the services are performed. For contracts billed on a fixed price basis, revenue is recognized over time using an input method based on labor hours expended to date relative to the total labor hours expected to be required to satisfy the related performance obligation.

We use the market approach to derive standalone selling price (SSP) by maximizing observable data points (in the form of recently executed customer contracts) to determine the price customers are willing to pay for the goods and services transferred. Shipping and handling fees billed to customers are recognized as revenue and the related costs are recognized in cost of goods sold. Revenue is recorded net of any applicable taxes collected and remitted to governmental agencies.

Comprehensive income. Comprehensive income is the total of net income, as currently reported under GAAP, plus other comprehensive income (loss). Other comprehensive income considers the effects of additional transactions and economic events that are not required to be recorded in determining net income, but rather are reported as a separate statement of comprehensive income.

Fair value measurements. We measure the fair value of financial assets and liabilities on a recurring or non-recurring basis. Financial assets and liabilities measured on a recurring basis are those that are adjusted to fair value each time a financial statement is prepared. Financial assets and liabilities measured on a non-recurring basis are those that are adjusted to fair value when a significant event occurs. In determining fair value of financial assets and liabilities, we use various valuation techniques.

Investments in corporate-owned life insurance policies. Agilysys invests in corporate-owned life insurance policies, for which some are endorsement split-dollar life insurance arrangements. We entered into agreements with certain former executives, whereby we must maintain the life insurance policy for a specified amount and split a portion of the policy benefits with their respective designated beneficiary. Our investment in these corporate-owned life insurance policies were recorded at their cash surrender value, which approximates fair value at the balance sheet date. In the Consolidated Balance Sheets at the balance sheet date, the cash surrender value of \$1.1 million for the remaining policies were held in "Other non-current assets," and the present value of future proceeds owed to those executives' designated beneficiary of \$0.1 million, which approximates fair value, were recorded within "Other non-current liabilities." Additional information regarding the investments in corporate-owned life insurance policies is provided in Note 10, *Employee Benefit Plans*.

Income Taxes. Income tax expense includes U.S. and foreign income taxes and is based on reported income before income taxes. We recognize deferred tax assets and liabilities based on the differences between the financial statement carrying amounts and the tax basis of assets and liabilities. The deferred tax assets and liabilities are determined based on the enacted tax rates expected to apply in the periods in which the deferred tax assets or liabilities are anticipated to be settled or realized.

We regularly review our deferred tax assets for recoverability and establish a valuation allowance if it is more likely than not that some portion, or all, of a deferred tax asset will not be realized. The determination as to whether a deferred tax asset will be realized is made on a jurisdictional basis and is based on the evaluation of positive and negative evidence. This evidence includes historical taxable income, projected future taxable income, the expected timing of the reversal of existing temporary differences and the implementation of tax planning strategies.

We recognize the tax benefit from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized from uncertain tax positions are measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. No tax benefits are recognized for positions that do not meet this threshold. Interest related to uncertain tax positions is recognized as part of the provision for income taxes and is accrued beginning in the period that such interest would be applicable under relevant tax law until such time that the related tax benefits are recognized. Our income taxes are described further in Note 9, *Income Taxes*.

Advertising and Promotion Expense. We expense advertising and promotion expense as incurred. Advertising and promotion expense was \$8.3 million, \$7.2 million and \$6.7 million in fiscal 2026, 2025 and 2024, respectively.

Recently Adopted and Issued Accounting Pronouncements

In December 2025, the Financial Accounting Standards Board FASB issued ASU No. 2025-10, *Government Grants (Topic 832): Accounting for Government Grants Received by Business Entities* (ASU 2025-10) to establish authoritative guidance on how to recognize, measure, and present government grants received by business entities. ASU 2025-10 is effective for annual periods beginning after December 15, 2028, or our fiscal 2030, and interim reporting periods within those annual reporting periods. The ASU may be applied using a modified prospective, modified retrospective or retrospective approach with early adoption permitted in an interim or annual reporting period. If an entity early adopts in an interim reporting period, it must adopt as of the beginning of the annual reporting period that includes that interim reporting period. We adopted ASU 2025-10 under the modified prospective approach effective as of April 1, 2025 – see Note 9, *Income Taxes*.

In September 2025, the FASB issued ASU No. 2025-06, *Intangibles-Goodwill and Other-Internal Use Software (Subtopic 350-40): Targeted Improvements to the Accounting for Internal-Use Software* (ASU 2025-06), which removes all references to software development stages and clarifies the threshold entities apply to begin capitalizing costs. ASU 2025-06 is effective for annual periods beginning after December 15, 2027, or our fiscal 2029, and interim reporting periods within those annual reporting periods. The ASU may be applied prospectively, retrospectively or through a modified transition approach with early adoption permitted. We are currently evaluating the potential impact the ASU may have on our Consolidated Financial Statements upon adoption.

In November 2024, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2024-03 *Income Statement—Reporting Comprehensive Income—Expense Disaggregation Disclosures* (ASU 2024-03) to expand expense disclosures by requiring disaggregated disclosure of certain income statement expense line items, including those that contain purchases of inventory, employee compensation, depreciation and amortization. ASU 2024-03 is effective for fiscal years beginning after December 15, 2026, or our fiscal 2028, and subsequent interim periods, with early adoption permitted. The amendments should be applied prospectively, but retrospective application is permitted. The ASU will likely result in additional disclosures upon adoption.

In December 2023, the FASB issued ASU No. 2023-09 *Income Taxes (Topic 740): Improvements to Income Tax Disclosures* (ASU 2023-09) to update income tax disclosure requirements primarily by requiring specific categories and greater disaggregation within the rate reconciliation and disaggregation of income taxes paid by jurisdiction. The amendments in the ASU also remove disclosures related to certain unrecognized tax benefits and deferred taxes. ASU 2023-09 is effective for fiscal years beginning after December 15, 2024, or our fiscal 2026. We adopted ASU 2023-09 prospectively during the fourth quarter of our fiscal 2026. Since the standard only impacts disclosure requirements, the adoption of the standard did not impact our consolidated financial statements. See Note 9, *Income Taxes*.

3. Revenue Recognition

For in depth discussion regarding our revenue recognition procedures for our revenue streams, see Note 2, *Summary of Significant Accounting Policies*.

Disaggregation of Revenue

We derive and report our revenue from the sale of products (proprietary software licenses, third party hardware and operating systems), subscription and maintenance, and professional services. Revenue recognized at a point in time (products) totaled \$41.2 million, \$41.3 million, and \$49.1 million during fiscal 2026, 2025 and 2024, respectively. Subscription, maintenance, and substantially all professional services revenue recognized over time totaled \$278.1 million, \$234.3 million, and \$188.4 million during fiscal 2026, 2025, and 2024, respectively.

Contract Balances

Contract assets are rights to consideration in exchange for goods or services that we have transferred to a customer when that right is conditional on something other than the passage of time. The majority of our contract assets represent unbilled amounts related to products and professional services. We expect billing and collection of our contract assets to occur within the next twelve months. Payment terms and conditions vary by contract and customer, although terms generally include a requirement to pay within 30 days after invoicing. We receive payments from customers based upon contractual billing schedules, and accounts receivable are recorded when the right to consideration becomes unconditional. Contract liabilities represent consideration received or consideration which is unconditionally due from customers prior to transferring goods or services to the customer under the terms of the contract.

Revenue recognized from amounts included in contract liabilities at the beginning of the period was \$69.5 million and \$55.1 million during fiscal 2026 and 2025, respectively. During fiscal 2026 and 2025, we transferred from contract assets at the beginning of the period, \$4.5 million and \$2.3 million, respectively, to accounts receivable because the right to the consideration became unconditional.

Remaining Performance Obligations

Remaining performance obligations represent the transaction price of contracts for which products have not been delivered or services have not been performed. As of March 31, 2026, the aggregate amount of the transaction price allocated to remaining performance obligations for contracts greater than one year was approximately \$152 million. The Company expects to recognize 42%, 30%, and 17% of the transaction price allocated to remaining performance obligations within the 12, 24, and 36 months following March 31, 2026, and the rest thereafter in our Consolidated Statements of Operations. The majority of our professional services are expected to be recognized over the next 12 months but this is contingent upon a number of factors, including customers' needs and schedules. We exclude remaining performance obligations for contracts where variable consideration is directly allocated based on usage or when the original expected duration is one year or less.

Assets Recognized from Costs to Obtain a Contract

Sales commission expenses that would not have occurred absent the customer contracts are considered incremental costs to obtain a contract. We have elected to take the practical expedient available to expense the incremental costs to obtain a contract as incurred when the expected benefit and amortization period is one year or less. For subscription contracts that are renewed monthly based on an agreement term, we capitalize commission expenses and amortize as we satisfy the underlying performance obligations, generally based on the contract terms and anticipated renewals. For first year support and maintenance service contracts, commission expenses are immaterial and therefore are expensed as incurred. Other sales commission expenses are not material or have a period of benefit of one year or less, and are therefore expensed as incurred in line with the practical expedient elected.

We had \$8.1 million and \$5.8 million of capitalized sales incentive costs as of March 31, 2026 and 2025, respectively. These balances are included in other non-current assets on our Consolidated Balance Sheets. During fiscal 2026 and 2025, we expensed \$4.9 million and \$4.0 million, respectively, of sales commissions, which included amortization of capitalized amounts of \$2.3 million and \$1.8 million, respectively. These expenses are included in operating expenses – sales and marketing in our Consolidated Statements of Operations. All other costs to obtain a contract are not considered incremental and therefore are expensed as incurred.

4. Property and Equipment, Net

Property and equipment at March 31, 2026 and 2025 is as follows:

(In thousands)	Year Ended March 31,	
	2026	2025
Furniture and equipment	\$ 17,459	\$ 17,190
Software	16,483	16,474
Leasehold improvements	8,990	9,023
Facilities construction in progress	63	286
	42,995	42,973
Accumulated depreciation and amortization	(29,045)	(26,255)
Property and equipment, net	\$ 13,950	\$ 16,718

Total depreciation expense on property and equipment was \$3.8 million, \$3.7 million, and \$3.9 million during fiscal 2026, 2025 and 2024, respectively.

The Company capitalizes internal-use software as property and equipment under ASC 350-40, *Internal-Use Software*. Total amortization expense on capitalized internal-use software was \$0.3 million, \$0.3 million, and \$0.3 million during fiscal 2026, 2025, and 2024, respectively.

5. Intangible Assets, Goodwill, and Software Development Costs

The following table summarizes our intangible assets and software development costs at March 31, 2026, and 2025:

(In thousands)	March 31, 2026				March 31, 2025			
	Gross carrying amount	Accumulated amortization	Accumulated impairment	Net carrying amount	Gross carrying amount	Accumulated amortization	Accumulated impairment	Net carrying amount
Finite-lived intangible assets:								
Customer relationships	\$ 54,793	\$ (16,159)	\$ —	\$ 38,634	\$ 53,763	\$ (13,745)	\$ —	\$ 40,018
Non-competition agreements	8,845	(6,366)	—	2,479	8,669	(4,522)	—	4,147
Developed technology	13,691	(11,860)	—	1,831	13,597	(11,178)	—	2,419
Trade names	17,700	(2,685)	—	15,015	17,201	(1,383)	—	15,818
Patented technology	80	(80)	—	—	80	(80)	—	—
	95,109	(37,150)	—	57,959	93,310	(30,908)	—	62,402
Indefinite-lived trade names	8,400	N/A	—	8,400	8,400	N/A	—	8,400
Total intangible assets	\$ 103,509	\$ (37,150)	\$ —	\$ 66,359	\$ 101,710	\$ (30,908)	\$ —	\$ 70,802
Software development costs								
Software development costs	\$ 67,541	\$ (45,535)	\$ (22,006)	\$ —	\$ 67,541	\$ (45,535)	\$ (22,006)	\$ —

During the year ended March 31, 2026, goodwill increased \$3.3 million due to foreign currency translation. During the year ended March 31, 2025, goodwill increased \$104.0 million due to business combination activity and decreased \$6.2 million due to foreign currency translation.

During the year ended March 31, 2026, finite-lived intangible assets decreased \$6.1 million due to amortization expense and increased \$1.7 million due to foreign currency translation. During the year ended March 31, 2025, finite-lived intangible assets increased \$61.0 million due to business combination activity and decreased \$4.0 million and \$3.1 million due to amortization expense and foreign currency translation, respectively. We recognize amortization expense of developed technology in cost of goods sold.

See Note 16, *Business Combination*, for more information on business combination activity.

Estimated future amortization expense on finite-lived intangible assets is as follows:

(In thousands)	Estimated Amortization Expense	
Fiscal year ending March 31,		
2027	\$	5,991
2028		4,660
2029		3,972
2030		3,660
2031		3,464
Thereafter		36,212
Total	\$	57,959

Indefinite-lived intangible assets, comprised of our purchased trade name InfoGenesis as of March 31, 2026 and 2025 are tested for impairment upon identification of impairment indicators or at least annually. An impairment loss is recognized if the carrying amount is greater than fair value. The InfoGenesis indefinite-lived purchased trade name impairment testing resulted in a fair value exceeding the carrying amount for each of the years ending March 31, 2026, 2025 and 2024.

6. Leases

The majority of our leases are comprised of real estate leases for our respective offices around the globe. We have no residual value guarantees or restrictions or covenants imposed by or associated with our active leases.

As of March 31, 2026, we have additional operating leases that have not yet commenced of approximately \$1.4 million. These operating leases are expected to commence in fiscal year 2027 with initial lease terms of approximately 2 to 5 years. We do not have any related party leases. We have variable payments for expenses such as common area maintenance and taxes. We do not have variable payments that are based on an index or rate. As a result, we do not include variable payments in the calculation of the lease liability. Any variable costs are expensed as incurred.

The components of lease expenses, which are included in operating expenses in our Consolidated Statements of Operations, were as follows:

(In thousands)	Year Ended March 31,	
	2026	2025
Operating leases expense	\$ 5,375	\$ 5,084
Variable lease costs	529	413
Short term lease expense	775	563
Total lease expense	\$ 6,679	\$ 6,060

We had no finance leases during fiscal 2026 or 2025. Other information related to operating leases for fiscal 2026 and 2025 was as follows:

Supplemental cash flow information	Year Ended March 31,	
	2026	2025
Cash paid for amounts included in the measurement of lease liabilities (in thousands)	\$ 5,654	\$ 4,673
ROU assets obtained in exchange for lease obligations (in thousands)	\$ 1,195	\$ 2,351
Weighted average remaining lease terms	5.21	5.78
Weighted average discount rates	7.04%	6.91%

The table below reconciles the undiscounted future minimum lease payments (displayed by year and in the aggregate) under non-cancelable leases with terms of more than one year to the total lease liabilities recognized on the Consolidated Balance Sheet as of March 31, 2026:

(In thousands)	Operating leases	
Fiscal year ending March 31,		
2027	\$	5,540
2028		5,023
2029		4,084
2030		1,954
2031		1,683
Thereafter		4,304
Total undiscounted future minimum lease payments		22,588
Less: difference between undiscounted lease payments and discounted lease liabilities		(3,544)
Total lease liabilities	\$	19,044

7. Supplemental Disclosures of Cash Flow Information

Additional information related to the Consolidated Statements of Cash Flows is as follows:

(In thousands)	Year Ended March 31,		
	2026	2025	2024
Cash receipts for interest	\$ 1,920	\$ 3,685	\$ 4,652
Cash payments for interest	435	1,379	—
Cash payments for income tax, net	2,066	1,928	1,733
Cash payments for operating leases	6,289	5,467	5,197
Cash payments for finance leases	—	—	5
Accrued capital expenditures	168	185	419

8. Additional Balance Sheet Information

Additional information related to the Consolidated Balance Sheets is as follows:

(In thousands)	March 31, 2026	March 31, 2025
Prepaid expenses and other current assets:		
Prepaid expenses	\$ 9,064	\$ 8,059
Employee retention credits receivable (see Note 9, <i>Income Taxes</i>)	3,020	—
Other	117	1,201
Total	\$ 12,201	\$ 9,260
Accrued liabilities:		
Salaries, wages, employee benefits, and payroll taxes	\$ 21,014	\$ 17,007
Income and indirect taxes payable	2,059	1,512
Other	1,260	3,805
Total	\$ 24,333	\$ 22,324

9. Income Taxes

For the year ended March 31, income before income taxes consisted of the following:

(In thousands)	2026	2025	2024
Income before income taxes			
United States	\$ 41,197	\$ 10,837	\$ 12,492
Foreign	7,211	14,798	8,192
Total income before income taxes	\$ 48,408	\$ 25,635	\$ 20,684

For the year ended March 31, income tax expense (benefit) consisted of the following:

(In thousands)	2026	2025	2024
Income tax provision (benefit)			
Current:			
Federal	\$ —	\$ —	\$ —
State and local	358	601	370
Foreign	1,363	2,493	1,884
Deferred:			
Federal	6,510	2,488	(57,065)
State and local	1,986	(227)	(8,131)
Foreign	(600)	(2,945)	(2,569)
Income tax provision (benefit)	\$ 9,617	\$ 2,410	\$ (65,511)

For the year ended March 31, income taxes paid consisted of the following:

(In thousands)	2026
Income taxes paid	
U.S. Federal	\$ —
U.S. State and Local	
California	125
Other*	658
Foreign	
India	1,136
Other*	147
Total income tax paid	\$ 2,066

*For the year ended March 31, 2026, there were no other individual jurisdictions with cash taxes paid that equaled or exceeded 5% of total income tax paid.

The following tables present the principal components of the difference between the effective tax rate and the U.S. federal statutory income tax rate for the years ended March 31:

(In thousands)	2026	%
Income tax expense at the U.S. federal statutory rate	\$ 10,165	21.0%
Expense for state taxes, net of federal effect	1,264	2.6
Impact of foreign operations - India	585	1.2
Impact of foreign operations - other	(775)	(1.6)
Share-based compensation	(1,710)	(3.5)
U.S. federal R&D credits	(808)	(1.7)
Effects of cross border tax laws: NCTI	1,338	2.8
Change in valuation allowance - U.S. state	(361)	(0.7)
Change in valuation allowance - foreign	39	0.1
Change in liability for unrecognized tax benefits	(45)	(0.1)
Provision to return - U.S. federal	(263)	(0.5)
Provision to return - U.S. state	(434)	(0.9)
Provision to return - foreign	(158)	(0.3)
Deferred adjustments - U.S. federal	993	2.1
Deferred adjustments - U.S. state	113	0.2
Other	(326)	(0.8)
Income tax provision	\$ 9,617	19.9%

The fiscal 2026 tax provision was different than the statutory rate due primarily to excess tax benefits associated with share-based compensation, Net Controlled Foreign Corporation Tested Income (NCTI), previously global intangible low-taxed income (GILTI), and U.S. R&D credits.

(In thousands)	2025		2024	
Income tax expense at the U.S. Federal statutory rate	\$	5,383	\$	4,344
Expense for state taxes		768		293
Impact of foreign operations		(673)		(250)
R&D credits		(2,091)		(3,540)
GILTI		2,907		1,471
Rate change		(1,157)		(1,817)
Change in valuation allowance		(1,610)		(65,023)
Change in liability for unrecognized tax benefits		—		(1,044)
Share-based compensation		(60)		(1,823)
Deferred adjustments		(357)		1,927
Provision to return		(884)		(219)
Other		184		170
Income tax provision (benefit)	\$	2,410	\$	(65,511)

We have elected to account for GILTI inclusions in the period in which they are incurred.

The fiscal 2025 tax provision results primarily from the benefits of U.S. R&D credits, GILTI, the rate change of Special Economic Zone deferred taxes and the release of the valuation allowances against foreign deferred tax assets. The fiscal 2025 tax provision differs from the statutory rate primarily due to the release of foreign valuation allowances and the benefit of U.S. R&D credits.

The fiscal 2024 tax provision results primarily from the release of the valuation allowances against U.S. Federal and State deferred tax assets.

Deferred tax assets and liabilities as of March 31, are as follows:

(In thousands)	2026		2025	
Deferred tax assets:				
Accrued liabilities	\$	8,582	\$	8,663
Allowance for expected credit losses and doubtful accounts		220		121
Federal losses and credit carryforwards		17,218		20,429
Foreign losses and credit carryforwards		2,916		3,325
State losses and credit carryforwards		6,238		6,261
Deferred revenue		465		368
Capitalized research expenses		27,191		32,410
Operating lease liabilities		4,466		5,372
Goodwill and other intangible assets		(520)		(574)
Other		162		426
		66,938		76,801
Less: valuation allowance		(958)		(1,340)
Total		65,980		75,461
Deferred tax liabilities:				
Operating lease right-of-use assets		(3,204)		(3,961)
Goodwill and other intangible assets		(13,105)		(13,958)
Property and equipment and software amortization		(1,746)		(2,007)
Total		(18,055)		(19,926)
Total deferred tax assets, net	\$	47,925	\$	55,535

At March 31, 2026, we had \$10.5 million of federal net operating loss carryforwards that expire, if unused, in fiscal year 2039, and \$42.5 million of federal net operating loss carryforwards that can be carried forward indefinitely. Our Hong Kong, Singapore, and the U.A.E. subsidiaries have \$0.6 million, \$0.6 million, and \$0.1 million of net operating loss carryforwards, respectively. The losses for Hong Kong, Singapore and the U.A.E. can be carried forward indefinitely. Our India subsidiary operates in a "Special Economic Zone" (SEZ). One of the benefits associated with the SEZ is that the India subsidiary is not subject to regular India income taxes during its first 5 years of operations which included fiscal 2018 through fiscal 2022.

The India subsidiary is then subject to 50% of regular India income taxes during the second five years of operations which includes fiscal 2023 through fiscal 2027. The aggregate value of the benefit of the SEZ during the current fiscal year is \$4.1 million as of March 31, 2026. The Company has paid minimum alternative taxes during the period of regular tax relief resulting in a credit of \$1.6 million as of March 31, 2026.

On July 4, 2025, the One Big Beautiful Bill Act (OBBBA) was signed into law. The legislation includes several changes to federal tax law that generally allow for more favorable deductibility of certain business expenses beginning in the Company's fiscal 2026, including the restoration of immediate expensing of domestic research and development expenditures, reinstatement of accelerated fixed asset depreciation and modifications to the international tax framework. We applied the relevant changes to the Company's income tax provision for the year ended March 31, 2026, which did not materially impact the Company's consolidated tax position. We expect future cash tax savings resulting from the full expensing of U.S. research and development expenses under the OBBBA. OBBBA also amended and extended to calendar year 2030 the statute of limitations for employee retention credits under the CARES Act for certain employment taxes incurred during the three months ended September 30, 2021. The amendment and extension does not impact our recognition and measurement of credits under ASU 2025-10.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) is a stimulus bill which was in response to economic consequences of the COVID-19 pandemic. The CARES Act provided an employee retention credit, which is a refundable tax credit against certain employment taxes. We filed our employee retention credit claims under the CARES Act during January 2024. In accordance with ASU 2025-10, which we adopted early effective as of April 1, 2025, as permitted, we record any credits for which collection is probable after considering all facts and circumstances including whether any statutes of limitations apply. We consider collection probable once we receive confirmation that the Internal Revenue Service has processed our claim for the credit, and we know the amount of the credit plus any associated interest to be refunded. During the years ended March 31, 2026 and 2025, we recorded \$9.2 million and \$0.5 million, respectively, of employee retention credits including associated interest received or expected to be received in cash as other (gains) charges, net, in the Consolidated Statements of Operations. As of March 31, 2026, we recorded \$3.0 million of employee retention credits receivable in "Prepaid expenses and other current assets" on the Consolidated Balance Sheet. We expect no future employee retention credit claims under the CARES Act.

At March 31, 2026 we also had \$112.2 million of state net operating loss carryforwards that expire, if unused, in fiscal years 2027 through 2046.

We have recorded valuation allowances offsetting certain deferred income tax assets due to the uncertainty of the ultimate realization of the future benefits from those assets. At March 31, 2026, the total valuation allowance against deferred tax assets of \$1.0 million was comprised of \$0.9 million for U.S. state deferred tax assets, and \$0.1 million associated with deferred tax assets in the U.A.E. The ultimate realization of deferred tax assets depends on various factors including the generation of taxable income during the future periods in which the underlying temporary differences are deductible. We consider the scheduled reversal of deferred tax liabilities (including the impact of available carryback and carryforward periods), projected earnings, and tax planning strategies in our assessment of positive and negative evidence supporting the likelihood of deferred tax asset realization. We maintain valuation allowances for deferred tax assets until we have sufficient evidence to support the reversal of all or some portion of the allowances.

The undistributed earnings of our foreign subsidiaries are not subject to U.S. federal and state income taxes unless such earnings are distributed in the form of dividends or otherwise to the extent of current and accumulated earnings and profits. The undistributed earnings of foreign subsidiaries are permanently reinvested and totaled \$53.6 million and \$32.8 million as of March 31, 2026 and 2025, respectively. We made the determination of permanent reinvestment on the basis of sufficient evidence that demonstrates we will invest the undistributed earnings overseas indefinitely for use in working capital, as well as foreign expansion. The determination of the amount of the unrecognized deferred U.S. income tax liability related to the undistributed earnings is not practicable.

Uncertain tax positions as of March 31, are as follows:

(In thousands)	2026	2025	2024
Beginning gross unrecognized tax benefits	\$ 1,063	\$ 562	\$ 575
Decreases related to prior year tax positions	(46)	—	(575)
Increases related to current year tax positions	189	235	562
Increases related to prior year tax positions	—	134	—
Increases due to business acquisitions	—	132	—
Decreases related to settlements with tax authorities	(133)	—	—
Ending gross unrecognized tax benefits	\$ 1,073	\$ 1,063	\$ 562

We recognize interest accrued on any uncertain tax positions as a component of income tax expense. Penalties are recognized as a component of general and administrative expenses. For the year ended March 31, 2025, we accrued interest and penalties of \$0.3 million and a corresponding indemnification asset. For the year ended March 31, 2024, we reduced accrued interest and penalties by \$0.6 million.

We are consistently subject to tax audits. Due to the nature of examinations in multiple jurisdictions, changes could occur in the amount of gross unrecognized tax benefits during the next 12 months that we cannot anticipate.

In the U.S. we file federal and state income tax returns where statutes of limitations generally range from three to five years. Although we have resolved examinations with the IRS through tax year ended March 31, 2010, U.S. federal tax years are open from 2011 forward due to attribute carryforwards. The statute of limitations is open from fiscal year 2021 forward in certain state jurisdictions. We also file income tax returns in international jurisdictions where statutes of limitations generally range from three to seven years. Years beginning after 2019 are open for examination by certain foreign taxing authorities.

10. Employee Benefit Plans

Defined Contribution Plans

We maintain a 401(k) plan for employees located in the United States meeting certain service requirements. Generally, the plan allows eligible employees to contribute a portion of their compensation, and we match 100% of the first 1% of the employee's pre-tax contributions and 50% of the next 5% of the employee's pre-tax contributions. We may also make discretionary contributions each year for the benefit of all eligible employees under the plan. Agilysys matching contributions were \$2.3 million, \$2.1 million, and \$1.9 million in fiscal 2026, 2025, and 2024, respectively.

We also maintain defined contribution retirement plans for employees located in Canada, the United Kingdom and in the Asia Pacific region in accordance with local statutory requirements and business practices.

Defined Benefit Plans

We maintain certain defined benefit plans covering eligible employees of our India subsidiary in accordance with local statutory requirements and business practices. The Gratuity Plan provides a lump-sum payment to vested employees at retirement, death, incapacitation, or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with the Company. The Leave Encashment Plan provides a lump-sum payment to employees when they leave the Company based on a multiple of their final monthly salary. Both the Gratuity and Leave Encashment Plans are unfunded with obligation amounts determined by actuarial valuations. These obligation amounts are recorded on the Consolidated Balance Sheets as "Employee benefit obligations" within "Other non-current liabilities". All expenses associated with these plans are recorded in the Consolidated Statements of Operations within "Operating expenses".

Employee benefit obligations and related changes for the years ended March 31 are as follows:

(In thousands)	2026	2025	2024
Employee benefit obligations as of April 1	\$ 5,059	\$ 4,315	\$ 2,742
Employee benefits paid	(348)	(374)	(175)
Employer expenses	956	1,118	1,748
Employee benefit obligations	\$ 5,667	\$ 5,059	\$ 4,315

Endorsement Split-Dollar Life Insurance

Agilysys provides certain former executives with life insurance benefits through endorsement split-dollar life insurance arrangements. We entered into agreements with each of the former executives, whereby we must maintain the life insurance policy for a specified amount and split a portion of the policy benefits with their designated beneficiary.

Our investment in these corporate-owned life insurance policies were recorded at their cash surrender value, which approximates fair value at the balance sheet date. On the Consolidated Balance Sheets as of March 31, 2026 and 2025, the cash surrender value of \$1.1 million for the remaining policies were held in "Other non-current assets," and the present value of future proceeds owed to those executives' designated beneficiaries of \$0.1 million, which approximates fair value, were recorded within "Other non-current liabilities."

Changes in the cash surrender value of these policies related to gains and losses incurred on these investments are classified within "Other income (expense), net" in the accompanying Consolidated Statements of Operations and are immaterial.

11. Commitments and Contingencies

Legal Contingencies

We are involved in legal actions that arise in the ordinary course of business. It is the opinion of management that the resolution of any current pending litigation will not have a material adverse effect on our financial position or results of operations.

12. Earnings per Share

The following data shows the amounts used in computing earnings per share and the effect on earnings and the weighted average number of shares of dilutive potential common shares.

(In thousands, except per share data)	Year Ended March 31,		
	2026	2025	2024
Numerator:			
Net income	\$ 38,791	\$ 23,225	\$ 86,195
Series A convertible preferred stock dividends	—	—	(1,204)
Net income attributable to common shareholders	\$ 38,791	\$ 23,225	\$ 84,991
Denominator:			
Weighted average shares outstanding - basic	27,923	27,518	25,668
Dilutive SSARs	292	472	929
Dilutive unvested restricted stock units	71	40	10
Dilutive unvested restricted shares	103	227	235
Weighted average shares outstanding - diluted	28,389	28,257	26,842
Net Income per share - basic:	\$ 1.39	\$ 0.84	\$ 3.31
Net Income per share - diluted:	\$ 1.37	\$ 0.82	\$ 3.17
Anti-dilutive restricted shares and restricted stock units	195	132	175

Basic net income per share is computed as net income available to common shareholders divided by the weighted average basic shares outstanding. The outstanding shares used to calculate the weighted average basic shares excludes 74,792, 229,710 and 436,177 of restricted shares at March 31, 2026, 2025 and 2024, respectively, as these shares were issued but were not vested and, therefore, not considered outstanding for purposes of computing basic earnings per share at the balance sheet dates.

Diluted net income per share includes the effect of all potentially dilutive securities on earnings per share. We have stock-settled appreciation rights (SSARs), unvested restricted shares, restricted stock units, employee stock purchase plan (ESPP) shares, and performance shares, that are potentially dilutive securities. When we report a net loss, the denominator of

diluted earnings per share cannot be adjusted for the dilutive impact of share-based compensation awards because doing so would be anti-dilutive.

13. Share-based Compensation

We may grant incentive stock options, non-qualified stock options, SSARs, restricted shares, restricted stock units, and performance shares under our shareholder-approved Amended and Restated 2024 Equity Incentive Plan (the 2024 Plan). We have equity awards outstanding under the 2024 Plan and under our prior 2020 Equity Incentive Plan, as Amended and Restated (the 2020 Plan, together with the 2024 Plan, the Equity Incentive Plans). The maximum aggregate number of common shares available for issuance under the Equity Incentive Plans is 3.2 million. We may also grant shares under our shareholder-approved Employee Stock Purchase Plan (the ESPP) for up to 0.5 million common shares.

We may distribute authorized but unissued shares or treasury shares to satisfy share option and SSAR exercises or grants of restricted shares, restricted stock units, performance shares, or ESPP shares.

For SSARs, the exercise price must be set at least equal to the closing market price of our common shares on the date of grant. The maximum term of SSARs is seven years from the date of grant. The Compensation Committee of the Board of Directors establishes the vesting period over which SSARs are subject to a service condition and the vesting criteria for SSARs subject to a market condition.

Restricted shares and restricted stock units, whether time-vested or performance-based, may be issued at no cost or at a purchase price that may be below their fair market value, but are subject to forfeiture and restrictions on their sale or other transfer. Performance-based grants may be conditioned upon the attainment of specified performance objectives and other conditions, restrictions, and contingencies. Restricted shares have the right to receive dividends, if any, upon vesting, subject to the same forfeiture provisions that apply to the underlying grants.

We record compensation expense related to SSARs, restricted shares, restricted stock units, performance shares, and ESPP shares granted to certain employees and non-employee directors based on the fair value of the awards on the grant date. The fair value of restricted stock unit and restricted share grants subject only to a service condition is based on the closing price of our common shares on the grant date. For stock option and SSAR grants subject only to a service condition, we estimate the fair value on the grant date using the Black-Scholes-Merton option pricing model with inputs including the closing market price at grant date, exercise price and assumptions regarding the risk-free interest rate, expected volatility of our common shares based on historical volatility, and expected term as estimated using the simplified method. We use the simplified method for SSAR grants because we believe historical exercise data does not provide a reasonable basis upon which to estimate the expected term. For restricted stock unit, restricted share, and SSAR grants subject to a market condition, we estimate the fair value on the grant date through a lattice option pricing model that utilizes a Monte Carlo analysis with inputs including the closing market price at grant date, share price threshold, performance period term and assumptions regarding the risk-free interest rate and expected volatility of our common shares based on historical volatility. Inputs for SSAR grants subject to a market condition also include exercise price, remaining contractual term, and suboptimal exercise factor.

We record compensation expense for restricted stock units, restricted shares, and SSAR grants subject to a service condition using the graded vesting method. We record compensation expense for ESPP shares on a straight-line basis over the applicable offering period. We record compensation expense for SSAR grants subject only to a market condition over the derived service period, which is an output of the lattice option pricing model.

The following table summarizes the share-based compensation expense for grants included in the Consolidated Statements of Operations for fiscal 2026, 2025 and 2024:

(In thousands)	Year Ended March 31,		
	2026	2025	2024
Product development	\$ 13,234	\$ 10,064	\$ 7,380
Sales and marketing	2,079	1,665	831
General and administrative	6,505	6,048	5,900
Total share-based compensation expense	\$ 21,818	\$ 17,777	\$ 14,111

Stock-Settled Stock Appreciation Rights

SSARs are rights granted to an employee to receive value equal to the difference between the price of our common shares on the date of exercise and the exercise price. The value is settled in common shares of Agilysys, Inc. There were no SSARs granted in fiscal 2026, 2025 or 2024.

The following table summarizes the activity during fiscal 2026 for SSARs awarded under our Equity Incentive Plans:

(In thousands, except share and per share data)	Number of Rights	Weighted- Average Exercise Price (per right)	Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Outstanding at April 1, 2025	394,959	\$ 20.04		
Granted	—	—		
Exercised	(78,976)	20.12		
Forfeited	—	—		
Cancelled/expired	—	—		
Outstanding at March 31, 2026	315,983	\$ 20.02	1.2	\$ 16,153
Exercisable at March 31, 2026	315,983	\$ 20.02	1.2	\$ 16,153
Vested at March 31, 2026	315,983	\$ 20.02	1.2	\$ 16,153

The following table presents additional information related to SSARs activity during fiscal 2026, 2025 and 2024:

(In thousands)	2026	2025	2024
Compensation expense	\$ —	\$ —	\$ —
Total intrinsic value of SSARs exercised	\$ 6,631	\$ 65,080	\$ 16,889
Total fair value of SSARs vesting	\$ —	\$ —	\$ —

As of March 31, 2026, there was no unrecognized share-based compensation expense related to SSARs.

A total of 62,748 shares, net of 14,838 shares withheld to cover the employee's minimum applicable income taxes, were issued from treasury shares to settle SSARs exercised during the twelve months ended March 31, 2026. The shares withheld were returned to treasury shares.

Restricted Shares

We granted restricted shares to certain of our Directors, executives and key employees, the vesting of which is service-based. The following table summarizes the activity during the twelve months ended March 31, 2026 for restricted shares awarded under our Equity Incentive Plans:

	Number of Shares	Weighted- Average Grant- Date Fair Value (per share)
Outstanding at April 1, 2025	229,710	\$ 76.01
Granted	4,970	100.19
Vested	(154,939)	67.33
Forfeited	(4,949)	92.79
Expected to vest at March 31, 2026	74,792	\$ 94.58

The weighted-average grant date fair value of the restricted shares includes grants subject only to a service condition. As of March 31, 2026, a total of 74,792 shares were issued from treasury.

The following table presents additional information related to restricted share activity during fiscal years 2026, 2025, and 2024:

(In thousands)	2026	2025	2024
Compensation expense	\$ 4,448	\$ 11,379	\$ 11,146
Total fair value of restricted share vesting	\$ 9,831	\$ 13,182	\$ 6,595

As of March 31, 2026, total unrecognized share-based compensation expense related to non-vested restricted shares was \$1.8 million, which is expected to be recognized over a weighted-average vesting period of 1.0 years. We do not include restricted shares in the calculation of basic earnings per share until the shares are vested.

Restricted Stock Units

We granted restricted stock units to certain of our Directors, executives and key employees, the vesting of which is service-based. Certain restricted stock units are also subject to a market condition. The following table summarizes the activity during the twelve months ended March 31, 2026 for restricted stock units awarded under our Equity Incentive Plans:

	Number of Shares	Weighted- Average Grant- Date Fair Value (per share)
Outstanding at April 1, 2025	181,195	\$ 118.90
Granted	209,080	126.05
Vested	(88,424)	101.56
Forfeited	(10,896)	130.75
Expected to vest at March 31, 2026	290,955	\$ 128.87

The following table presents additional information related to restricted stock unit activity during fiscal 2026:

(In thousands)	2026	2025	2024
Compensation expense	\$ 16,368	\$ 5,591	\$ 2,321
Total fair value of restricted stock unit vesting	\$ 8,980	\$ 932	\$ 900

As of March 31, 2026, total unrecognized share-based compensation expense related to non-vested restricted stock units was \$23.9 million, which is expected to be recognized over the weighted-average vesting period of 2.4 years.

Performance Shares

Upon approval of the Compensation Committee of our Board of Directors, after achieving the performance conditions associated with our annual bonus plan, we grant common shares to our Chief Executive Officer that vest immediately. Once attainment of the performance conditions becomes probable, we recognize compensation expense related to performance shares ratably over the performance period. The number of performance shares granted will be based on the closing price of our common shares on the grant date and settlement date, which are the same under the Equity Incentive Plans.

Based on the performance conditions achieved as they relate to our annual bonus plan, management estimates a liability of \$0.6 million as of March 31, 2026, to be settled through the granting and vesting of performance shares after March 31, 2026. We recognized compensation expense related to performance shares of \$0.6 million, \$0.5 million, and \$0.6 million in the fiscal years ended March 31, 2026, 2025, and 2024, respectively.

Employee Stock Purchase Plan Shares

The ESPP permits participants to purchase common stock through regular payroll deductions, up to a specified percentage of their eligible compensation. The ESPP is compensatory because, among other provisions, it currently allows participants to purchase stock at up to a 15% discount from the lower of the closing price of a share of our common stock on the first or last trading day of the ESPP offering period. We measure share-based compensation expense for the ESPP based on the fair value of the ESPP grant at the beginning of the offering period. The fair value includes the value of the discount and the

value associated with the call and put options that take advantage of the variability in the common stock price during the offering period. We estimate the value of the call and put options using the Black-Scholes-Merton option pricing model with inputs including the closing market price of our common stock on the first date of the offering period and assumptions regarding the risk-free interest rate, expected term, and expected volatility of our common shares over the offering period based on historical volatility. We used the following inputs including principal assumptions for the following offering period reflected in our consolidated financial statements:

	Offering Period Ending June 30, 2026	Offering Period Ended December 31, 2025	Offering Period Ended June 30, 2025	Offering Period Ended December 31, 2024	Offering Period Ended June 30, 2024
Grant date fair value	\$ 118.84	\$ 115.19	\$ 131.71	\$ 103.43	\$ 81.60
Risk-free interest rate over contractual term	3.62%	4.30%	4.31%	4.91%	5.36%
Expected term (in years)	0.49	0.50	0.49	0.50	0.41
Expected volatility	45.17%	60.10%	42.40%	40.93%	47.41%

The risk-free interest rate is based on the yield of a zero coupon U.S. Treasury bond whose maturity period approximates the expected term of the ESPP shares. The expected term is the offering period, which is typically six months.

We record amounts withheld from participants during each offering period in accrued salaries, wages and related benefits on the Consolidated Balance Sheets until such shares are purchased. Amounts withheld from participants for the offering period ending June 30, 2026 totaled \$0.4 million as of March 31, 2026.

As of March 31, 2026, total unrecognized share-based compensation expense related to ESPP shares was \$0.1 million, which is expected to be recognized on a straight-line basis over the remaining term of the offering period ending June 30, 2026.

14. Segment Information

Operating segments represent components of an entity for which discrete financial information is available to the entity's chief operating decision maker (CODM). Our Chief Executive Officer is our CODM.

We operate as a single reporting segment providing software solutions to the global hospitality industry as our CODM reviews the financial information presented on a consolidated basis to allocate resources, assess financial performance, and make operating decisions. During our budgeting and forecasting process, our CODM allocates resources including employees, equipment and financial resources. Our CODM regularly considers forecast-to-actual variances to assess financial performance and to make operating decisions around product development, pricing, employee compensation, and for investments in information security and technology infrastructure, and in market development. The Company's measure of segment profit or loss is net income as shown in our Consolidated Statements of Operations.

Our CODM reviews segment assets, reported as total assets on our Consolidated Balance Sheets, and capital expenditures, as reported in our Consolidated Statements of Cash Flows.

The segment accounting policies are the same as those we describe in Note 2, *Summary of Significant Accounting Policies*, except that certain expense allocations we make for presentation of Cost of goods sold as reported in our Consolidated Statements of Operations in accordance with U.S. GAAP, primarily for employee compensation, are not applied to cost of revenue as reported in the table below.

The significant expense categories and consolidated net income provided to the CODM for the years ended March 31, 2026, 2025, and 2024 are as follows:

(In thousands)	Year Ended March 31,		
	2026	2025	2024
Net revenue:			
Products	\$ 41,168	\$ 41,324	\$ 49,083
Subscription and maintenance	205,941	170,051	138,069
Professional services	72,203	64,249	50,312
Total net revenue	319,312	275,624	237,464
Cost of revenue ⁽¹⁾	50,269	46,016	46,183
Product development expenses ⁽¹⁾	66,192	60,177	53,825
Sales and marketing expenses ⁽¹⁾	38,486	31,491	27,588
Professional services expenses ⁽¹⁾	44,420	34,130	28,611
Customer support expenses ⁽¹⁾	15,998	14,604	13,120
General and administrative expenses ⁽¹⁾	36,290	35,336	30,862
Share-based compensation	21,818	17,777	14,113
Other segment items ⁽²⁾	7,048	12,868	(63,033)
Net income	\$ 38,791	\$ 23,225	\$ 86,195

(1) Exclusive of share-based compensation shown separately

(2) Other segment items include depreciation, amortization of internal-use software and intangibles, legal settlements, interest income and expense, other non-operating income and expense, income tax provision and benefit, and other gains and charges

For the fiscal years 2026, 2025 and 2024, revenue from external customers attributed to the U.S. was 87%, 87% and 90%, respectively of total revenue. Revenue from external customers attributed to any individual foreign country is immaterial. We attribute revenue from external customers based on their ship to location. Our customer base is highly fragmented.

The following table lists long-lived assets by geographical area, which includes property and equipment, net and operating lease right-of-use assets for the years ended March 31, 2026, 2025, and 2024:

(In thousands)	Year Ended March 31,		
	2026	2025	2024
United States	\$ 15,327	\$ 18,618	\$ 20,583
India	11,727	14,150	14,917
Rest of world ⁽¹⁾	719	1,064	814
Total long-lived assets	\$ 27,773	\$ 33,832	\$ 36,314

(1) No individual country other than the United States and India exceeded 10% of our total long-lived assets for any period presented

15. Debt

Revolving Credit Facility

On August 16, 2024 (the Credit Agreement Closing Date), we entered into a credit agreement (the Credit Agreement) with the lenders party thereto and Bank of America, N.A., as lender and administrative agent (in such capacity, the Agent). The Credit Agreement provides for a revolving credit facility in the initial maximum aggregate principal amount of \$75.0 million (the Revolving Facility). The Revolving Facility includes the ability for the Company to request an increase to the commitments under the Revolving Facility by an additional aggregate principal amount of up to \$25.0 million. On the Credit Agreement Closing Date, the Company drew \$50.0 million on the Revolving Facility (the Initial Revolving Loan), the proceeds of which we used to fund the Book4Time acquisition described in Note 16 below. There is no principal balance outstanding as of March 31, 2026.

The Revolving Facility matures on August 16, 2027, the three-year anniversary of the Credit Agreement Closing Date, at which time any and all outstanding principal balance will be due and payable. The Company may voluntarily repay outstanding loans and terminate commitments under the Revolving Facility at any time without premium or penalty. There are no repayments required before August 16, 2027. Debt issuance costs relating to the Revolving Facility of \$0.3 million, included in other non-current assets on our Condensed Consolidated Balance Sheets, amortize into interest expense over the three-year life of the Credit Agreement.

Our obligations under the Revolving Facility are guaranteed by certain of the Company's subsidiaries (the Subsidiary Guarantors), subject to certain customary exceptions and limitations. Pursuant to a security and pledge agreement, dated as of the Credit Agreement Closing Date, among the Company, the Subsidiary Guarantors and the Agent, the Revolving Facility is secured by a first-priority lien on substantially all of the Company's and the Subsidiary Guarantors' present and future personal assets and intangible assets and the outstanding capital stock of the Company's subsidiaries owned by the Company or any Subsidiary Guarantor, in each case, subject to certain customary exceptions and limitations.

The Initial Revolving Loan bore interest at the SOFR Daily Floating Rate (as defined in the Credit Agreement), plus an initial margin of 1.625%, which was subject to adjustment as of each fiscal quarter end within the ranges set forth in the Credit Agreement. We are to pay a commitment fee under the Revolving Facility in respect of any unutilized commitments thereunder, which is determined on a leverage-based sliding scale ranging from 0.225% to 0.325% per annum. We record the commitment fee as a component of interest expense. Interest and commitment fees are payable quarterly.

The Credit Agreement contains certain restrictive covenants, including financial covenants that require the Company to maintain a consolidated interest coverage ratio and a consolidated leverage ratio determined at the end of each fiscal quarter as defined in the Credit Agreement. We were in compliance with all financial covenants of the Credit Agreement as of March 31, 2026.

16. Business Combination

On August 20, 2024 (the Acquisition Date), we acquired all the issued and outstanding shares of Book4Time Parent, Inc. (Book4Time), a hospitality software company based in Canada. Book4Time is now a wholly-owned subsidiary of Agilysys, Inc. The consolidated financial statements include the results of Book4Time's operations since the Acquisition Date. The acquisition expands the opportunity to increase our solutions-per-customer globally.

The purchase price consisted of \$147.2 million of cash paid at closing, funded from cash on hand and the proceeds of the Initial Revolving Loan, and \$1.1 million of cash paid in March 2025 for settlement of certain post-closing adjustments partially offset by \$2.5 million of Book4Time's cash received in the acquisition, resulting in net cash consideration of \$145.8 million. We allocated the purchase price for Book4Time to the intangible and certain tangible assets acquired and certain liabilities assumed based on their estimated fair values on the Acquisition Date, with the remaining unallocated purchase price recorded as goodwill. We determined the fair values assigned to identifiable intangible assets acquired primarily by using the income approach, which discounts the expected future cash flows to present value using estimates and assumptions determined by management.

The following table sets forth the components and the allocation of the purchase price for our acquisition of Book4Time:

(In thousands)	Total
Components of Purchase Price:	
Cash	\$ 148,280
Total purchase price	\$ 148,280
Allocation of Purchase Price:	
Net tangible assets (liabilities):	
Accounts receivable, net	\$ 1,623
Other current assets, including cash acquired	3,705
Other assets	623
Current and other liabilities	(1,973)
Deferred tax liabilities	(11,351)
Contract liabilities	(9,324)
Net tangible assets (liabilities)	(16,697)
Identifiable intangible assets:	
Customer relationships	35,800
Non-competition agreements	5,500
Developed technology	2,600
Trade names	17,100
Total identifiable intangible assets	61,000
Goodwill	103,977
Total purchase price allocation	\$ 148,280

We assigned the acquired customer relationships, non-competition agreements, developed technology, and trade name

estimated useful lives of 20 years, three years, five years, and 15 years, respectively, with a weighted average useful life of approximately 15.8 years. The identifiable intangible assets acquired amortize on a straight-line basis, which we believe approximates the pattern in which the assets are utilized, over their estimated useful lives.

The goodwill recognized in the Book4Time purchase price allocation is attributable to synergies in products and technologies to serve a broader customer base, and the addition of a skilled, assembled workforce, which is not separable from goodwill under FASB Accounting Standards Codification 805. As part of the acquisition, the Company acquired fully trained personnel thereby avoiding the expenditure that would have been required to hire and train equivalent personnel. We considered the replacement cost method as most appropriate for the assembled workforce valuation. We valued the assembled workforce included in goodwill at \$1.5 million. The total goodwill recognized in the acquisition amounted to \$104.0 million, which is not deductible for income tax purposes.

The Company recognized acquisition costs of \$0.2 million and \$2.2 million related to the acquisition of Book4Time, consisting primarily of professional fees, during the years ended March 31, 2026 and March 31, 2025, respectively. The Consolidated Statements of Operations include these costs in other (gains) charges, net.

Revenue attributable to Book4Time included in our Consolidated Statements of Operations was \$6.9 million and \$11.4 million for the years ended March 31, 2026 and March 31, 2025, respectively. Net income was not material.

Unaudited Pro-Forma Information

The financial information in the table below summarizes the combined results of operations of Agilysys and Book4Time, on a pro forma basis, as though the companies had been combined as of the beginning of the periods presented. The pro forma financial information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisition had taken place on April 1, 2023 or of results that may occur in the future.

The following unaudited pro forma financial information for each of the three years in the period ended March 31, 2026 combines the historical results of Agilysys and of Book4Time, as converted to U.S. GAAP, for the respective periods:

(In thousands)	Year Ended March 31,		
	2026 Pro Forma	2025 Pro Forma	2024 Pro Forma
Revenue	\$ 319,312	\$ 282,570	\$ 253,469
Net income	\$ 41,373	\$ 22,169	\$ 74,146

We based the foregoing pro forma results on estimates and assumptions that we believe are reasonable. The pro forma results include adjustments primarily related to purchase accounting. We included acquisition costs and other non-recurring charges incurred in the earliest period presented.

17. Preferred Stock

Series A Convertible Preferred Stock

On May 22, 2020, we completed the sale of 1,735,457 shares of our preferred stock, without par value, designated as “Series A Convertible Preferred Stock” (the Convertible Preferred Stock) to MAK Capital Fund L.P. and MAK Capital Distressed Debt Fund I, LP (the Holders) each, in its capacity as a designee of MAK Capital One LLC (the Purchaser), pursuant to the terms of the Investment Agreement, dated as of May 11, 2020, between the Company and the Purchaser, for an aggregate purchase price of \$35 million. We incurred issuance costs of \$1.0 million. We added all issuance costs that were netted against the proceeds upon issuance of the Convertible Preferred Stock to its redemption value. As disclosed in our Annual Report for the fiscal year ended March 31, 2021, Michael Kaufman, the Chairman of the Company’s Board of Directors, is the Chief Executive Officer of MAK Capital One LLC.

Conversion

On November 24, 2023, at our option, we required conversion of all the outstanding shares of Convertible Preferred Stock to common stock. On November 27, 2023, we filed a Certificate of Elimination with the Secretary of State of the State of Delaware with respect to the Convertible Preferred Stock pursuant to which the Convertible Preferred Stock was eliminated and returned to the status of authorized and unissued preferred shares of the Company. Following the mandatory conversion of the outstanding shares of the Convertible Preferred Stock on November 24, 2023, there were no outstanding

shares of the Convertible Preferred Stock. Accordingly, we removed the Series A convertible preferred stock, no par value from temporary equity on our Consolidated Balance Sheet and recorded the associated increase of common shares at \$0.30 stated value and capital in excess of stated value further reflected in our Consolidated Statement of Shareholders' Equity.

Dividends

Prior to the conversion on November 24, 2023, the Holders were entitled to dividends on the Liquidation Preference at the rate of 5.25% per annum, payable semi-annually either (i) 50% in cash and 50% in kind as an increase in the then-current Liquidation Preference or (ii) 100% in cash, at the option of the Company. We paid dividends in the same period as declared by the Company's Board of Directors.

Accounting Policy

Prior to the conversion on November 24, 2023, we classified convertible preferred stock as temporary equity on the Consolidated Balance Sheets due to certain contingent redemption clauses that were at the election of the Holders. We increased the carrying value of the convertible preferred stock to its redemption value for all undeclared dividends using the interest method.

18. Subsequent Events

None.

19. Related Party Transaction

See Note 17, *Preferred Stock*, for description of the MAK Capital investment in the Company. Michael Kaufman, the Chairman of the Company's Board of Directors, is the Chief Executive Officer of MAK Capital.

Schedule II - Valuation and Qualifying Accounts Years ended March 31, 2026, 2025 and 2024

(In thousands)	Balance at beginning of year	Charged to costs and expenses	Deductions	Balance at end of year
2026				
Deferred tax valuation allowance	\$ 1,340	\$ —	\$ (382)	\$ 958
Allowance for expected credit losses	\$ 627	\$ 1,995	\$ (1,517)	\$ 1,105
2025				
Deferred tax valuation allowance	\$ 2,938	\$ —	\$ (1,598)	\$ 1,340
Allowance for expected credit losses	\$ 974	\$ 591	\$ (938)	\$ 627
2024				
Deferred tax valuation allowance	\$ 67,928	\$ —	\$ (64,990)	\$ 2,938
Allowance for expected credit losses	\$ 610	\$ 2,118	\$ (1,754)	\$ 974

Item 9. Change in and Disagreements With Accountants on Accounting and Financial Disclosures.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer (CEO), Chief Financial Officer (CFO) and Corporate Controller and Treasurer, as Principal Accounting Officer (PAO), evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the CEO, CFO, and PAO concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective to ensure that information required to be disclosed by us in reports filed under the Exchange Act of 1934 is (i) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and (ii) is accumulated and communicated to our management, including the CEO, CFO, and PAO, as appropriate to allow for timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

The management of Agilysys, under the supervision of the CEO, CFO, and PAO, is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision of our CEO, CFO, and PAO, management conducted an evaluation of the effectiveness of our internal control over financial reporting as of March 31, 2026 based on the framework in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on the evaluation, management concluded that Agilysys maintained effective internal control over financial reporting as of March 31, 2026.

Grant Thornton LLP, our independent registered public accounting firm, issued their report regarding Agilysys' internal control over financial reporting as of March 31, 2026, which is included elsewhere in this annual report.

Change in Internal Control over Financial Reporting

No changes in our internal control over financial reporting occurred during the last quarter of fiscal 2026 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our CEO, CFO, and PAO, does not expect that our disclosure controls or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system will be achieved. Further, the design of a control system must reflect the impact of resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the possibility that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors. Additionally, controls can be circumvented by individual acts, by collusion of two or more people, or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all possible conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Item 9B. Other Information

None.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

Part III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required by this Item is set forth in our 2026 Proxy Statement under the headings “Election of Directors” and “Corporate Governance” and are incorporated herein by reference. The information required by this Item regarding our executive officers is set forth in Part I of this Annual Report on Form 10-K under the heading “Information About Our Executive Officers.” Information with respect to compliance with Section 16(a) of the Securities Exchange Act of 1934 by our Directors, executive officers, and holders of more than five percent of Agilysys' equity securities will be set forth in the 2026 Proxy Statement under the heading “Section 16(a) Beneficial Ownership Reporting Compliance.”

We adopted a Code of Business Conduct that applies to all Directors and employees of Agilysys, including the Chief Executive Officer and Chief Financial Officer. The Code is available on our website at <http://www.agilysys.com>.

Item 11. Executive Compensation.

The information required by this Item is set forth in our 2026 Proxy Statement under the headings, “Executive Compensation,” “Director Compensation,” “Compensation Committee Report,” “Corporate Governance,” and “Compensation Discussion and Analysis,” which is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters.

The information required by this Item is set forth in our 2026 Proxy Statement under the headings “Beneficial Ownership of Common Shares,” and “Equity Compensation Plan Information,” which information is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this item is set forth in our 2026 Proxy Statement under the headings “Corporate Governance” and “Related Person Transactions,” which information is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services.

The information required by this Item is set forth in our 2026 Proxy Statement under the heading “Ratification of Appointment of Independent Registered Public Accounting Firm,” which information is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

(a)(1) *Financial statements.* The following consolidated financial statements are included herein and are incorporated by reference in Part II, Item 8 of this Annual Report:

Report of Grant Thornton LLP, Independent Registered Public Accounting Firm

Consolidated Balance Sheets as of March 31, 2026 and 2025

Consolidated Statements of Operations for the years ended March 31, 2026, 2025, and 2024

Consolidated Statements of Comprehensive Income (Loss) for the years ended March 31, 2026, 2025, and 2024

Consolidated Statements of Cash Flows for the years ended March 31, 2026, 2025, and 2024

Consolidated Statements of Shareholders' Equity for the years ended March 31, 2026, 2025, and 2024

Notes to Consolidated Financial Statements

(a)(2) *Financial statement schedule.* The following financial statement schedule is included herein and is incorporated by reference in Part II, Item 8 of this Annual Report:

Schedule II - Valuation and Qualifying Accounts

All other schedules have been omitted since they are not applicable or the required information is included in the consolidated financial statements or notes thereto.

(a)(3) *Exhibits.* Exhibits included herein and those incorporated by reference are listed in the Exhibit Index of this Annual Report.

Item 16. Form 10-K Summary.

None.

Agilysys, Inc.

NEED FOR THE POLICY

Insider trading. In general, "insider trading" is the purchase or sale of Securities (as defined below) made while in possession of material non-public information about the issuer of the Securities (e.g., Agilysys, Inc.) in breach of a fiduciary duty. Insider trading is regarded as a serious violation of the federal securities laws. The Securities and Exchange Commission ("SEC") has made enforcement of the prohibitions on insider trading a top priority and has considerable resources at its disposal to detect and pursue suspected violators.

Who may be liable. Although individuals remain the primary target of the SEC's enforcement efforts, liability for insider trading is not limited to individuals. Under the Insider Trading and Securities Fraud Enforcement Act enacted in 1988, companies and other "controlling persons" are potentially liable for insider trading violations by personnel of Agilysys, Inc. (the "Company") and its subsidiaries. This means that the Company, Directors, or members of senior management could be held liable under federal law for trades made on inside information by a Company employee or contractor.

The consequences. The civil and criminal penalties for insider trading violations can be severe: For individuals who trade on inside information, or who "tip" information to others,

- A civil penalty of up to three times the profit gained, or loss avoided.
- A criminal fine (no matter how small the profit) of up to \$5 million; and
- Imprisonment for up to 20 years.

For a company, as well as any other controlling person that fails to take appropriate steps to prevent illegal trading,

- A civil penalty of the greater of approximately \$2.3 million (subject to annual increases) or three times the profit gained, or loss avoided as a result of a violation by personnel; and
- A criminal penalty of up to \$5 million (and up to \$25 million for entities).

The non-legal consequences of insider trading can be as devastating. One can incur significant legal expenses to defend against an SEC insider trading investigation and enforcement proceeding. Even an investigation that does not result in prosecution can irreparably tarnish one's reputation and damage a career.

This insider trading policy (this "Policy") has been adopted in response to the state of the law regarding insider trading, and the potential for serious harm to the Company and its personnel for actual or perceived violations of the law. The Policy is intended to provide a mechanism to prevent insider trading by Company personnel, and moreover, to prevent even the appearance of improper conduct by the Company. We have all worked hard over the years to establish the Company's reputation for integrity and ethical conduct. We cannot afford to have it damaged.

SCOPE OF THE POLICY

Persons Covered. This policy applies to all Directors, officers, and other employees (collectively, "Insiders") of the Company and its subsidiaries and any contractors, consultants, or other outside parties ("Covered Outsiders") who have access to material, non-public information regarding the Company. This policy also applies to immediate family members of, and family members who share their household with, an Insider or a Covered Outsider, as well as to any entities that an

Insider or Covered Outsider influences or controls, including any corporations, limited liability companies, partnerships, or trusts (collectively with Insiders and Covered Outsiders, “Covered Persons”). It is the responsibility of each Insider and Covered Outsider to ensure that these other individuals and entities comply with this Policy.

Applicable Transactions. This Policy applies to any and all trading or other transactions, including gifts, transfers for estate planning purposes, hedging transactions, shorts sells, or any offer to purchase or sell, in (i) the Company's Securities (as defined below) and (ii) the Securities of certain other companies (“Business Partners”), including the Company's customers, vendors, suppliers and any other company with which the Company has contractual relationships or may be negotiating transactions, where the person trading used information about the Business Partner that was obtained in the course of employment with, or the performance of services on behalf of, the Company.

“Securities” means common stock, preferred stock, options, warrants, notes, bonds, convertible securities, derivative securities relating to any of the Company’s or a Business Partner’s securities, and any other securities that the Company or a Business Partner may issue.

STATEMENT OF THE GENERAL POLICY

Covered Persons who possess material non-public information concerning the Company, or concerning a Business Partner where such information is obtained in the course of employment with, or the performance of services on behalf of, the Company, are prohibited from:

- Directly or indirectly buying, selling, or trading or engaging in any transaction involving any Securities of the Company or a Business Partner; and
- Disclosing (also known as "tipping") such material non-public information to others, including family members and friends, who may buy, sell, or trade any Securities of the Company or a Business Partner.

"Material information" means any information that a reasonable investor would regard as important in deciding whether to buy, sell or hold a security. Although the materiality of information will depend on the circumstances of every case, below are some examples of information that would generally be viewed as "material" to the Company or a Business Partner.

- Financial performance, especially anticipated or actual quarterly and year end revenues and earnings, and significant changes in financial performance or liquidity
- Significant projects and strategic plans
- Declarations of stock splits and dividends
- Potential mergers and acquisitions or the sale of assets or subsidiaries
- New major contracts, product lines, suppliers, customers or finance sources, or the loss of any of these
- A significant disruption in the Company’s operations, or loss, potential loss, breach, or unauthorized access of its property or assets, including its facilities and information technology infrastructure
- Significant product or services pricing changes
- Significant changes in senior management
- Actual or threatened major litigation, or the resolutions of such litigation
- Proposed strategic alliances or partnering arrangements
- Proposed issuances of new Securities

"Non-public information" is information about a company that has not yet been widely disseminated to the marketplace through such means as SEC filings, newswire services or financial news services. For purposes of this policy, information that has been so disseminated will be considered non-public until the close of trading on the first full day following the public dissemination.

Post-Termination Transactions. The insider trading policy continues to apply to your transactions in our securities even after you have terminated employment. If you are in possession of material nonpublic information when your employment terminates, you may not trade in our securities until that information has become public or is no longer material.

ADDITIONAL TRADING RESTRICTIONS FOR CERTAIN PERSONS

To facilitate compliance with the Company's general policy and avoid even the appearance of impropriety, the Company has adopted the following, additional restrictions ("Additional Restrictions") with respect to trading in Company Securities by or on behalf of stockholders who, through their position or status with the Company, have continuing access to material non-public information regarding the Company.

All Directors and officers are required to abide by these Additional Restrictions in addition to the terms of the general policy. These Additional Restrictions also may be imposed from time to time on any other Company employee or Covered Outsider who any elected officer determines has access to such information in the ordinary course of his or her employment or services (collectively with all directors and elected officers, the "Restricted Persons").

Pursuant to the Company's general policy, no **Covered Person** may trade or otherwise effect any transactions in Company Securities if he or she is in possession of material non-public information concerning the Company **even during a "trading window" (as defined below).**

Trading window. No Restricted Person may trade or otherwise effect transactions in the Company's Securities except during quarterly "trading windows." Unless the Company has established a "blackout period" (described below), the trading window will open on the first trading date after the first full day of trading following the Company's public release of quarterly or year-end earnings and will close at the close of trading on the last trading date that is at least two weeks (14 days) prior to the end of the fiscal quarter.

Blackout periods. The Company may designate blackout periods during which trading in Company Securities is prohibited because of the existence of material non-public information. When a blackout period is in effect, the trading window will remain closed until the Company determines to terminate the blackout period. The Company will provide written notice to all persons to whom these restrictions may apply of any blackout period that has been established and the termination of any blackout period.

Pre-Clearance Procedures. All trades or other transactions by Restricted Persons involving the Company's Securities, other than excepted transactions set forth below, must be cleared in writing by the Company's General Counsel or Assistant General Counsel – Governance & Securities **prior** to the execution of such trades or other transactions. A request for pre-clearance must be submitted in writing to the Company's General Counsel or Assistant General Counsel – Governance & Securities at least two business days before the proposed trade or other transaction. Such pre-clearance will enable the Company to assure that trades or other

transactions are compliant with this Policy and will facilitate timely preparation and submission of any regulatory filings required as a result of such trades.

Expiration of Pre-Clearance. The approval by the Company’s General Counsel or Assistant General Counsel – Governance & Securities of any proposed trade or other transaction pursuant to the pre-clearance procedures set forth above will expire five trading days after receipt of such approval. If the authorized trade or other transaction is not effected within that five-trading day period, the Restricted Person must reapply for approval of the proposed trade or other transaction in accordance with the pre-clearance procedures set forth above.

EXCEPTIONS

Stock Option Exercises. The trading prohibitions and restrictions set forth in this Policy do not apply to purchases of Company stock through a ***cash*** exercise of an option granted under a Company equity compensation plan at its stated exercise price that does not involve the sale of Company Securities to fund the exercise price or tax obligations owed in connection with such exercise. However, any sale of stock acquired through such an exercise would be subject to the trading prohibitions and restrictions set forth in this Policy, including, with respect to Restricted Persons, the Additional Restrictions.

Automatic ESPP Purchases. For Covered Persons eligible to participate in the Company’s Employee Stock Purchase Plan (the “ESPP”), the trading prohibitions and restrictions set forth in this Policy do not apply to purchases of Company stock through periodic, automatic payroll contributions to the ESPP pursuant to a Covered Person’s advance instructions. However, electing to enroll in the ESPP, making any changes in elections under the ESPP and selling any Company stock acquired under the ESPP are subject to the trading prohibitions and restrictions set forth in this Policy, including, with respect to Restricted Persons, the Additional Restrictions.

Rule 10b5-1 Trading Plans. Rule 10b5-1 under the Exchange Act establishes a safe harbor for liability under Rule 10b-5 for trades or other transactions in the Company’s Securities by persons that are made pursuant to a written plan that was adopted at a time when the person was not aware of material nonpublic information and that meets the requirements of Rule 10b5-1. The trading prohibitions and restrictions set forth in this Policy do not apply to transactions in Company Securities effected in accordance with the provisions of a pre-existing, properly established Rule 10b5-1 trading plan. A properly established Rule 10b5-1 Plan must meet all the requirements set forth in the section below titled “Requirements of Rule 10b5-1 Trading Plans.” Note that the adoption, amendment, or termination of a Rule 10b5-1 trading plan remains subject to the trading prohibitions and restrictions set forth in this Policy, including, with respect to Restricted Persons, the Additional Restrictions.

REQUIREMENTS OF RULE 10B5-1 PLANS

As indicated above, the trading prohibitions and restrictions set forth in this Policy do not apply to transactions in Company Securities effected pursuant to a pre-existing Rule 10b5-1 plan that meets the requirements of Rule 10b5-1 and any additional requirements set forth in this Policy, including the following:

- The plan must be entered into or amended at a time when the person covered by such plan is not aware of material nonpublic information.

- The plan must be entered into in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b5-1, and the person who entered into the plan must have acted in good faith with respect to the plan.
- With respect to Restricted Persons, such policy must be adopted during an open trading window and be expressly authorized by the Company's General Counsel or Assistant General Counsel – Governance & Securities. With respect to all Covered Persons, such policy must not be adopted during any blackout period.
- With respect to directors and officers of the Company, such director or officer must provide a written certification at the time of adoption or amendment of the plan that such director or officer (i) is not aware of material nonpublic information about the Company or its Securities and (ii) is adopting the plan in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b5-1.
- The person covered by such plan must not exercise any influence over the amount of Securities to be traded, the price at which they are to be traded or the date of the trade. The plan must either specify (including by formula) the amount, pricing, and timing of transactions in advance, or delegate discretion on those matters to an independent third party not under such person's control or influence.
- The plan must provide that trading will not begin until the expiration of the applicable cooling-off period as required by law.
- In general, a person may not have multiple 10b5-1 plans regarding the purchase or sale of the Company's Securities existing during the same period with the same broker (commonly referred to as "overlapping plans"). A series of separate contracts with different broker-dealers or other agents acting on behalf of such person to execute trades may be treated as a single Rule 10b5-1 plan, provided that all of the individual contracts, when taken together as a whole, meet the applicable conditions and remain subject to Rule 10b5-1.

CONSEQUENCES OF POLICY VIOLATIONS

You are responsible for adhering to the provisions and procedures of the Policy. Your failure to do so may result in disciplinary or other action by the Company, including, without limitation, your dismissal for cause.

Please direct any questions regarding the application of the Policy to the Company's General Counsel or Assistant General Counsel – Governance & Securities.

SUBSIDIARIES OF AGILYSYS, INC.*

Name	State or jurisdiction of organization or incorporation
Agilysys NV, LLC	Delaware
Agilysys Technologies India Private Limited	India
Agilysys Canada, Inc.	Canada

*Pursuant to Item 601(b)(21)(ii) of Regulation S-K, the names of other subsidiaries of Agilysys, Inc. are omitted because, considered in the aggregate, they would not constitute a significant subsidiary.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have issued our reports dated May 21, 2026, with respect to the consolidated financial statements included in the Annual Report of Agilysys, Inc. on Form 10-K for the year ended March 31, 2026. We consent to the incorporation by reference of said reports in the Registration Statements of Agilysys, Inc. on Form S-8 (File No. 333-282198).
