

Modern Corporate Dining Tech for Today's Workforce

Deliver a Touch-Free Experience

A suite of kiosk and mobile software solutions for corporate dining environments that focuses on the diverse preferences of your customers and staff with touch-free transactions. Automate the food ordering experience, optimize layout, and get real-time F&B operational insights..

High Return On Margins

Identify emerging trends while aligning coverage with demand and capturing more revenue.

IG ONDEMAND

Offer your diners a complete contactless self-service F&B ordering solution that offers an intuitive diner-facing order and pay experience. IG OnDemand allows diners to place and pay for orders using their own device - phone, tablet, laptop – for pick-up or delivery. The result is increased revenue opportunities and more chances to enhance customer service.

IG KIOSK

A self-service F&B ordering kiosk to serve customers 24-7. Diners casually select menu items, process their credit card payment and print a receipt – all using a simple interface. No service staff required, reducing the time and cost it takes to serve each diner.

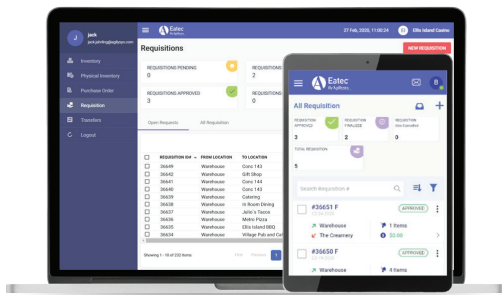

INFOGENESIS POS

Create efficient corporate dining experiences in any venue. IG Flex provides staff with a POS mobility solution that offers full functionality delivered on a convenient tablet device. The solution supports signature capture, adaptable kitchen and receipt printing for large service areas, and a feature-rich mobile experience. The result is reliable customer service in the most demanding environments to grow revenue across venues of any type.

IG PANOPTIC KIOSK

The PanOptic AI-powered self-checkout kiosk allows diners to simply place multiple food items on the kiosk tray all at one time. As soon as the diner places items on the tray, the PanOptic AI service uses computer vision and AI to scan the items, recognize them, initiate a new shopping cart and automatically add the items to the cart.

EATEC

Eatec is certified by the USDA for nutritional analysis. The system can print Nutrition Facts labels for in-house produced grab-and-go items, complete with allergens, ingredients and caloric counts. Eatec also supports in-house production and cycle menu management with plate cost analysis and integrated procurement. Eatec mobile enables inventory transactions via scanner and seamless POS integration allows for complete perpetual inventory management.

IG DIGITAL MENU BOARD

Provides a large format digital display on industry standard technology to present high quality images and menus for a variety of venues. Digital Menu Board allows users to create and design layouts using pre-defined templates, and schedule menus with auto-update at defined times for a specified menu list. With support for rotating menus with promo prices for items and combos, the result is a flexible graphical menu and offer displays linked to your InfoGenesis backend to present up to date items and pricing and increase venue revenue.

ABOUT AGILYSYS

Agilysys is well known for its long heritage of hospitality-focused technology innovation. The Company delivers modular and integrated software solutions and expertise to businesses seeking to maximize Return on Experience (ROE) through hospitality encounters that are both personal and profitable. Over time, customers achieve High Return Hospitality by consistently delighting guests, retaining staff and growing margins. The Agilysys Hospitality Cloud™ combines core operational systems for property management (PMS), point-of-sale (POS) and Inventory and Procurement (I&P) with Experience Enhancers™ that meaningfully improve interactions for guests and for employees across dimensions such as digital access, mobile convenience, self-service control, personal choice, payment options, service coverage and real-time insights to improve decisions. Core solutions and Experience Enhancers are selectively combined in Hospitality Solution Studios™ tailored to specific hospitality settings and business needs. www.Agilysys.com
