

# Life Plan Communities

## Seamless, Personalized Experiences

A suite of easy-to-use software solutions for life plan communities that focuses on the diverse preferences of residents, while helping communities delight guests despite reduced staffing levels. Automate the food ordering experience, create high-touch points, and get real-time F&B operational insights.

## End-to-End Integration

Flexible options that can integrate across the community and meet the unique needs of residents and staff. A collection of life plan experience enhancers can simplify the food ordering experience, facilitate responsive residential meal plan management and provide real-time analytics.

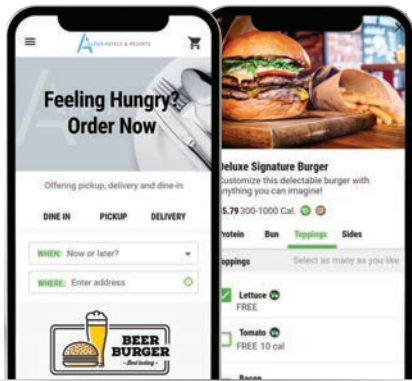

### AGILYSYS INFOGENESIS POS

Create efficient dining experiences in any venue. IG Flex provides a POS mobility solution that offers full functionality delivered on a convenient tablet device. The solution supports signature capture, adaptable kitchen and receipt printing for large service areas, and a feature-rich mobile experience. The result is reliable service in the most demanding environments to grow revenue across your community.

### AGILYSYS EATEC

Eatec is certified by the USDA for nutritional analysis. The system can print Nutrition Facts labels for in-house produced grab-and-go items, complete with allergens, ingredients and caloric counts. Eatec also supports in-house production and cycle menu management with plate cost analysis and integrated procurement. Eatec mobile enables inventory transactions via scanner and seamless POS integration allows for complete perpetual inventory management.

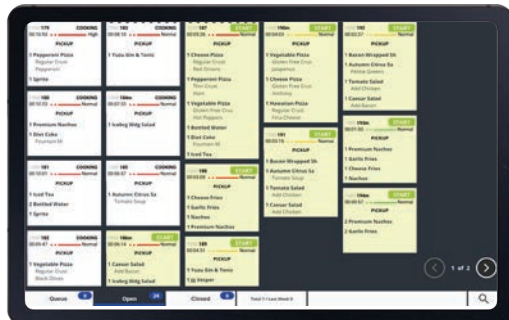

## IG ONDEMAND

Offer residents a complete contactless self-service F&B ordering solution that offers an intuitive resident-facing order and pay experience. IG OnDemand allows residents to place and pay for orders using their own device - phone, tablet, laptop – for pick-up or delivery. The result is dramatically increased revenue opportunities and more chances to enhance service.

## IG KIOSK

A self-service F&B ordering kiosk to serve customers 24-7. Users casually select menu items, process payment and print a receipt – all using a simple interface. No service staff required, reducing the time and cost it takes to serve each customer.

## IG KDS

IG Kitchen Display System (KDS) was designed in cooperation with kitchen and restaurant management experts to be highly available and fault tolerant. IG KDS provides an integrated kitchen display system to manage kitchen orders. The Expo Display shows all orders for the kitchen, allowing an expeditor to control the flow of orders and preparation times, while an Order Status Display shows guests the status of their orders and which can be shown in an ADA format.

## IG DIGITAL MENU BOARD

Provides a large format digital display on industry standard technology to present high quality images and menus for a variety of venues. Digital Menu Board allows users to create and design layouts using pre-defined templates, and schedule menus with auto-update at defined times for a specified menu list. With support for rotating menus with promo prices for items and combos, the result is flexible graphical menu and offer displays linked to your InfoGenesis backend to present up to date items and pricing and increase venue revenue.

### ABOUT AGILYSYS

Agilysys has been a leader in hospitality software for more than 40 years, delivering innovative guest-centric technology solutions for gaming, hotels, resorts and cruise, corporate foodservice management, restaurants, universities, stadia and healthcare.
